QTS 5.0 + Linux kernel 5.10

To provide the best performance of Intel® Celeron® N5105/N5095, TS-x64U is shipped with QTS 5.0, using the new Linux kernel 5.10. QTS 5.0 optimizes overall system performance and NVMe SSD over-provisioning & cache performance to enhance TS-x64U functionality.

2.5GbE accelerates large file transfer than 1GbE, especially suitable for a single client environment

Tested in QNAP Labs. Figures may vary by environment.

Test environment:

NAS | TS-464U-4G, QTS 5.0.0, 4 x Samsung 860 Pro 512GB, RAID 5
Client PC | Windows Server 2016, Intel Core i7-6700 3.4 GHz, 64GB RAM
IOmeter | 30-sec ramp up time, 3-min seq. run time, 16 workers, 4-outstanding

2 x 2.5GbE for the multi-user/device environment for the future business growth

In addition to Jumbo Frame support, port trunking / link aggregation provides enhanced performance.

Test environment:
NAS | TS-1253DU-RP-4G, QTS 4.4.2, 12 x Samsung 850 Pro 512GB, RAID 5, thick volume
Client PC | Windows 10 Pro, Intel Core i7-6700 3.4 GHz, 32GB RAM
IOmeter | RAM*4, 30-sec ramp up time, 3-min seq. run time, 2 workers, 64-outstanding, 1MB

Tested in QNAP Labs. Figures may vary by environment.

PCIe 3 slot for various 2.5GbE/ 5GbE/ 10GbE NICs to accommodate different environment

Economical and flexible QNAP expansion enclosures for multi-platform usage

QNAP TR RAID and TL JBOD enclosures have many advantages in the market for NAS capacity expansion.

- **Bigger capacity**
 - 4 & 12-bay choices
 - NAS can support up to two expansion enclosures
- **Higher speed**
 - USB 3.2 Gen 2 10Gb/s
- **Better compatibility:**
 - QNAP External RAID Manager and JBOD Manager for monitoring the JBOD status
