

8 ports 2.5GbE Unmanaged Switch

QSW-1108-8T

Instantly upgrade to 2.5GbE connectivity with existing cables at an affordable price

Improve your productivity with 2.5GbE connectivity

With eight 2.5GbE ports, the QSW-1108-8T supports up to eight 2.5G / 1G / 100M devices and supports 2.5GbE devices using existing Cat 5e cables.

Plug & play. Auto-negotiation for optimal speed of connection

No complex settings are required! The QSW-1108-8T supports auto-negotiation that optimizes the transfer speeds and performance of each connected device.

Automatic loop detection and blocking to ensure continuous network operation

The QSW-1108-8T features network loop detection that automatically locks loops to ensure the network environment quickly resumes normal operations.

Fanless design provides reliable and near-silent operations

The QSW-1108-8T features a fanless design for near-silent operation. The unique ventilated construction assists in cooling while maintaining high performance.
