Boxafe 1.3

Backup all the document libraries
and site content of your SharePoint site

More than 10K organizations protect data by Boxafe

See what the users said:

We were looking for a flexible backup solution for Office 365 and Gsuite for our customers. Boxafe is working fine.

Great to have Boxafe to protect our O365 environment.

It works great on the whole.

Backups have run now for all accounts and everything seems to work fine.

We know you are waiting for SharePoint backup

A huge amount of important data stored in our O365 SharePoint document libraries. It would be great to protect those files also.

It would be better to have whole SharePoint Online sites protected not only files in document libraries including calendars, posts, news etc.

Cannot backup SharePoint sites.

I would like to be able to backup SharePoint sites.

When can we expect SharePoint support?

QNAP

**Boxafe 1.3 now support
SharePoint backup!**

Scalability

Service Continuity

Organizations use Microsoft SharePoint to create websites.

- Sharing the files with **document libraries**.
- Sharing the information on the **pages**.
- Managing the project by the **lists**.

6 Reasons why you need to backup Microsoft SharePoint

Accidental Deletion

Malicious Deletion / Hacker

Ransomware Attack

Legal Compliance & Litigation Purpose

Keep previous data

Microsoft asks you to protect data

Huge amount of files are stored in the document libraries. Pages, calendar and apps are also important for the business.

Every data loss has huge impact for the business!

Microsoft's Shared Responsibility Model

Microsoft tells you that it's your responsibility to protect your data.

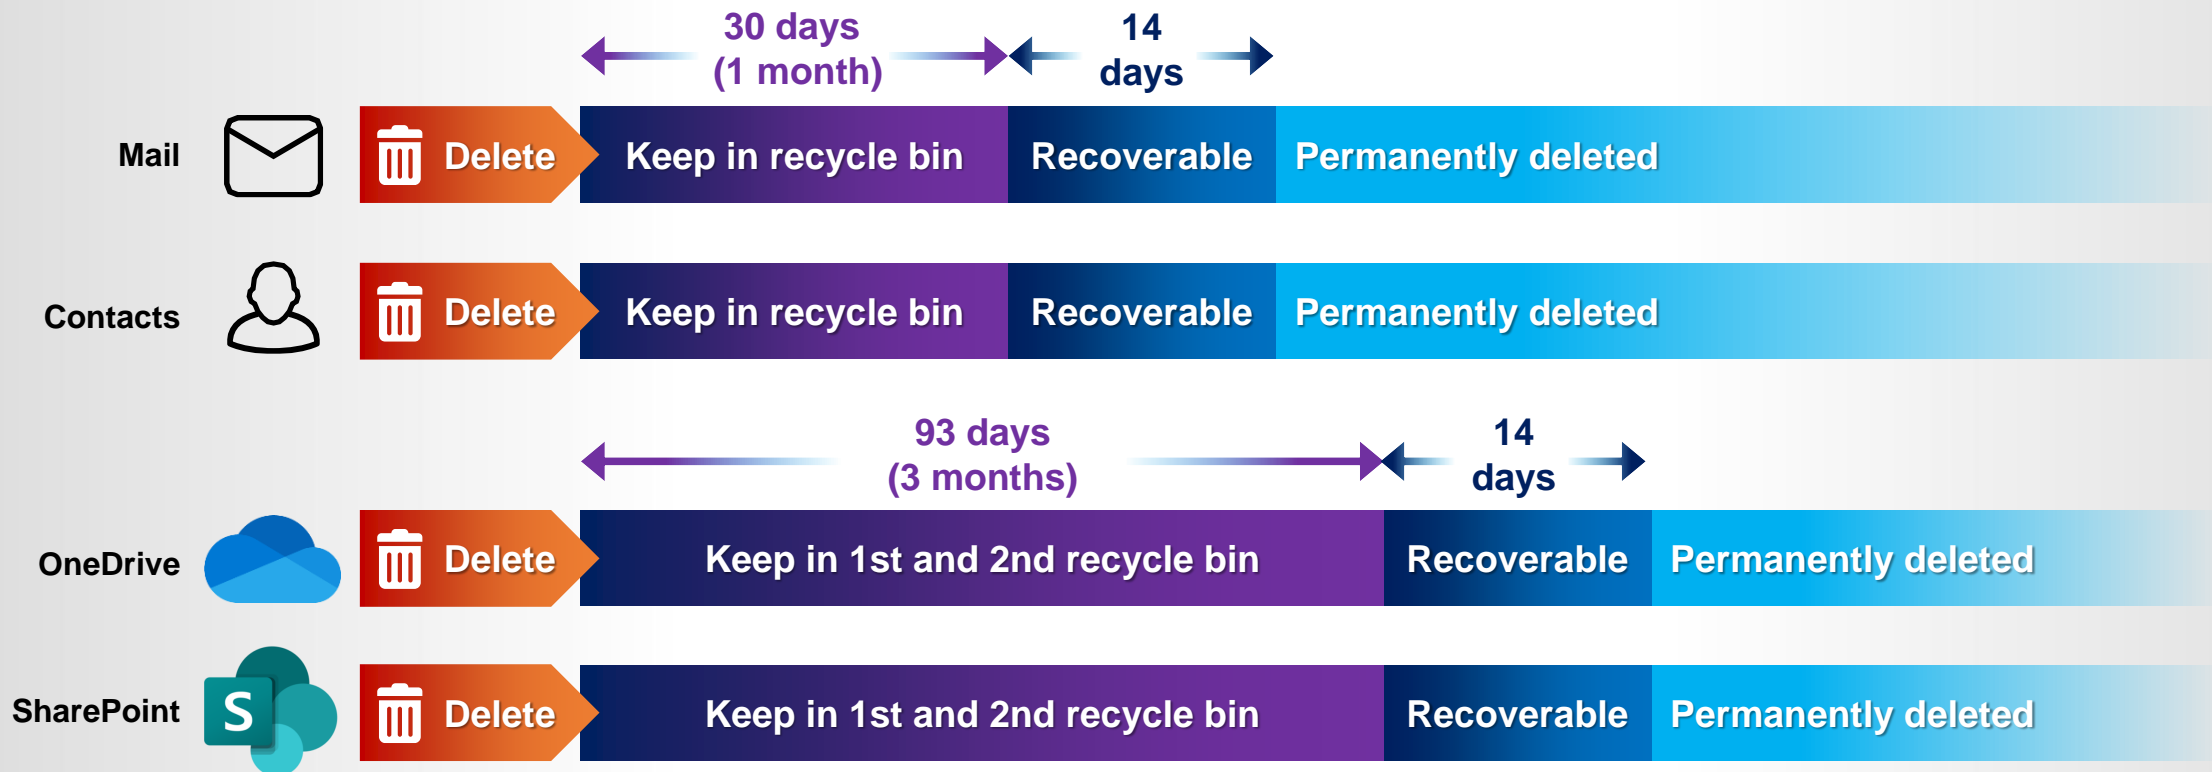

Responsibility	SaaS	PaaS	IaaS	On-prem	
Information and data	Customer	Customer	Customer	Customer	RESPONSIBILITY ALWAYS RETAINED BY CUSTOMER
Devices (Mobile and PCs)	Customer	Customer	Customer	Customer	
Accounts and identities	Customer	Customer	Customer	Customer	
Identity and directory infrastructure	Microsoft	Customer	Customer	Customer	RESPONSIBILITY VARIES BY SERVICE TYPE
Applications	Microsoft	Customer	Customer	Customer	
Network controls	Microsoft	Customer	Customer	Customer	
Operating system	Microsoft	Microsoft	Customer	Customer	
Physical hosts	Microsoft	Microsoft	Microsoft	Customer	RESPONSIBILITY TRANSFERS TO CLOUD PROVIDER
Physical network	Microsoft	Microsoft	Microsoft	Customer	
Physical datacenter	Microsoft	Microsoft	Microsoft	Customer

The screenshot shows the Boxafe web interface for backing up OneDrive data. The browser address bar shows 'qnep.onmicrosoft.com'. The interface includes a sidebar with navigation options: Dashboard, Domains, Settings, Tasks, and Logs. The main content area is titled 'My Drive' and displays a list of files with columns for Name, Owner, and Last Modified. The files listed are 'demo.docx', 'IMG_2987.JPG', 'IMG_2991.JPG', and 'IMG_3116.JPG', all owned by 'QNAP-MPM'. The interface also features buttons for 'Backup', 'Restore', and 'Export', along with a search bar and a version selector set to '2021/02/26 15:51:23'.

Name	Owner	Last Modified
demo.docx	QNAP-MPM	2021/02/26 15:41:47

NEW

Comprehensive protection

Microsoft SharePoint (beta)

Boxafe backs up and restores data and its permission in the site content of the sites and the subsites including:

- ✓ Document libraries
- ✓ Page libraries
- ✓ Lists
- ✓ Site Asset
- ✓ OneNote

Name ↑	Type ↓	Size ↓	Last Modified ↓
appdata	List	-	2020/03/08 07:33:42
appfiles	Document Library	-	2020/03/08 07:33:43
Composed Looks	List	-	2020/03/08 07:33:42
Converted Forms	Document Library	-	2020/03/17 16:05:53
Documents	Document Library	-	2020/03/08 07:33:51
Form Templates	Document Library	-	2020/03/17 16:05:48

If Microsoft 365 backup task was created, grant permissions for SharePoint Sites to backup SharePoint in Boxafe.

Multiuser solution for various Google Workplace / MS365 users

- **Backed up data cannot be accessed by unauthorized personnel.**
- **Restoring data to the cloud can be done by user.**

Add User

You can add a Boxafe user.

Select user: ▼
Specify a user or select one from the list.

Select a role: ▼
This will define the level of access provided to the added user.
All admins are global admins with full access.

Select domain: ▼
Select a domain from the list.

Select email-id: ▼
This will allow the added user to access backup data associated with this email-ID account.

Data preview and search

Data preview before restore. Search for specific data by:

- **Mail:** subject, from, to, cc, bcc.
- **Contacts:** name, email, nicknames, occupations, phone numbers.
- **Calendar:** organizer, title, event location.
- **Drive:** type, owner, date modified, item name.

The screenshot displays the Boxafe web interface for a domain named 'qnap.onmicrosoft.com'. The interface includes a sidebar with navigation options like Dashboard, Domains, Settings, Tasks, and Logs. The main content area shows a list of data items with columns for Name, Type, and Date modified. An 'Advanced Search' dialog is open, allowing users to filter results by Type, Date modified (with start and end date fields), and Item name. The search results table lists various folders and documents, such as 'appfiles', 'appdata', 'Composed Looks', 'Converted Forms', 'Documents', and 'Form Templates'. The interface also shows a 'Backup' button, a 'Restore' button, and a version selection dropdown set to '2021/01/15 14:47:15'. The bottom of the screen displays pagination information: 'Page 1 / 1' and 'Display items: 1-16, Total: 16 | No. of items: 25'.

Select data for granular restore

- **Multiple select data to restore to the account. No need to restore full backup every time.**
- **Restore to another account when the employee already left.**
