

QNAP

Upgrade Your Storage Center

QNAP TS-1685

Business storage solution with extraordinary performance and PCIe expandability

◆ Large capacity potential with twelve 3.5" HDDs and four 2.5" SSDs

The TS-1685 supports high-capacity HDDs and high-performance SSDs allowing you to build a massive data storage center for storage, backup, sharing, and other organizational needs.

◆ PCIe expandability for 10GbE support and more

The TS-1685 comes with three PCIe slots, offering extreme flexibility for users to install 10GbE/40GbE NIC, PCIe NVMe SSD, graphics cards, and USB 3.1 expansion cards for greater application potential.

◆ SSD cache acceleration for extreme IOPS

The TS-1685 fully supports SSD caching to improve the entire workflow of IOPS-demanding applications such as virtualization and data center deployment.

◆ Tiered storage for optimal storage efficiency

QNAP's Qtier Technology empowers the TS-1685 with Auto Tiering to optimize performance and storage utilization across M.2 SSD, SSD, PCIe NVMe SSD (Optional), and SATA.
