QMiroPlus-201W

Tri-Band Wi-Fi Mesh AC2200 2.5GbE NAS and SD-WAN Router

The Tri-Band Mesh Wi-Fi Router with
QNAP home cloud 2.0 solution

2 x 2.5" SATA
SSD/HDD bay

J4125

× **Qualcomm** × **QNAP**

IPQ4019

QTS 4.5.2 + QuRouter

QMiroPlus-201W

QMiro-201W

What are we going to handle to build a Wi-Fi and cloud service environment at home?

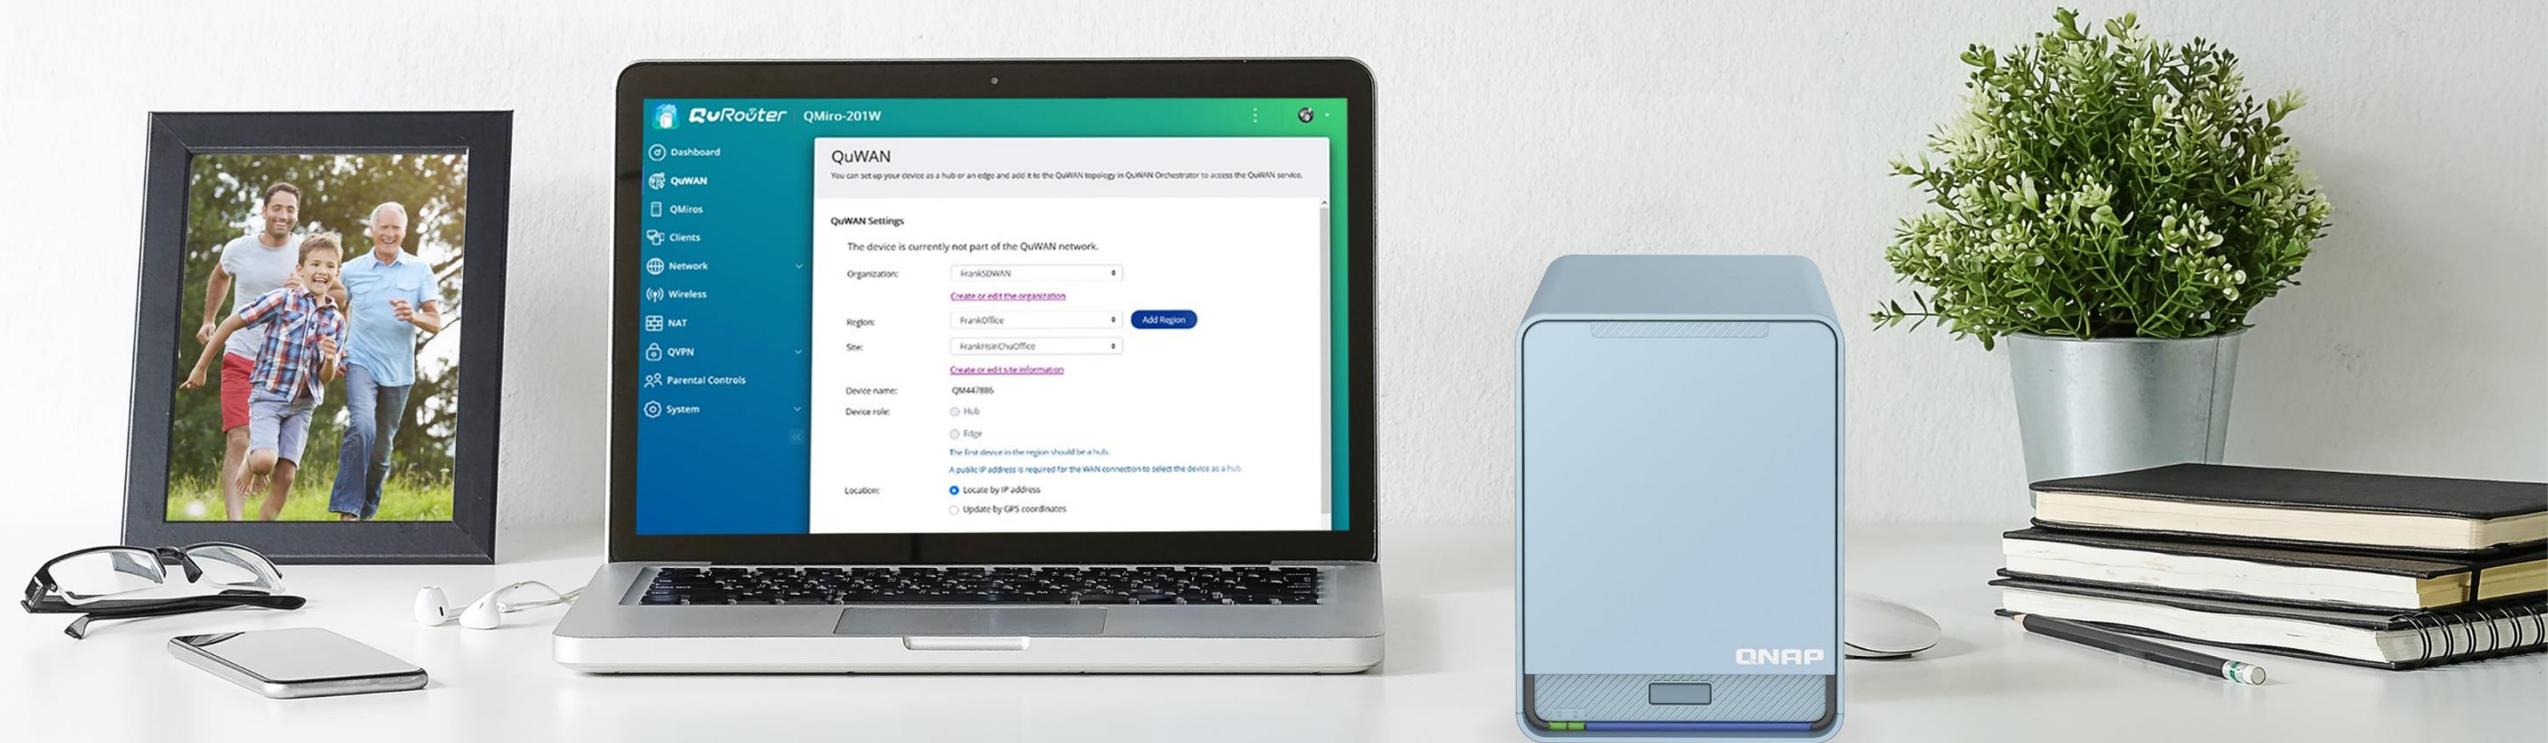

- Where and how can we access the cloud service?
- Can we put all services in a single device?
- Too much devices at home, can we simplify them?
- Why bother when you just want connect back to office to get a file?
- Why don't you have a Wi-Fi signal at my room?
- Why the device is so hard to use?

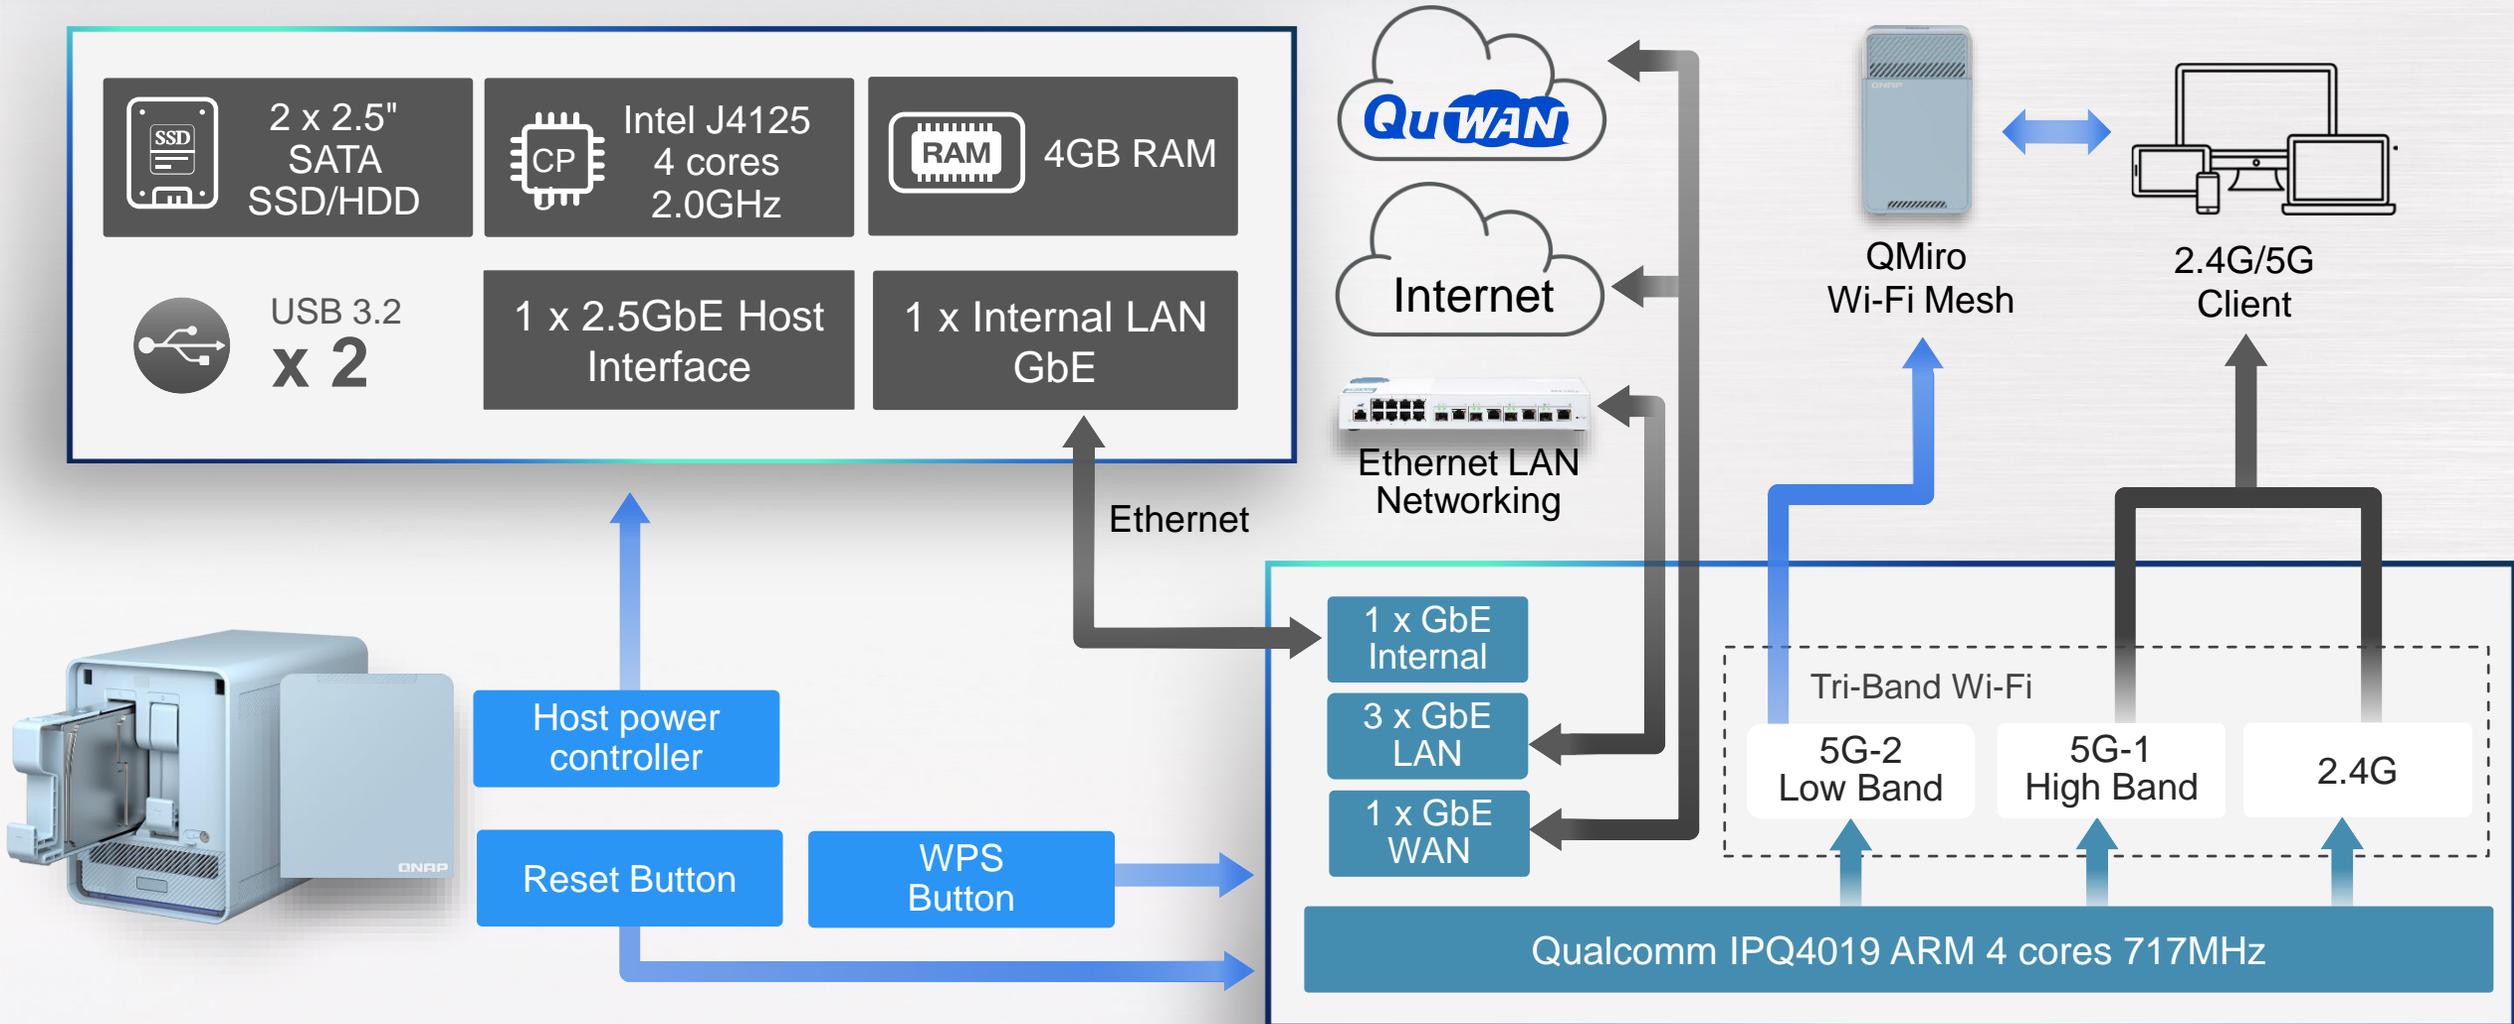

QMiroPlus-201W

Tri-band Wi-Fi Mesh AC2200 2.5GbE NAS and SD-WAN router

- 1 Based on QTS smart home management storage system
- 2 Co-work with QMiro-201W to build Wi-Fi Mesh extending your Wi-Fi coverage
- 3 QuWAN can easily connected company network with home network through SD-WAN, let's you easily work at home.
- 4 QuRouter APP makes device managed easily

QMiroPlus-201W is a dual systems which integrated x86 and ARM CPU together

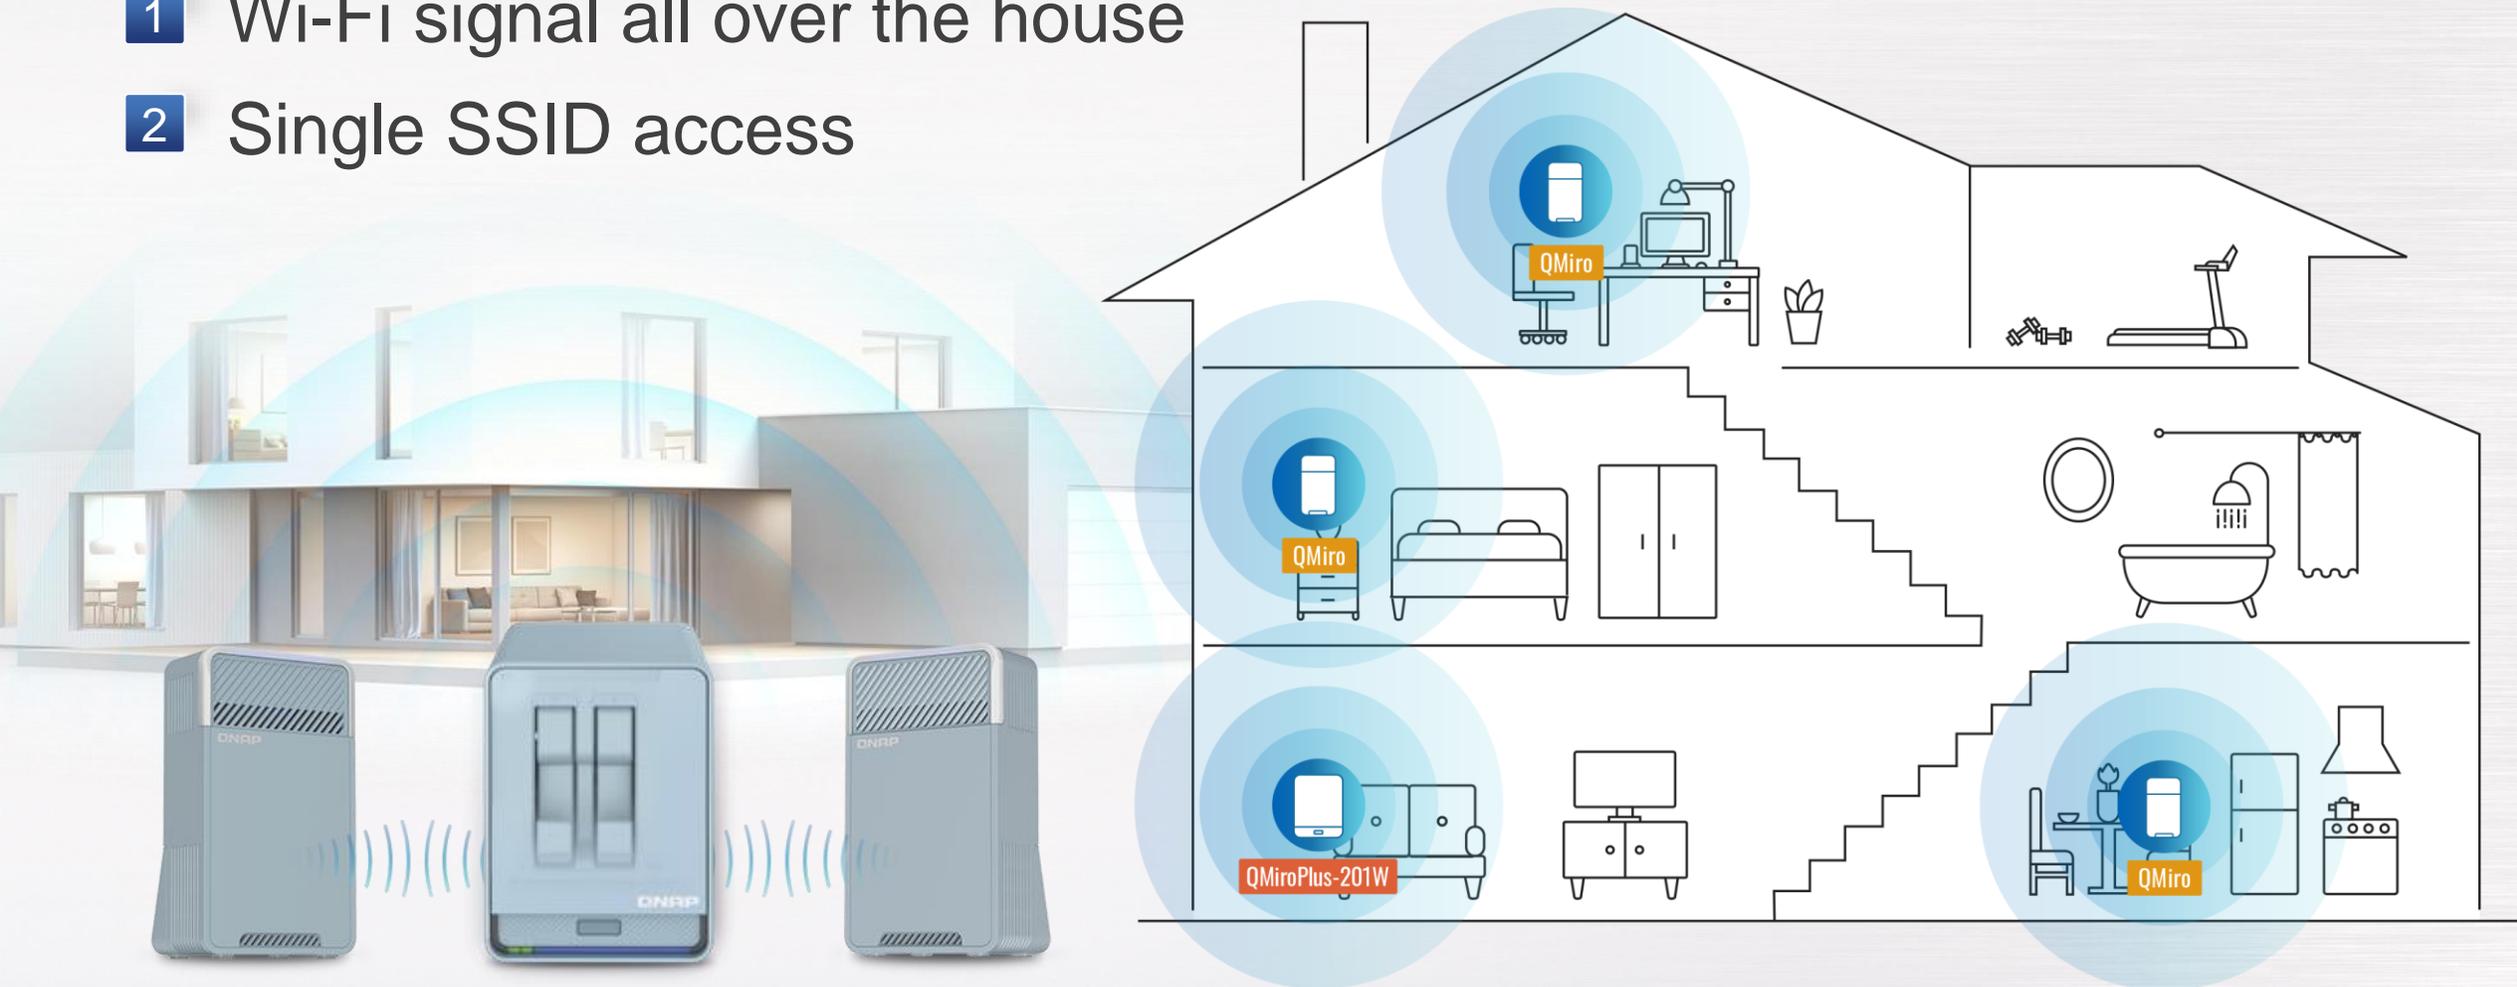

QMiro-201W

QMiroPlus-201W

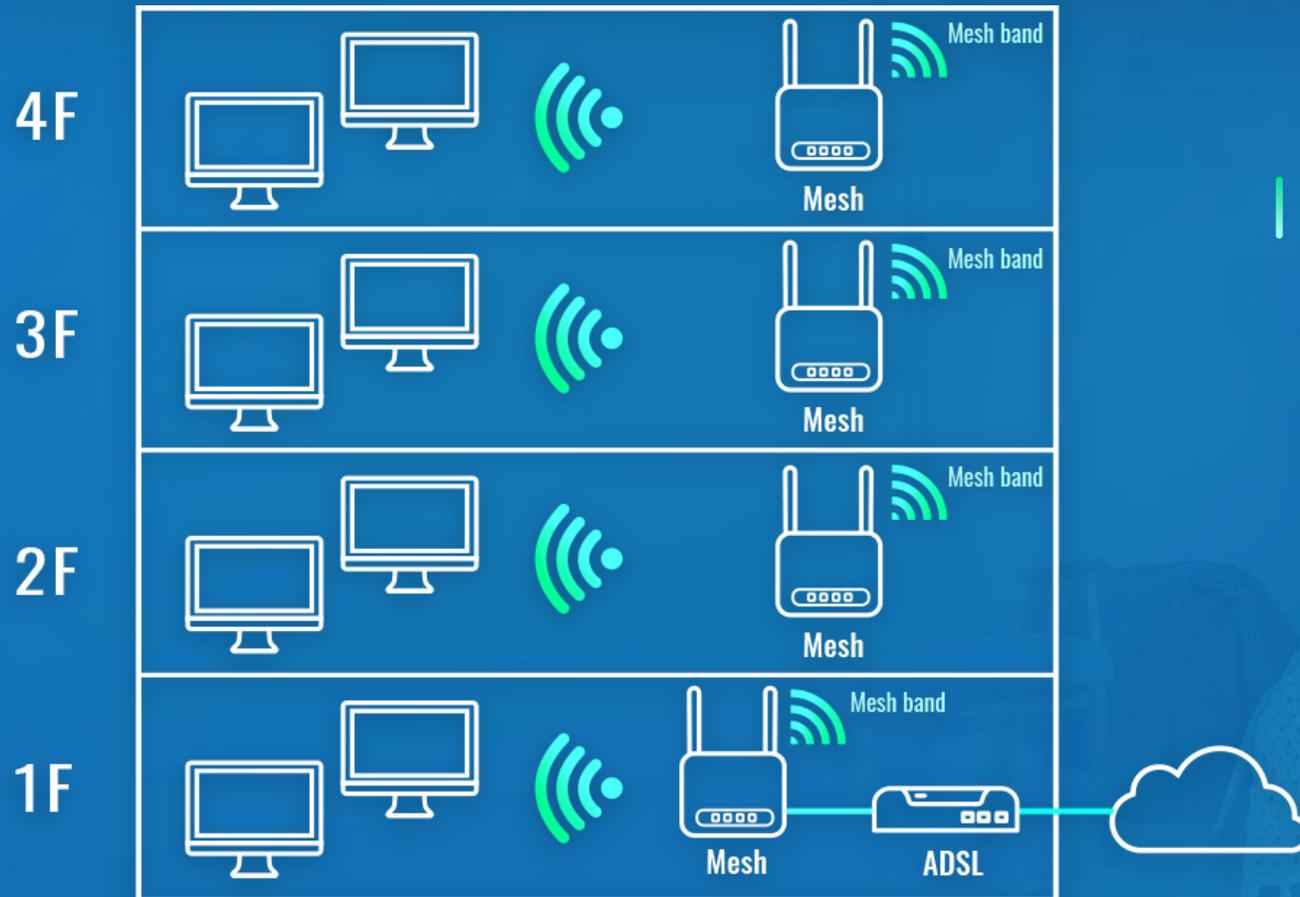

What are the expectations for a smart home wireless storage network?

Sufficient Wi-Fi coverage

- 1 Wi-Fi signal all over the house
- 2 Single SSID access

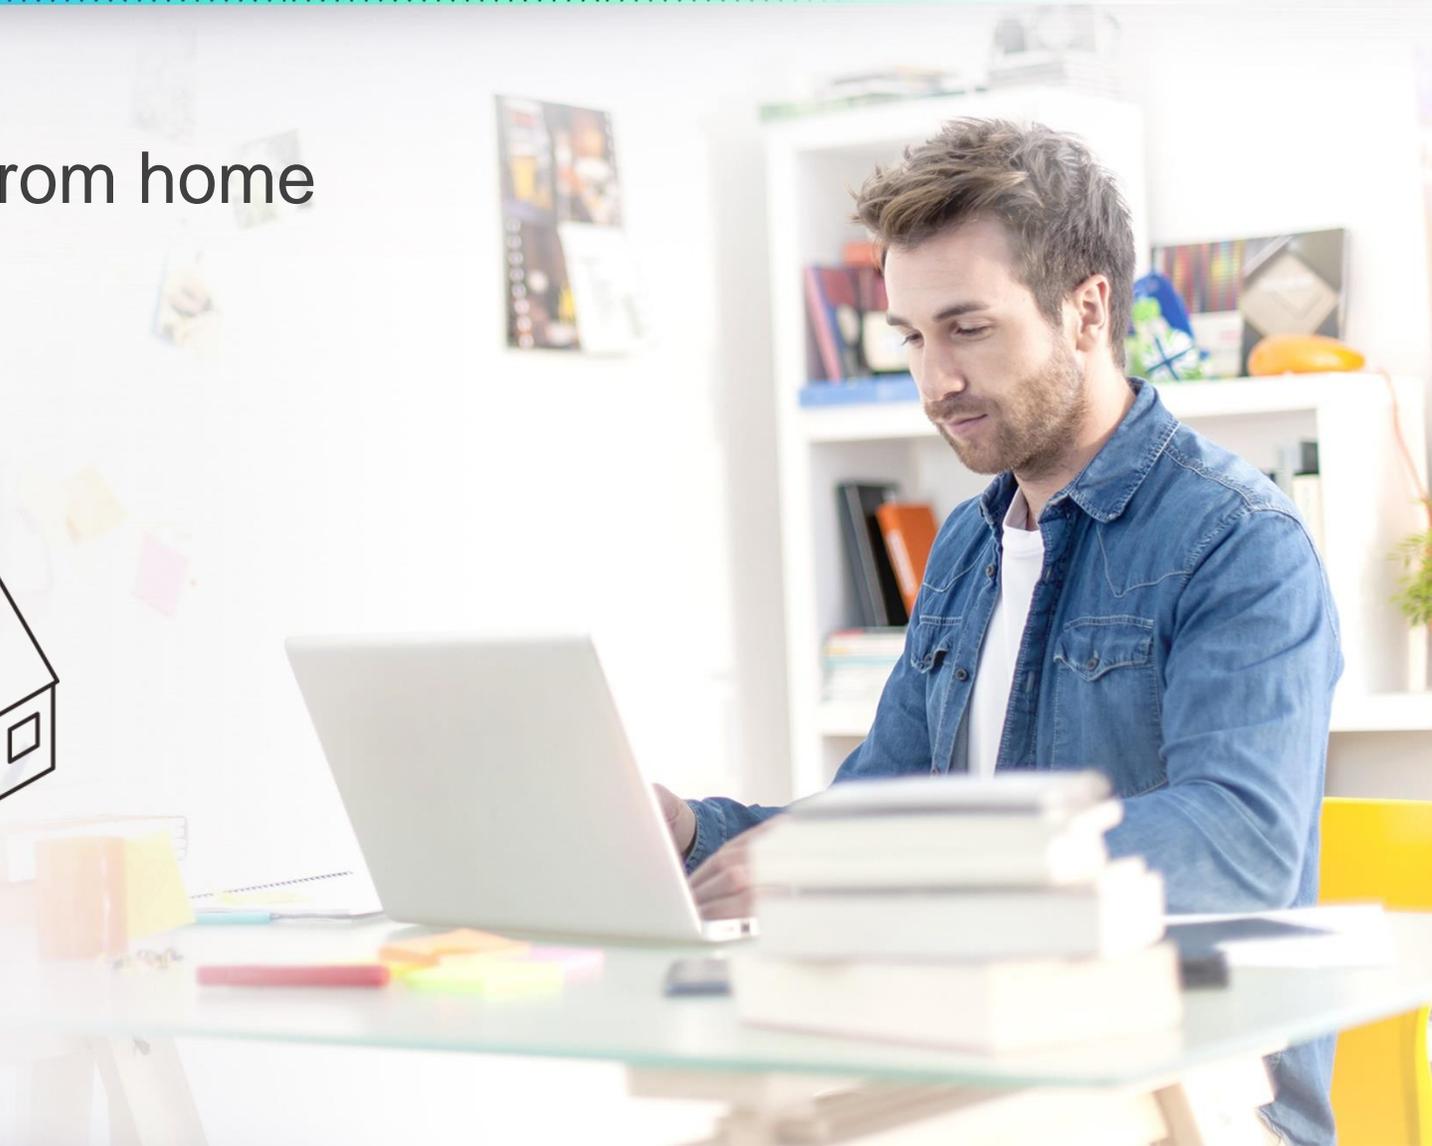

Mesh is the way to go

| Independent inter-AP communication channel

Work from home capabilities

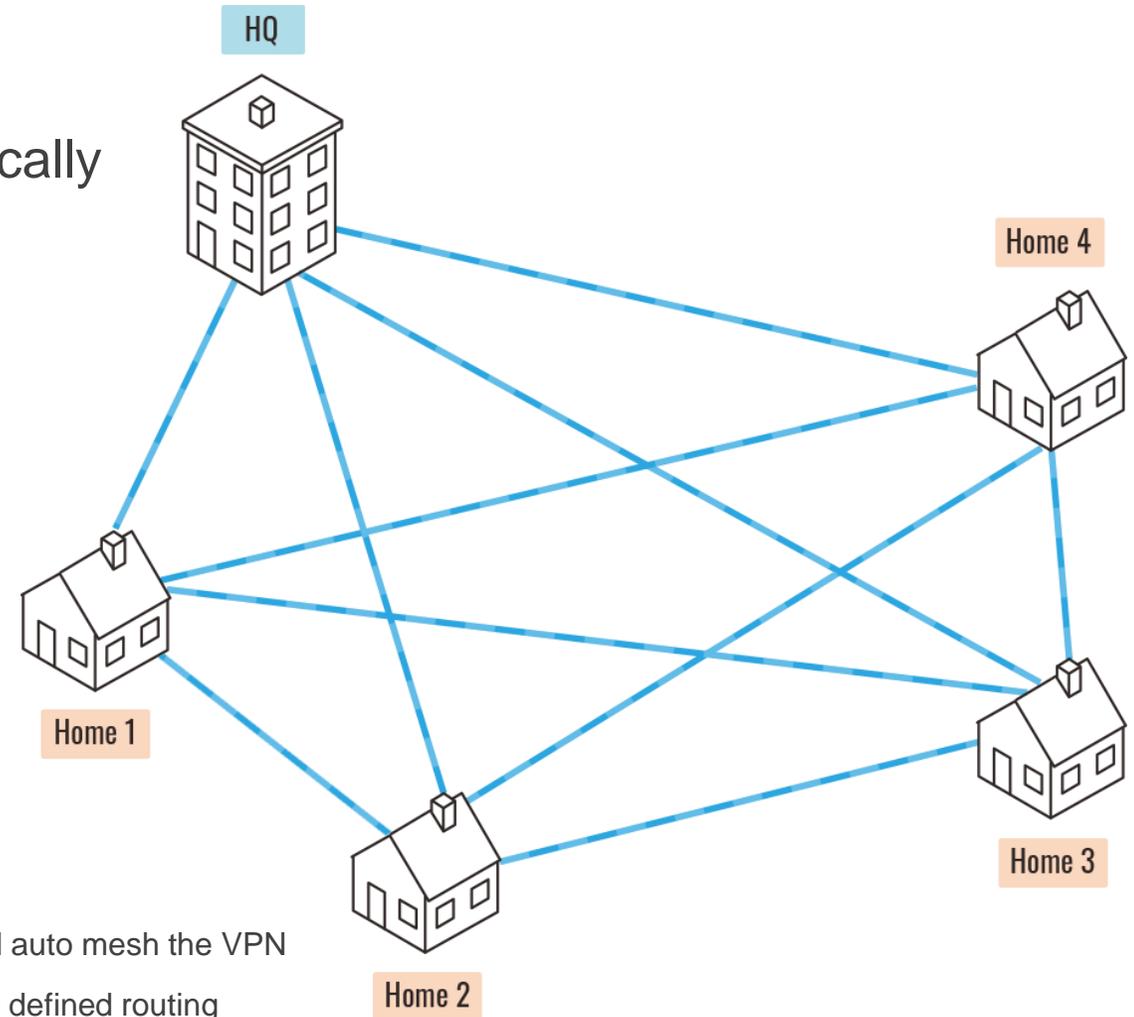

- 1 Connect to office network from home
- 2 Good transfer efficiency

Easy setup and managed VPN - QuWAN(SD-WAN)

- 1 Centralized managed and setup
- 2 Connected all the sides automatically
- 3 Always keeps in the best route

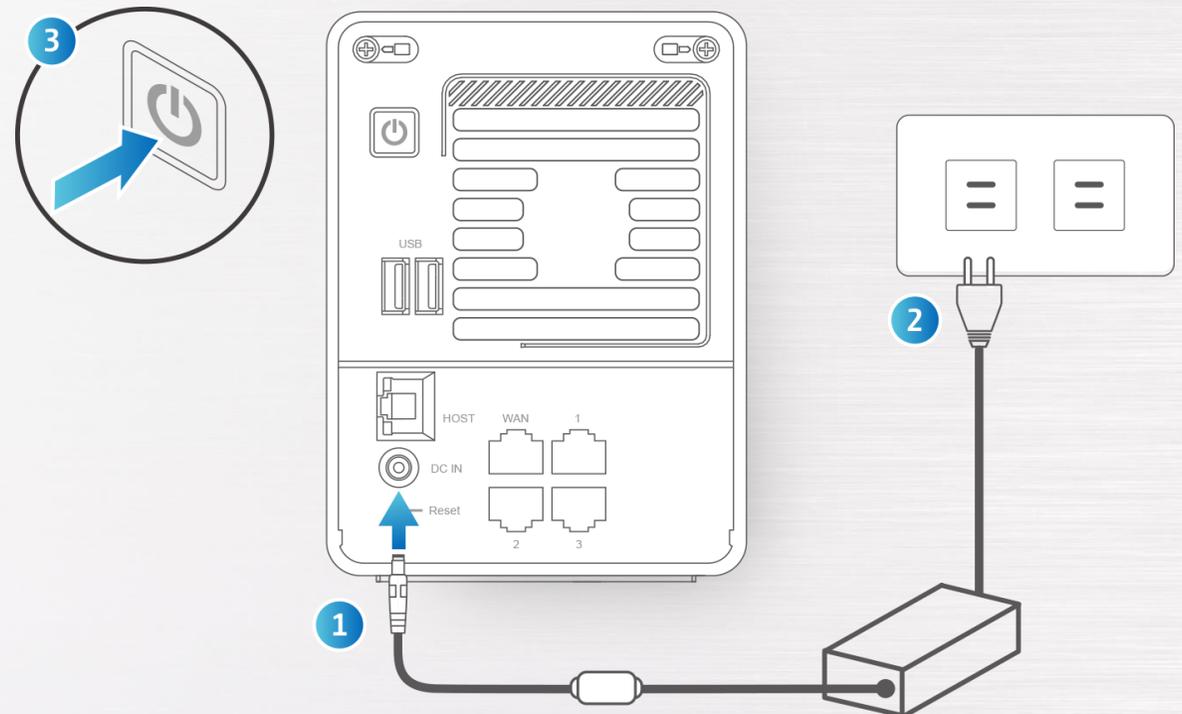

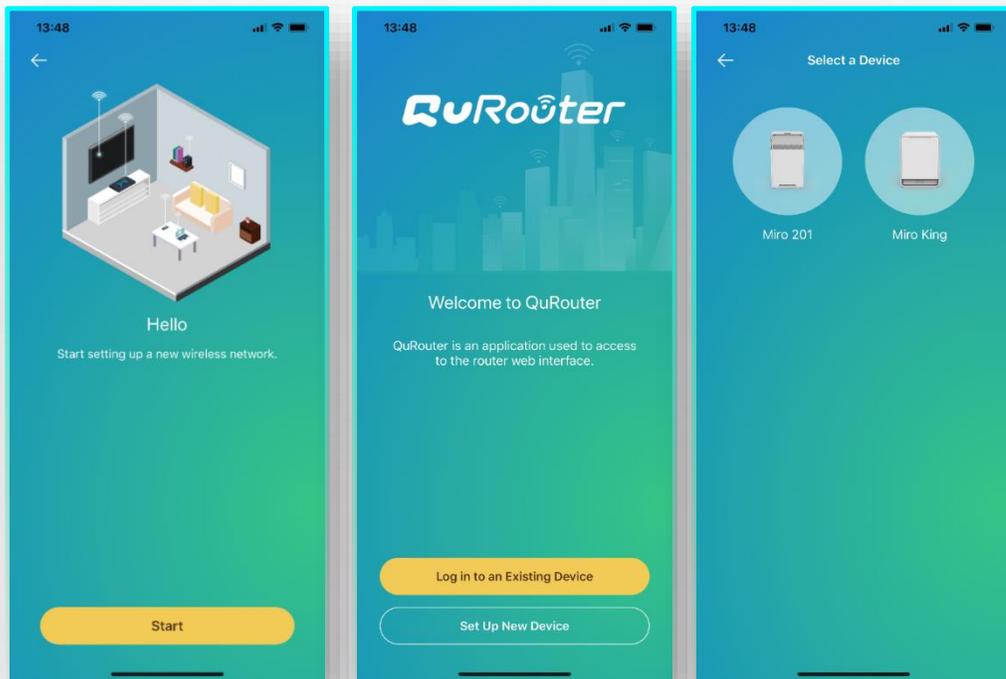

* SD-WAN auto mesh the VPN

* Software defined routing

QuRouter APP makes setup/managed easily

- 1 Android/iOS APP QuRouter setup networking through bluetooth/wireless, and managed QuRouter
- 2 Graphical interface and only need login by using QNAP ID to QuRouter APP for configuration

QMiroPlus-201W

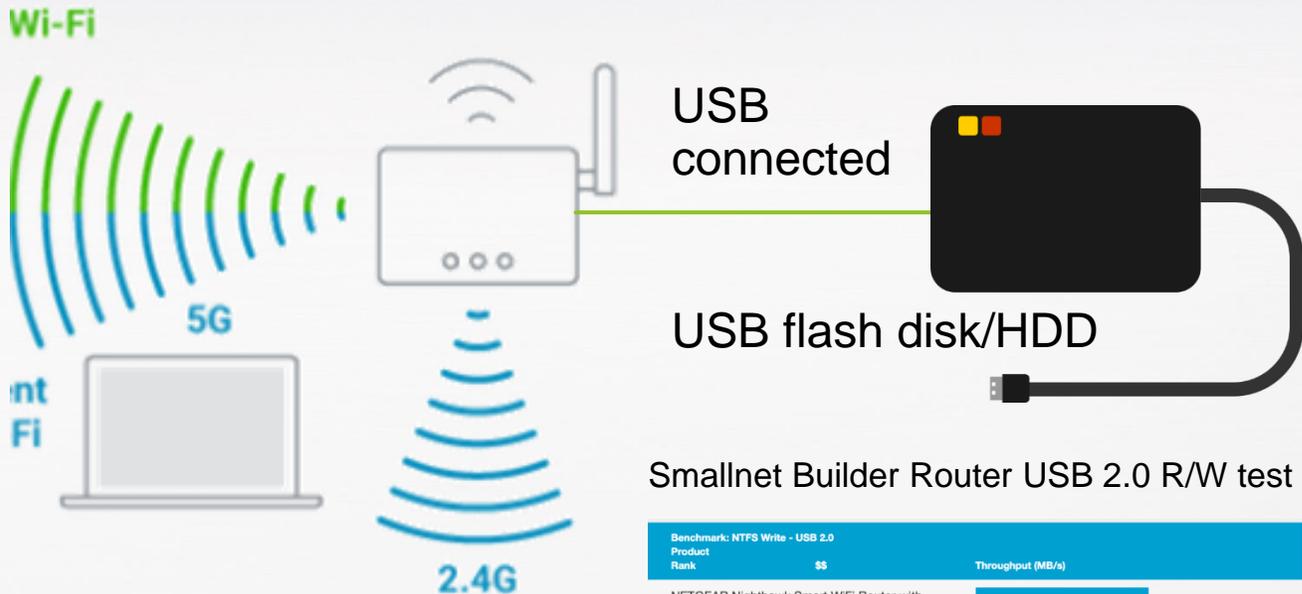

born for home

QMiroPlus-201W

QMiro-201W

It is less functions and slow R/W speed for sharing the USB flash disk through Wi-Fi router

Smallnet Builder Router USB 2.0 R/W test

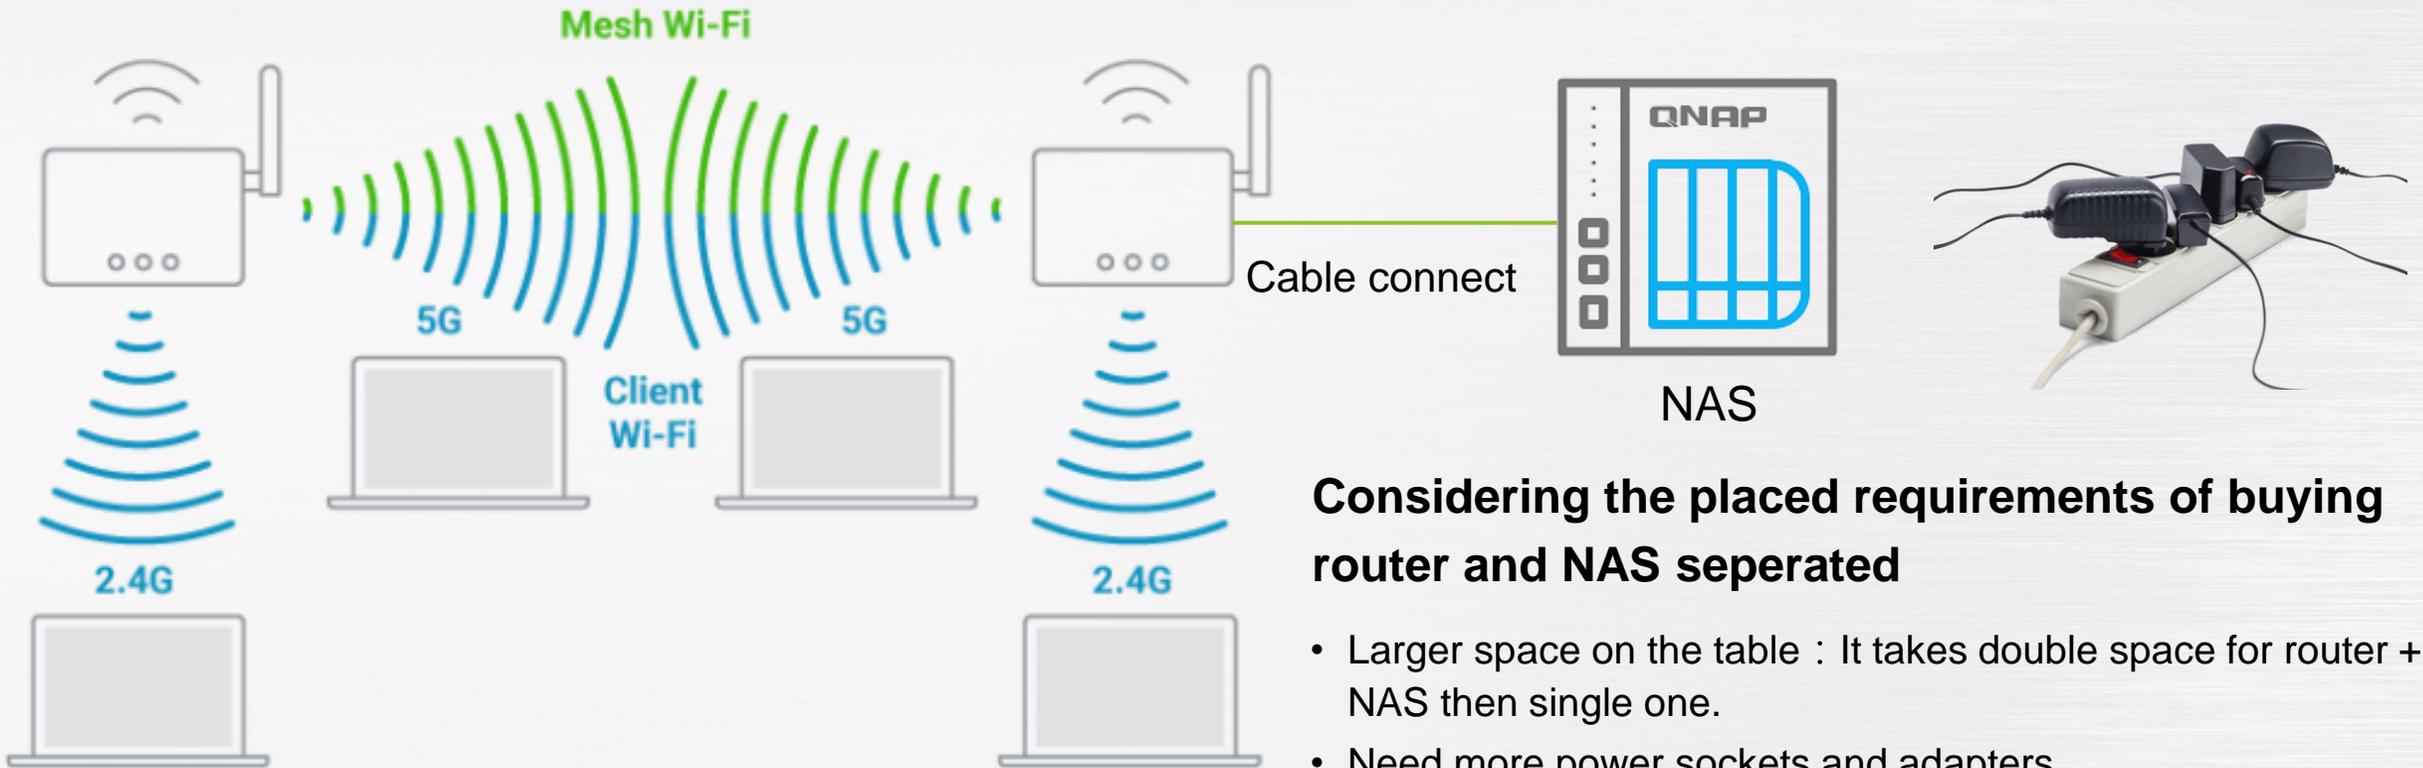

Product Rank	\$\$	Throughput (MB/s)
<input type="checkbox"/> NETGEAR Nighthawk Smart WiFi Router with MU-MIMO (R7000P) WiFi5:#11	\$90	20.3
<input type="checkbox"/> NETGEAR Nighthawk AC1900 Smart WiFi Router (R7000) WiFi5:#12	\$72	22.9
<input type="checkbox"/> NETGEAR Nighthawk X6 Tri-Band WiFi Router (R8000) WiFi5:#13	\$135	27.2
<input type="checkbox"/> D-Link AC2600 MU-MIMO Wi-Fi Router (DIR-882) WiFi5:#7	\$40	27.8
<input type="checkbox"/> ASUS Dual Band AC2900 Wireless Router (RT-AC86U) WiFi5:#5	\$115	36.8
<input type="checkbox"/> NETGEAR Nighthawk X6S Tri-Band WiFi Router with MU-MIMO (R8000P) WiFi5:#9	\$115	37.8

Throughput (MB/s)

Disadvantages of share files on the USB flash disk/HDD through Wi-Fi router

- Most of devices had only FTP or SMB for file sharing.
- Hard for managing with multiple files stored in different storages.
- Throughput is worse with USB
 - Without USB port for entry level devices
 - Only provide USB 2.0 port (20~37.8MB/s) for middle level and throughput is bad.
 - Up to USB 3.0 for high end devices , but usually it only based on ARM with dual/four cores of CPU, with clock rate 700MHz ~ 1.4GHz or lower , can handle routing and data transferring at the same time well.

It needs more space to put a Wi-Fi router + NAS and organized cables at home, also much expensive.

Considering the placed requirements of buying router and NAS seperated

- Larger space on the table : It takes double space for router + NAS then single one.
- Need more power sockets and adapters.
- Extended cables for physical conneted to router and NAS.
- Do you really need high level but expensive Wi-Fi router at this moment?
- Further NAS but only used 1/10 functions.

QMiroPlus-201W HW spec

Tri-Band Wi-Fi Mesh AC2200 2.5GbE NAS and SD-WAN Router

CPU	Router (QuRouter): Qualcomm IPQ4019 ARM 4cores 717MHz NAS (QTS): Intel Celeron J4125 4C 2.0GHz, up to 2.7GHz
Memory	Router: 512MB DDR3 onboard NAS: 4GB DDR4 onboard
Flash memory	Router: 4MB SPI NOR Flash, 4GB eMMC NAS: 4GB
USB port	Router: -- NAS: 2 x USB 3.2 Gen1 5Gb/s Type-A
Ethernet port	Router: 3 x LAN GbE RJ45 ports 1 x WAN GbE RJ45 port NAS: 1 x 2.5GbE RJ45 port
SSD/HDD slot	Router: -- NAS: 2 x 2.5" SATA 3Gbps SSD/ HDD(compatible with 6Gb/s SSD/HDD)

Tri-Band Wi-Fi Mesh AC2200 2.5GbE NAS and SD-WAN Router

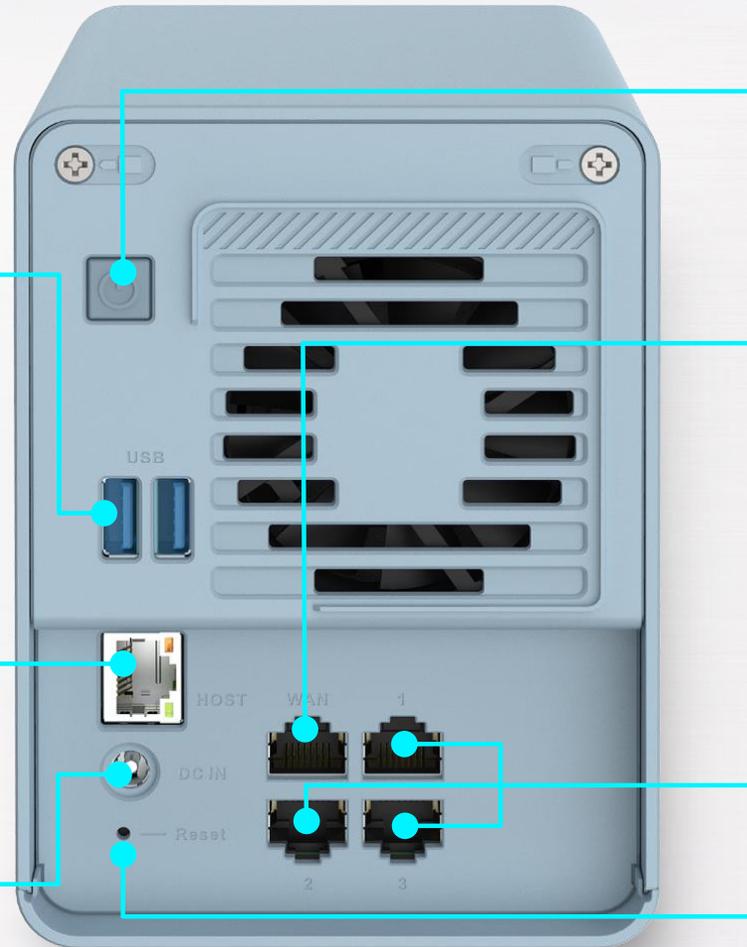

Button	Router: WPS, Reset(share with NAS) NAS: Power button, Reset(share with router)
LED	Router: QuRouter status LED NAS: hard disk1 & hard disk2 status LED
Wireless antenna	2 x internal dual band(2.4GHz/5GHz) antenna 2 x internal single band(5GHz) antenna
Wireless Standard	802.11a/b/g/n/ac
Wireless Speed Rating	Wi-Fi 5 AC2200 2.4GHz (400Mbps)+ 5GHz (867Mbps x 2)
Wireless bandwidth	20/40/80MHz
Bluetooth	Version 5

QMiroPlus-201W HW panel - front

QMiroPlus-201W HW panel - back

NAS only:
2 x USB 3.2 Gen1
(USB 3.0)Type-A

NAS only:
2.5GbE/1GbE RJ45
(internal storage access only)

DC 12V
power input

NAS power button

Notice: Router will boot up directly after plug in power adapter

Router only:

1 x WAN/Internet 1GbE RJ45 port

Router only:

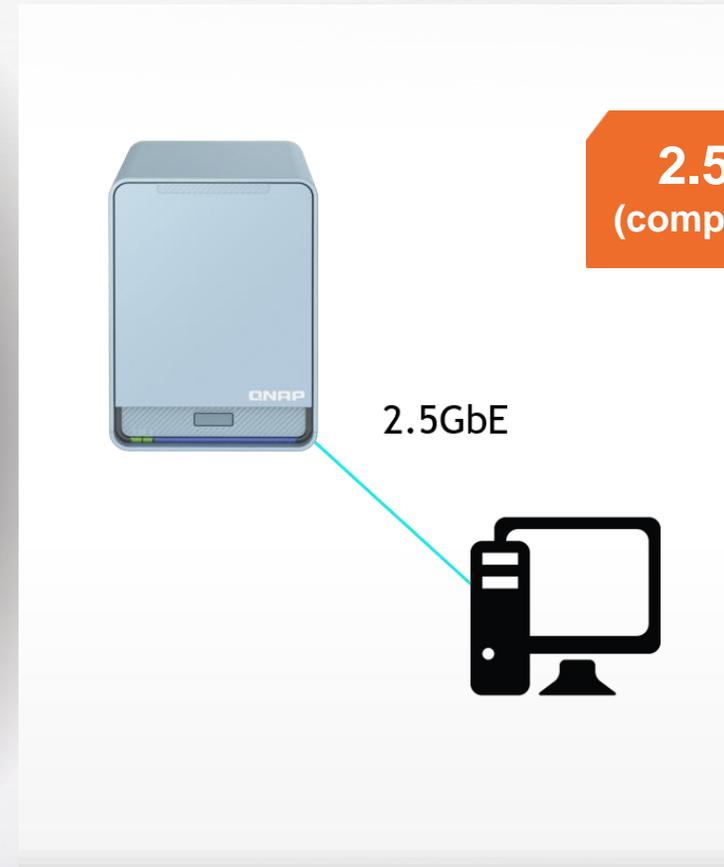

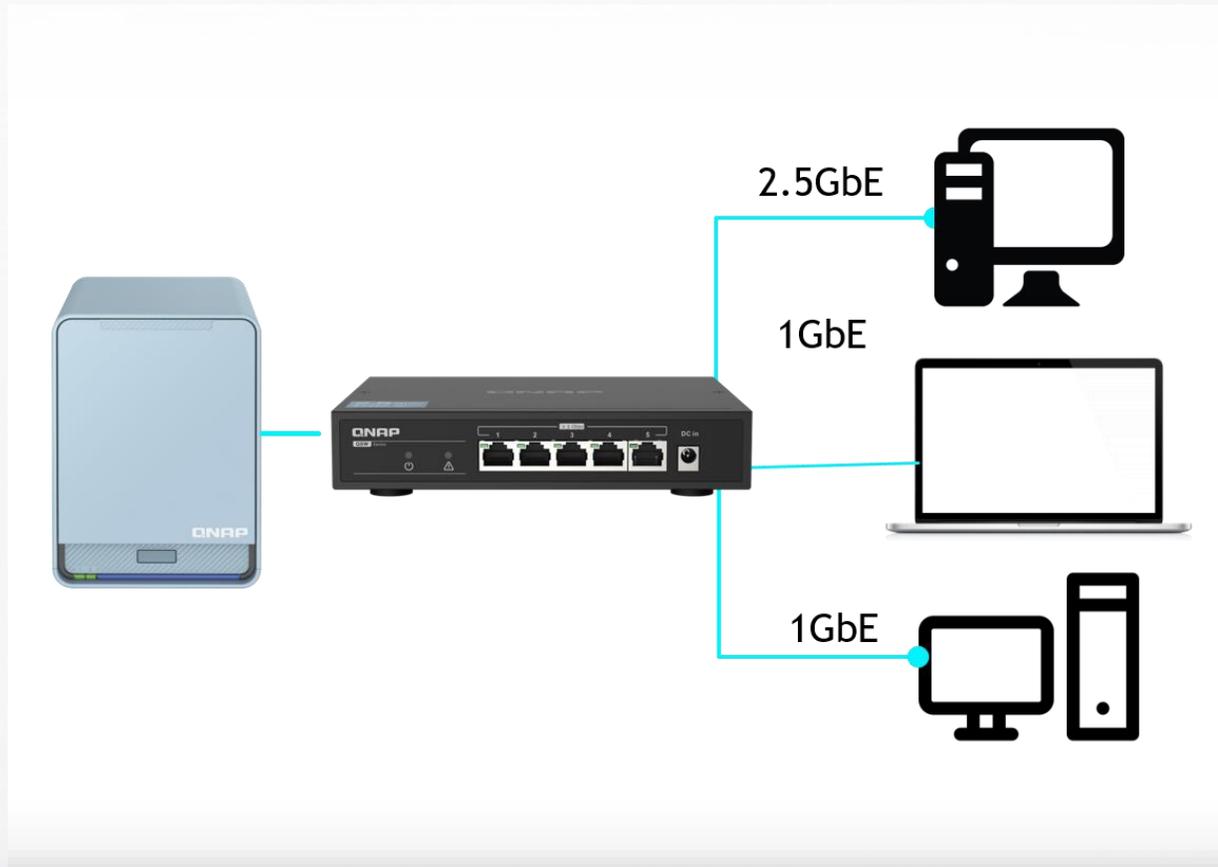

3 x LAN 1GbE RJ45 ports

Reset

Notice: It can only reset NAS password when NAS booted up

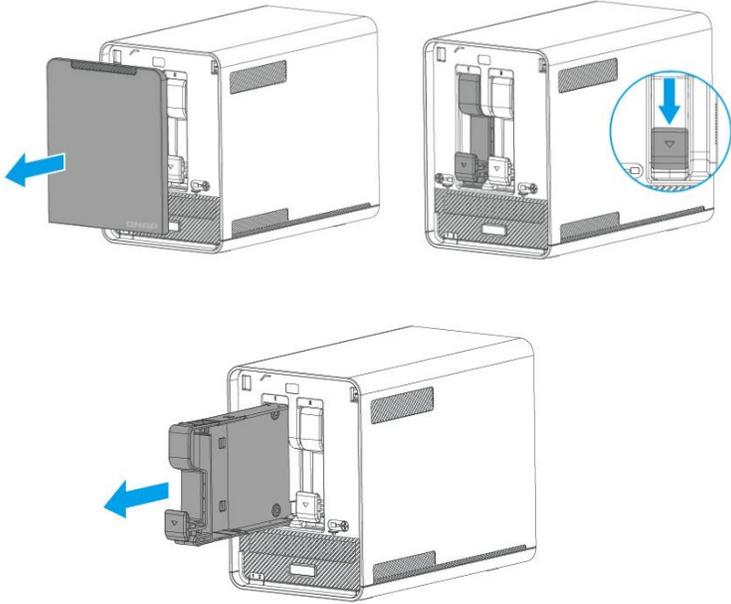

Through QNAP 2.5GbE network equipments building up high speed intranet

- Co-work with QNAP QSW-1105-5T 2.5GbE switch to have high speed intranet access
- Connected to a PC directly to enjoy high speed NAS access

Can install up to two 4TB 2.5" SATA SSD with 8TB (RAID 0) or 4TB (RAID 1) larger storage space, high speed and quietly!

QuRouter is ready and NAS boots up successfully	Blue	Blinking 2s
QuRouter finished pairing and NAS boots up successfully	Blue	Static
No Internet/Wi-Fi signal out of range	Red	Static
Weak Wi-Fi Mesh signal (-70 DB)	Orange	Blinking 0.5s
Adding Wi-Fi Mesh satellite	Blue	Blinking 0.5s

User friendly design let user can one click accessing QTS/QuRouter

The image displays the QuRouter web interface for the QMiroPlus-201W model. The main interface features a dark green header with the QuRouter logo and model name. Below the header is a login form with fields for Username and Password, and checkboxes for Remember me and Secure login. A central white dialog box with a blue question mark icon contains the following text: "The QuRouter web interface will redirect you to the QTS login screen. Log in with your QTS account and open the QuRouter application on the desktop to access router functions." Below this text are two buttons: "Go to QTS" (highlighted in blue) and "Stay at QuRouter". A red arrow points from the "Go to QTS" button to the QTS login screen shown in the bottom-left inset. Another red arrow points from the "Stay at QuRouter" button to the QuRouter login form. The QTS login screen shows the QTS logo and the device model NAS44F67C, with fields for Username and Password, and checkboxes for Remember me and Secure login. A "Login" button is located at the bottom of the QTS login screen.

Enable QuWAN to manage QMiroPlus-201W/QMiro-201W through the cloud platform

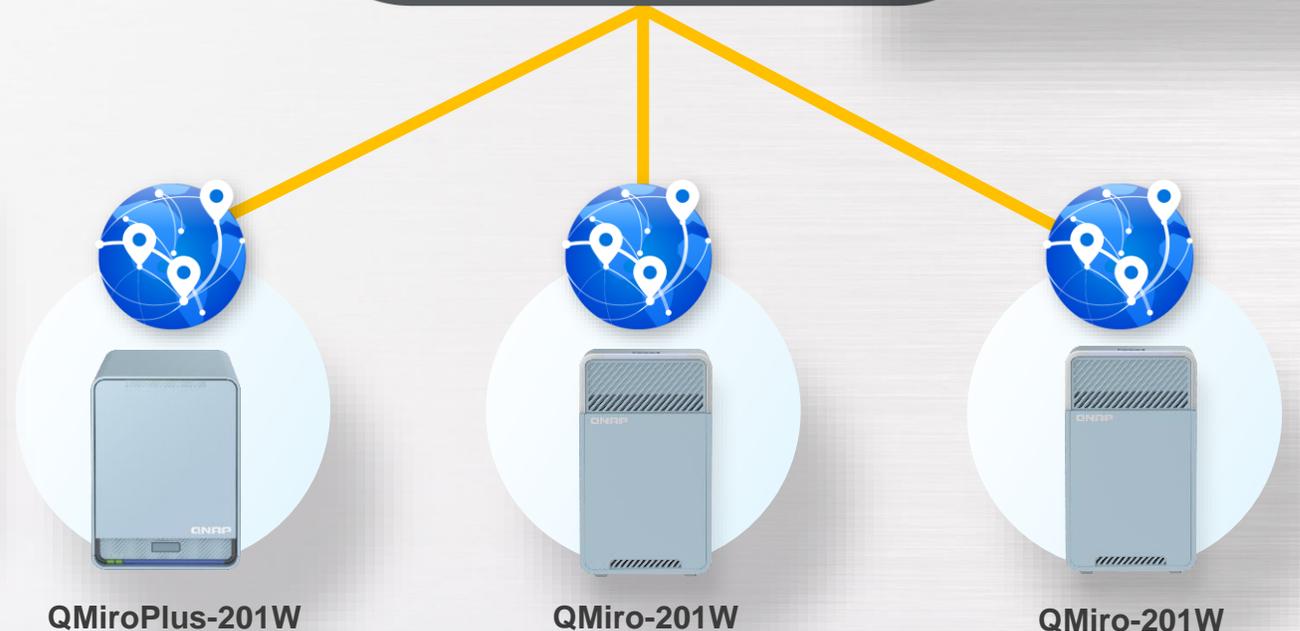

QuWAN Orchestrator

Go to quwan.qnap.com and log in with QID to view the QMiro-201W device, network and VPN connection status, organization-wise topology, connection method. You can also perform remote debugging through the cloud platform

Login by QNAP ID can managed QuWAN cloud portal

Login by QNAP ID can managed QuWAN on the QMiroPlus-201W/QMiro-201W

A central managed platform solves the management issues of multiple devices

1 | Intuitive graphical user interface

2 | Geological location of each device

3 | Overview connection status of all devices

Instant
Notification
IT Admin

4 | Simultaneously execute various parameter settings

5 | Set once and apply to all. Save time to set devices individually.

6 | Remote troubleshooting (e.g., packet capture)

The screenshot displays the QuWAN Orchestrator interface. On the left is a blue sidebar menu with options: 總覽, QuWAN 裝置, QuWAN 拓樸, 警告, 事件記錄, 封包擷取, 通用設定, and 軟體管理. The main content area is titled '總覽' and 'QuWAN 裝置部署'. It features a world map with red circles indicating device locations in Canada (加拿大), Brazil (巴西), Argentina (阿根廷), Philippines (菲律賓), and New Zealand (新西蘭). A topology diagram on the right shows a network of nodes and connections. Below the map is a table titled 'QuWAN 裝置清單' with 52 total devices. The table has columns for Region (區域), Device Name (QuWAN 裝置名稱), Device Role (裝置角色), WAN Status (WAN 狀態), VPN Status (VPN 狀態), and Device Status (QuWAN 裝置狀態).

區域	QuWAN 裝置名稱	裝置角色	WAN 狀態	VPN 狀態	QuWAN 裝置狀態

Auto backup/sync files through Qsync 5.0

- **One way synchronized**

One way from device to NAS: data synchronize
One way from NAS to device: data deployed

- **Dual way synchronized**

Standard dual way synchronization, make sure the files in both sides are synchronized.

- **Filtering**

To chose the file type which don't like to synchronize

- **Smart Delete**

Setup synchronized without removing files on the NAS, also make a copy for backup on the NAS avoiding delet them accidentally.

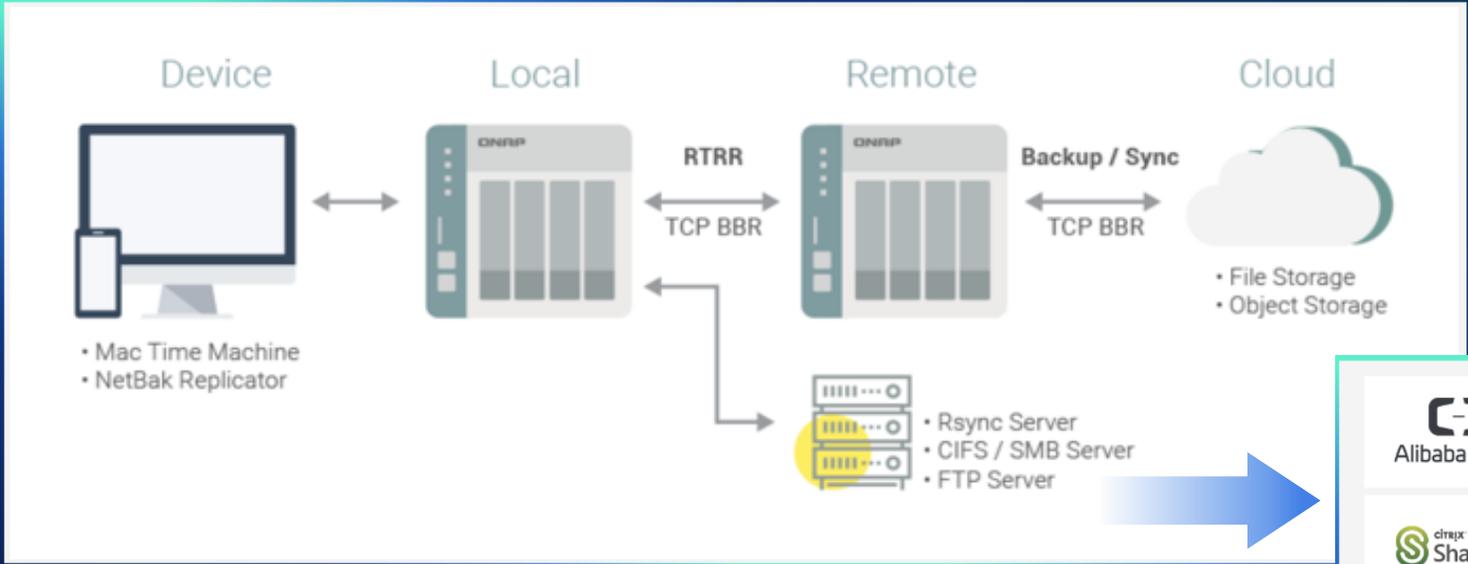

- **Space-Saving Mode¹**

Space-Saving Mode allows you to view files without downloading them to your device. You can download files only when you need to open and edit them.

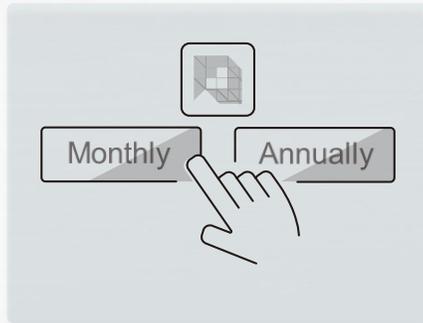

¹ Only support on Qsync Client 5.0.0 or latest • Windows supported in Windows 10 (1909) or latest.

HBS 3 your backup/sync center

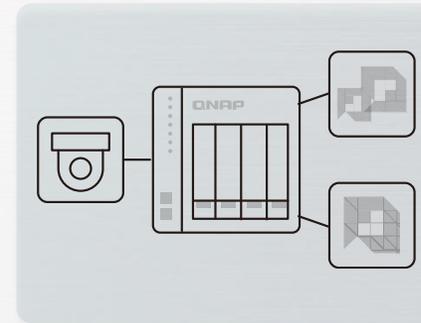

Integrad data backup/recovery/synchronized into single QTS application, let you easiy backup/synchronized files to another QNAP NAS, remote server, extend flash disk or cloud space.

Brand new surveillance service - QVR Elite

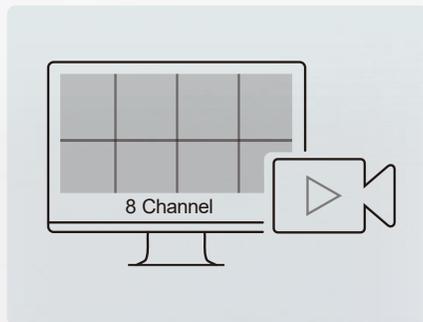

Optional Subscription-Based

Choose how many channels you like to purchase, subscribed and use it.

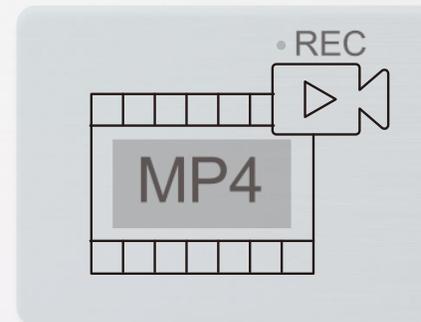

Performance improvement

Use QVR Pro Client as same as QVR Pro, including dynamic frame, live view and replay, alert review of E-map.

More channels

Can up to 8 channels

Standard MP4 file type

Based on MP4 file format, can easily play on different players.
