QNAP

KoiBox

All-in-one video conferencing and wireless presentation solution
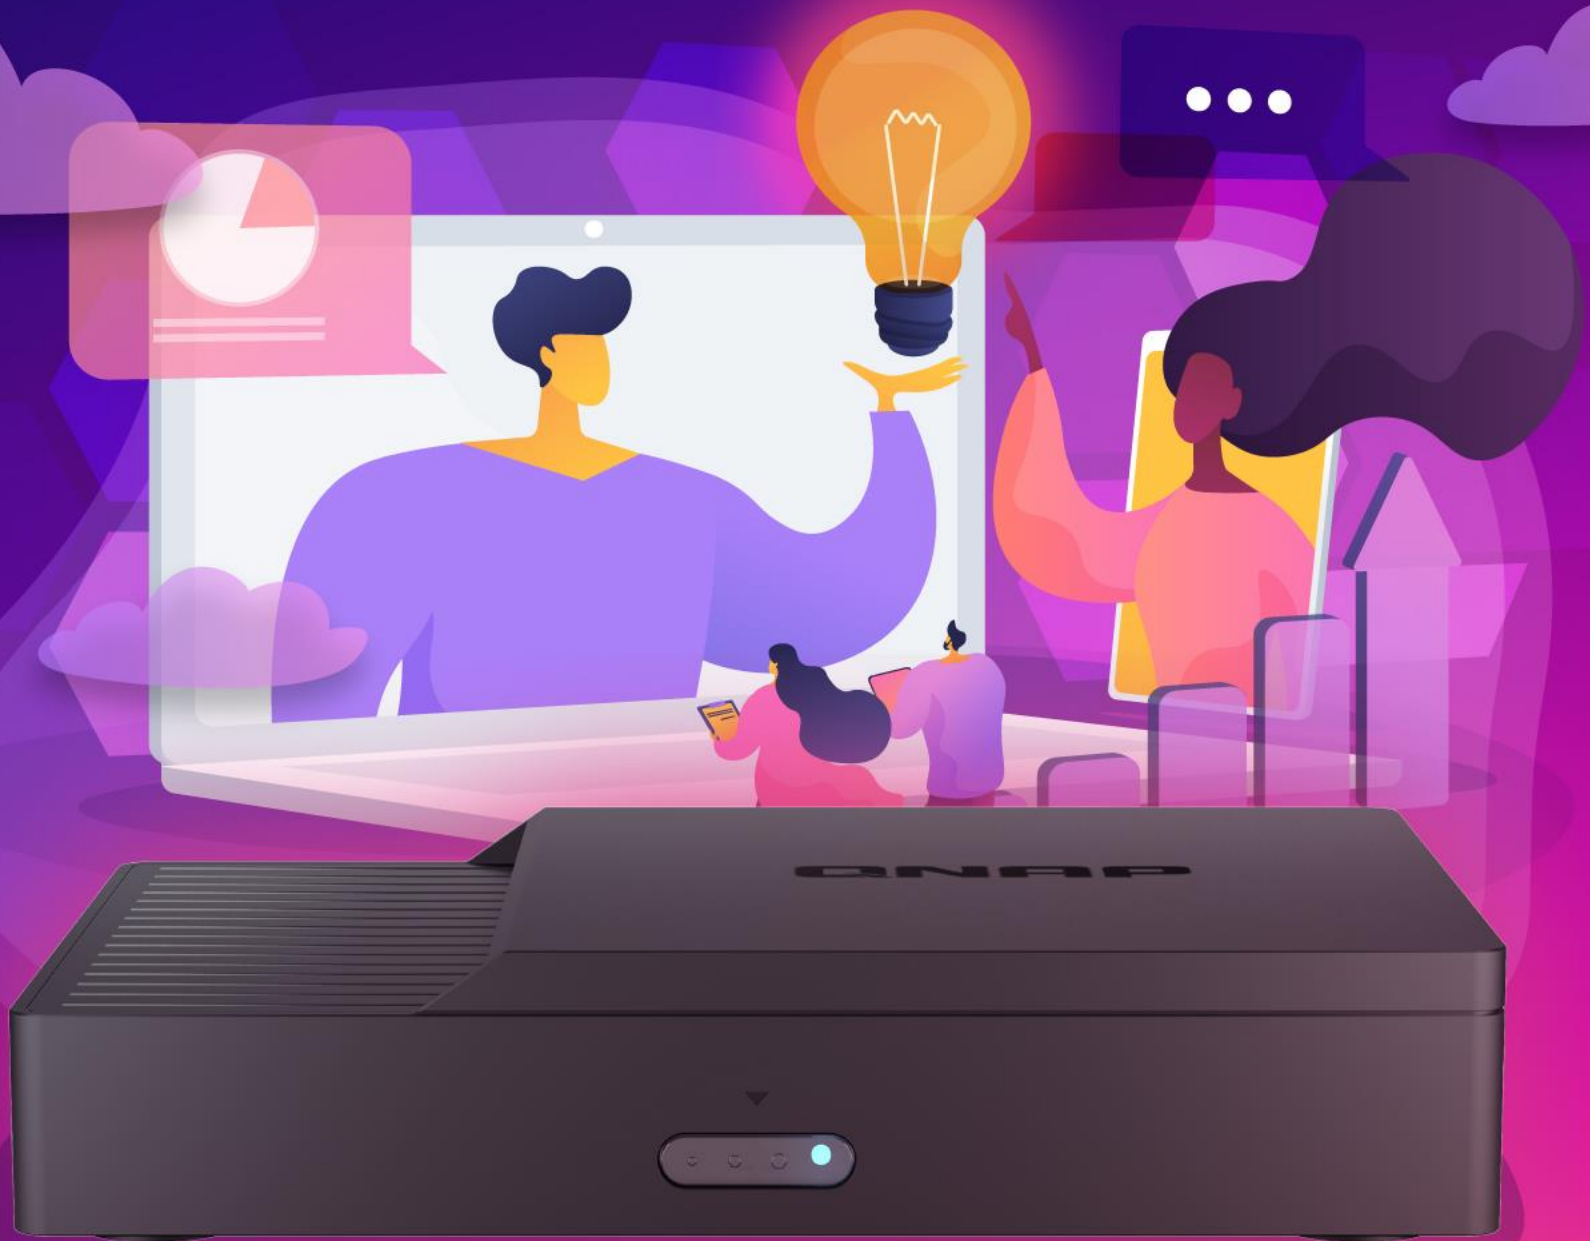

# KoiBox

QNAP and KoiBox

KoiBox in the conference room

- Taipei Headquarters

- Branch Office
  - Shanghai

  - Japan

  - Germany ...

Why does QNAP use KoiBox?

- Change in meeting style

  Less people, more space - more hardware costs

- Returning to the office from working from home

  Interference when participating in online meetings

- Meeting room devices should be shared

 So does microphones and speakers, projection as well

How QNAP uses KoiBox?
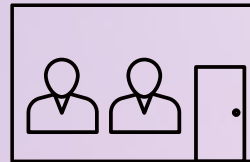

KoiBox is used in these ways at QNAP meeting room:

HDMI — Wireless Projection

Recording

Cloud Meeting — Join cloud meetings
Teams, Zoom, Skype, Meet…

Make private p2p meetings
With mobile app, other KoiBox, and SIP meeting devices.

Reasonably low unit prices allowed the company to turn all meeting rooms into video conference rooms within budget.

Why KoiBox, instead PC?

- Unable to accept wireless projection

- Meeting software must be installed

- Synchronizing is troublesome

- More difficult to manage remotely

Unbox and setup KoiBox

Using KoiBox

SUM UP

- KoiBox supports most USB cameras and Bluetooth keyboards, mice, and microphones

- Supports Wi-Fi 6 wireless standard, compatible with QNAP Qhora-301W

- Supports 2.5" SATA hard drive for conference recording and supports tool-less installation

- No matter the size of the meeting, from multi-person cloud meetings to private meetings and local meetings, KoiBox can support them all

KoiBox
is Your Best Choice!
