Empower high-speed data transfer with 2.5GbE connectivity

QNAP's popular 2.5 GbE product range allows you to easily upgrade to 2.5GbE networking and enjoy faster speeds.

Snapshot protection against Ransomware

Snapshots fully record the system status and data, allowing you to protect files and data from accidental deletion and malware attacks.

Share files with friends, families and colleagues easily and securely

QNAP NAS has a huge amount of space for storing all your files – all of which can be easily shared across Windows® and Mac® systems and with friends and family.

Hardware-accelerated encryption boosts security without sacrificing performance

AES-NI accelerated encryption ensures the confidentiality of sensitive business data without sacrificing system performance.
