

Quad-core Rackmount NAS

# TS-x64U Series

Dual-port 2.5GbE and PCIe Expandability for High-speed Transmission and Virtualization Applications

## High-speed file sharing with 2.5GbE connectivity

Up to 5 Gbps transfer speeds can be achieved by setting port trunking with the two built-in 2.5GbE (2.5G/1G/100M) ports.

## Optimize image recognition or enable SSD caching

Install an M.2 PCIe Gen 3 SSD to enable caching for improved performance, or Edge TPU for accelerated AI image recognition.

## Snapshots for higher NAS data protection

Protect your files and data from accidental deletion and malware attacks with snapshots that fully record the system status and data.

## All-in-one server to host virtual machines and containers

Use Virtualization Station and Container Station to consolidate existing IT infrastructure and to extend the potential applications of your NAS.
