# TVS-675

QTS and QuTS hero dual O.S.: ZhaoXin KaiXian 8-core 2.5GHz  
NAS with 2.5GbE、GPU、HDMI、M.2 NVMe/SATA SSD slots  
and dual PCIe slots for network/storage expansion

x86

QTS / QuTS <sup>hero</sup>

# TVS-675 the 8-core SMB NAS with 4K graphics

**QTS / QuTS<sup>hero</sup>**

## Dual Operation Systems

Pre-installed QTS, optional enterprise ZFS QuTS hero

## Zhaoxin Kaixian U6580 8C / 8T 2.5GHz SoC

8-core/8-thread x86 processor, built in graphic processor

## 2 x M.2 PCIe NVMe/SATA SSD slots

Dual M.2 2280 NVMe/SATA SSD to boost performance

## 2 x 2.5GbE RJ45 (1Gb/100Mb ethernet support)

Dual 2.5GbE LAN ports w/ link aggregation

## 2 x PCIe 3.0 x4 Slots

Dual PCIe 3.0 x4 slots for network, storage, or M.2 SSD expansion

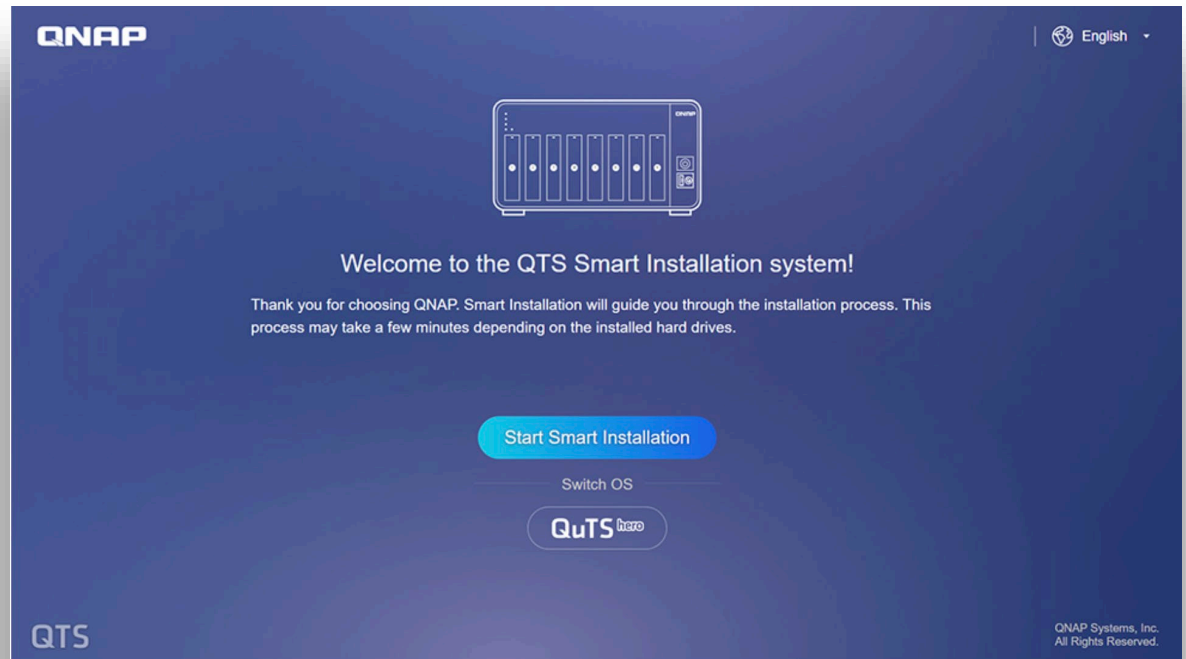

TVS-675

# QTS / QuTS hero dual operating systems for powerful and secure NAS applications services

The QTS operating system is preloaded by default. Businesses can switch to ZFS-based QuTS hero operating system with greater reliability based on the needs of different applications at any time.

## Attention :

1. Since QTS and QuTS hero use different file systems, users must not insert the old hard disks between different operating systems to avoid data loss.
2. When using QuTS hero, we recommend to use SSD as your system drives to gain better performance.
  - a. Hot swap drives by installing 2.5" SATA SSD in two 3.5" drive bays
  - b. M.2 NVMe SSD slots on motherboard do not support hot-swapping

# TVS-675 NAS with 8-core 2.5GHz CPU, 8MB L2 cache, GPU with 4K transcoding and video output via HDMI 2.0

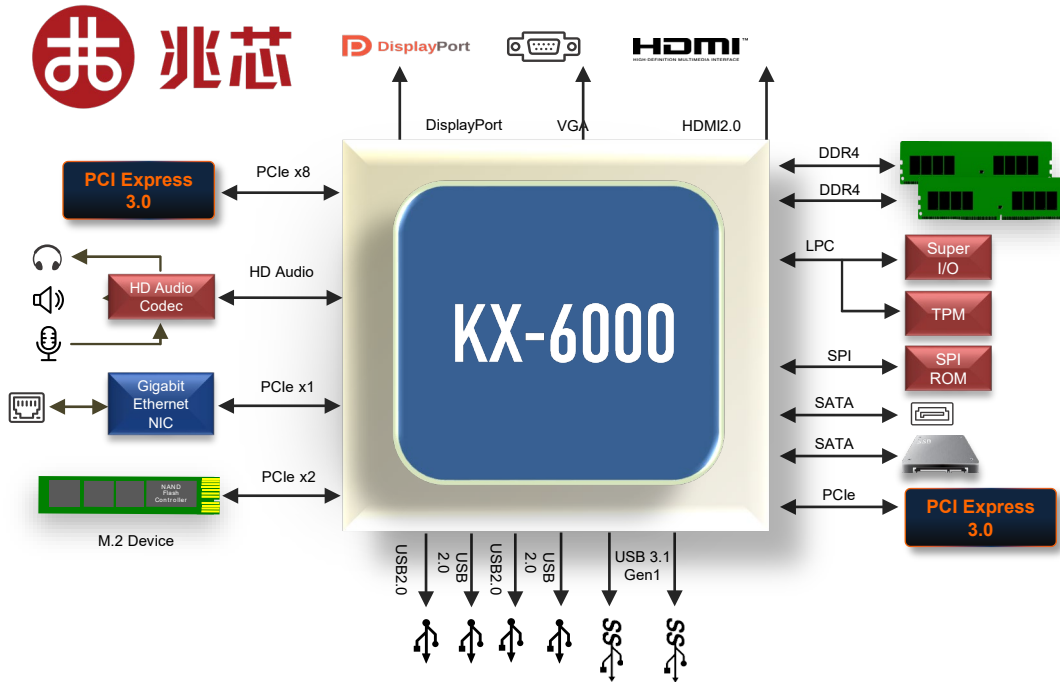

TVS-675

Made in Taiwan

# Advanced 8-core 2.5GHz SoC with integrated 4K video graphics and multiple I/O lanes

- The Zhaoxin 8C/8T KX-U6580 has lower latency while running multi-task application.
- Multi-core graphic processing unit to provide 4K video transcoding and HDMI output with HDMI 2.0.
- 8-core CPU suited for multiple virtual machines (VM) with the VT-x and IO virtualization support

“made using (Taiwan) TSMC’s 16 nm technology” - AnandTech

3.5-inch  
HDDs

## 2.5-inch SSD / HDD

# TVS-675 Rear view

# TVS-675 Side view for RAM and M.2 SSD upgrades

# 2 x M.2 NVMe PCIe / SATA SSD slots supporting SSD cache or Qtier auto tiering

## 2 M.2 2280 NVMe PCIe Gen3 /SATA NVMe SSD for SSD cache or Qtier auto tiering performance enhancement.

- **Improve random data access speeds with an SSD cache**  
SSD caches accelerate IOPS performance and reduce latency for storage volumes. They are perfect for IOPS-demanding applications (including databases and virtualization) and can significantly improve overall workflows.
- **Maximize the value of SSDs with Qtier Technology**  
Qtier™ Technology empowers the NAS with auto tiering that helps continuously optimize storage efficiency by automatically moving data between M.2 SSDs, 2.5-inch SSDs, and high-capacity HDDs based on the data's access frequency. Qtier™ 2.0 features IO-awareness that empowers SSD-tiered storage with a cache-like reserved space to handle burst I/O in real time, greatly maximizing the advantages of SSDs.

Note: Qtier is only supported in the QTS OS, not in the QuTS hero OS.

### 1. Remove screws and cover

### 2. Install M.2 SSD

### 3. Tool-less M.2 SSD installation

# M.2 NVMe/SATA SSD and Qtier auto-tiering for speed and capacity

## Qtier engine

- Automatically moves data between different tiers
- SSD tier capacity is not limited by RAM size

01

**Before tiering**  
Frequently accessed data is not optimized.

02

**Start tiering**

03

**After tiering**  
Data is optimized

04

**Changes in data access pattern**

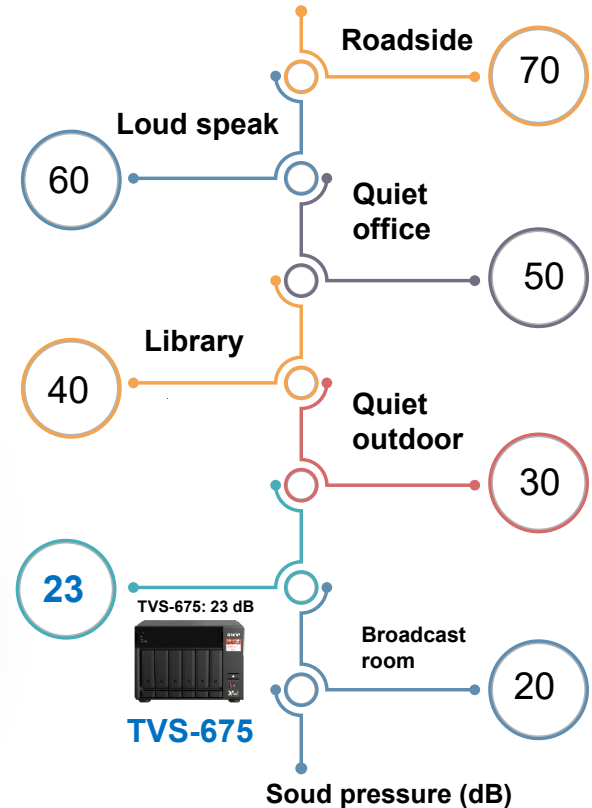

# Compartmentalized smart cooling

Enhanced design over the previous generation to separately detects the CPU and hard drive temperatures for dynamically adjusting separate fan speeds for an quieter operations in the office.

Noise Test : Sound pressure is measured at the front bystander position with low fan speed.

# Large 8GB DDR4 memory, ready for any app, and upgradeable to max 64GB RAM

**NAS Model Number:**

## **TVS-675-8G**

8 GB RAM (1 x 8 GB)

- 2 x DDR4 SO-DIMM RAM slots for a max of 64 GB (2 x 32 GB), dual-channel support
- QNAP 8/16/32 GB RAM modules for easy upgrade and better multi-app or multi-user usage.

**1. Remove the cover**

**2. Remove the old RAM (optional)**

**3. Install the new RAM**

# 2 x 2.5 GbE LAN ports supporting link aggregation for maximum 5Gbps combined bandwidth

2.5GbE-supported motherboards, Wi-Fi 6 AP, switches, and LAN cards are now becoming popular

## 2.5GbE benefits

### 2.5X the speed

1GbE to 2.5GbE

Huge leap in performance

### Same cable

Use the same Cat.5e/  
Cat.6 / Cat. 6A  
LAN cables

# Powerful integrated graphics processing unit to support 4K video transcoding and HDMI output

KX-6580 with C-960 graphic chipset, provide high performance transcoding and original 4k video output ability.

**Built in C-960 graphics**

**Support 4K video**

**4k video output**

**Hardware transcoding**

**Support h.264/265  
Hardware transcoding**

**HDMI 2.0 port**

# 2 x PCIe slots for network, storage, and more

2 x PCIe Gen3 x4 expansion slots for various QNAP  
PCIe cards for more value-added applications.

2 x PCIe Gen3 x4

**QXG** 10GbE/5GbE/2.5GbE  
Network Interface Card

**QM2** M.2 SSD expansion

### OneDrive

Backup all your files in OneDrive and support SharePoint

# HybridMount - Cascade share the access permission to remote devices

The remote data mounted by SMB/NFS can be shared with other devices with folder permission to achieve a cascade share architecture.

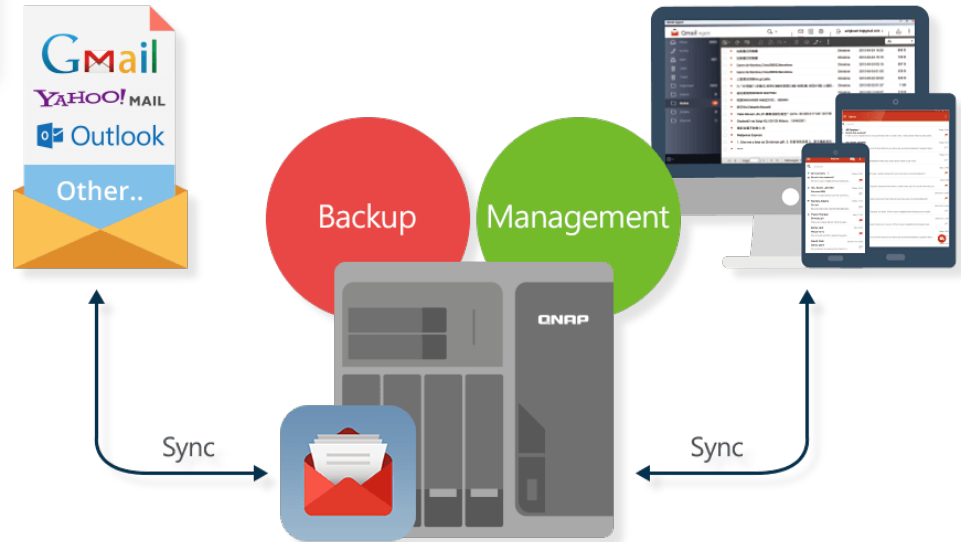

- To avoid local users accessing the remote data by VPN and to reduce the security concern and risk of VPN.
- No longer need to manage user accounts in the remote server. The local admin retains full control over assigning different permissions to local users.

# QmailAgent – email backup solution

## Best Email Retention Solution

- Collectively manage and back up your personal and business emails.
- Easily auto back up all your emails and attachments.
- Quickly search and gain access to specific messages.
- Back up emails for disaster recovery.
- Encryption service protects backed up private emails.

# All-in-one 8-core server with max 64GB RAM to host virtual machines and containers

## Virtualization Station

Supports to run the Virtual machine such as Windows, Linux®, UNIX® and Android.

## Container Station

QNAP's Container Station exclusively integrates LXC and Docker lightweight virtualization technologies, allowing you to download apps from the built-in Docker Hub Registry.

# Establish and run dual systems - Ubuntu & QuTS hero

## Ubuntu Linux Station

- Run QuTS hero and Ubuntu dual system, dual system application to enjoy.
- One-click installation of multiple versions Ubuntu: 16.04 / 18.04 / 20.04
- Ubuntu Software Center enjoy a variety of application downloads
- Remotely access the Ubuntu Linux desktop through a browser /
- Install a PCIe graphic card to add an HDMI output screen, and use a USB keyboard and mouse with it.

# QuLog Center proactively analyze and monitor connections

## ● Proactive analysis

- List the top 5 Applications for Error/Warning Logs
- System access statistics such as connection types and logged in IP

## ● Quick filtering

- Categorize by APP name or date
- Customize labels/styles/flags for advanced search

## ● Real-time monitoring

- View the online members and their connection types

## ● Unified management

- Consolidate detailed local and remote NAS record files
- Set the size of the space for the record
- Send NAS log files to a standard Syslog server
- Notify specified notifications by Notification Center

# Brand new surveillance app QVR Elite

## Channel License Type Unlimited

QVR Elite is subscription-based, with monthly, yearly, and 3-year subscription plans. You can build a robust surveillance system with a low-cost monthly price of US \$1.99 per channel. You can alter the subscription based on your needs to reach higher cost efficiency.

## Performance Evaluation

At initial version, max recording channel is 128 channels, the next version we will increase it to 192 channels.

## QVR Pro Client

- Supported by the QVR Pro Client same as QVR Pro's client
- Same features include Dynamic View Layout, Live and Playback at the same time, and e-map event display

## Standard MP4 file

- Supported by both QuTS hero and QTS
- Record standard MP4 format, allowing for smooth playback on all devices
