

TS-253D

Quad-core 2.5GbE 2-bay NAS
for professionals, supporting PCIe
expansion for 10 Gbps or M.2 SSDs
to accelerate applications

The QNAP logo is displayed in a bold, white, sans-serif font. To its right, there are three horizontal teal bars of varying lengths, stacked vertically, set against a background of a purple and blue gradient with a checkered pattern and a red-to-purple gradient circle.

- Intel® Celeron® J4125 quad-core processor, up to 2.7 GHz and 8GB DDR4 RAM.
- Dual 2.5GbE ports accelerates file sharing across teams and devices or gaming storage applications.
- PCIe expansion allows for a Multi-Gig 10GbE or 5GbE network card, or a QM2 card to add M.2 NVMe or SATA SSDs for caching.
- 4K media playback and real-time transcoding; directly watch videos on an HDTV via HDMI 2.0 (4K @60Hz) output.
- Hosts multiple virtual machines and containers to execute different applications in one NAS device.
