

FANLESS

up to 2.0

SS 2 x HDMI

2.5GbE x 2

4K output

Silence

Fits your home

HS-264 adopts a new and elegant appearance, with a fan less design and a metal hairline upper cover, which is both beautiful and heat dissipation, no longer have to worry about the fan being filled with dust or malfunctioning.

QTS 5.0 + Linux Kernel 5.10

In order to provide the best performance, the HS-264 is equipped with QTS 5.0 and uses the new Linux kernel 5.10 to unleash the potential of the Intel® Celeron® N5105. QTS 5.0 optimizes overall system performance and enhances the versatility of the HS-264

Front view of HS-264 Light weight and minimalist design

2 Bays HDD/SSD

The new HS-264 has 2 built-in SATA 6Gbps hard drive bays, in addition to supporting large-capacity mechanical hard drive HDD, it can also support 2.5" solid state drive SSD to balance performance and capacity.

HDD for high capacity

SSD for performance and silence

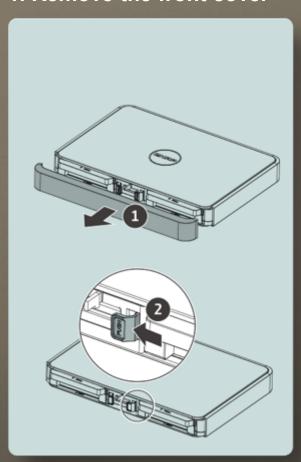

SATA 6Gb/s

Easily install 2.5" or 3.5" HDD or SSD

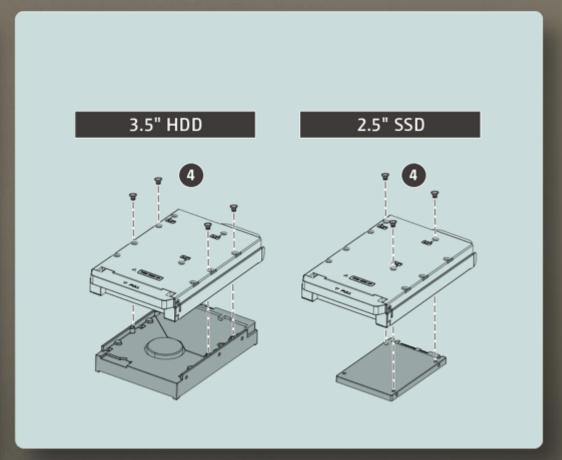

1. Remove the front cover

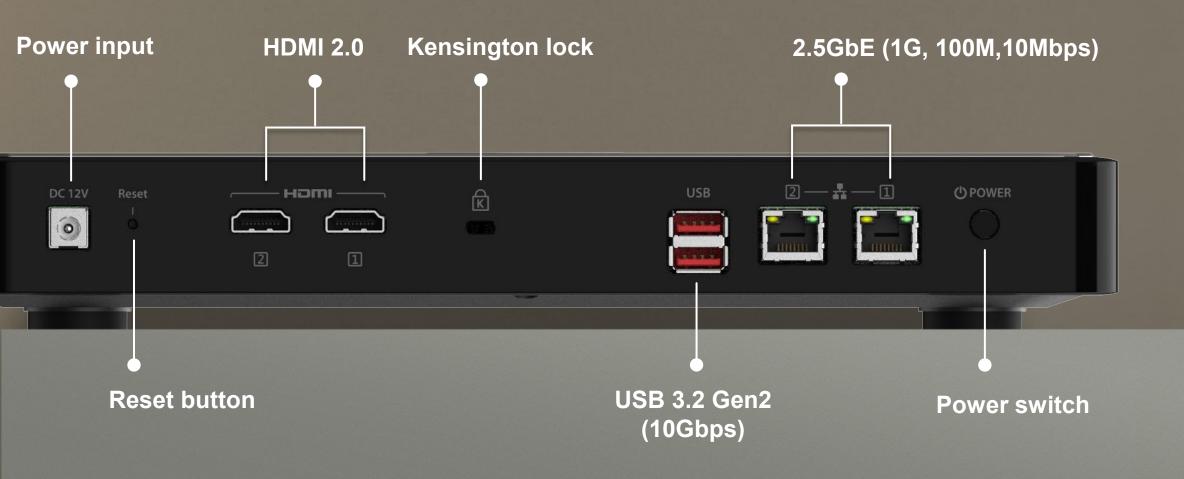

2. Pull out the hard drive tray

3. Use the corresponding screws to install the disk

HS-264 rear view

High-performance GPU with two HDMI outputs and up to 4K 60Hz resolution

New Graphic process unit Intel UHD Graphics

Support up to 4K @60Hz HDMI outputs

Support h.264/265 hardware transcoding

Specifications

Ordering P/N	HS-264-8G
CPU	Intel Celeron N5105; quad-core, up to 2.9GHz
Graphics	Intel UHD Graphics (up to 4K output & transcoding)
Memory	8GB not expandable
Drive bays	2 x 2.5"/3.5" HDD/SSD SATA III 6Gbps
Ethernet	2 x 2.5G NBASE-T
USB	2 x USB 3.2 Gen 2 (10Gbps); Type-A
IR receiver	Support (Optional RM-IR004)
Kensington	Support
Power	External adapter 60W; 100-240VAC

2.5GbE provides nearly 295MB/s performance, much faster than 1GbE

Guide

QVPN QuWAN Mesh VPN Offers a variety of VPN solutions

QuWAN Mesh VPN

QuWAN SD-WAN supports IPsec VPN, allowing QNAP NAS and VMware Hypervisor platforms to build auto Mesh VPN networks for highly secure multi-site connections.

Learn more: QuWAN SD-WAN

QVPN

Establish a VPN connection to a remote NAS and access its content/services from computers and mobile phones. You can also use the NAS as a VPN server through QVPN.

Learn more: QVPN

QTS 5.0 built in WireGuard VPN

- The new QVPN's WireGuard VPN is lighter, easier to set up, supports multiple user platforms, and greatly improves the speed. It is an essential tool for individual users to work from home.
- Connecting to a NAS is safer and more convenient.

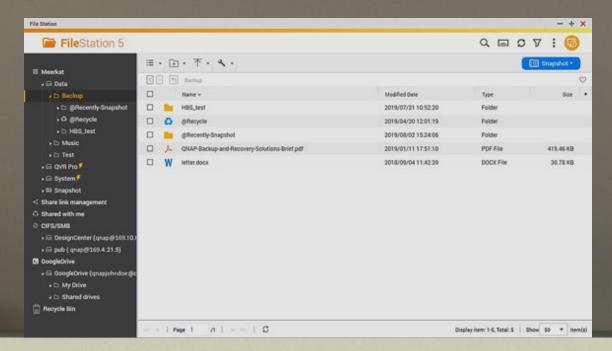

File Management

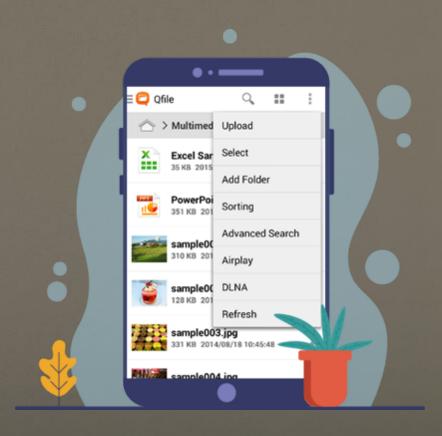

QTS provides a variety of APPs to help you manage various files in the NAS

File Station – Multifunctional file browser

File Station not only allows you to manage the files stored in the NAS, but also the files on the cloud space can be easily managed. Through simple and intuitive operations, you can quickly upload files from devices such as computers, drag and drop files between different folders, delete files, and set file and folder permissions to protect important data from prying eyes.

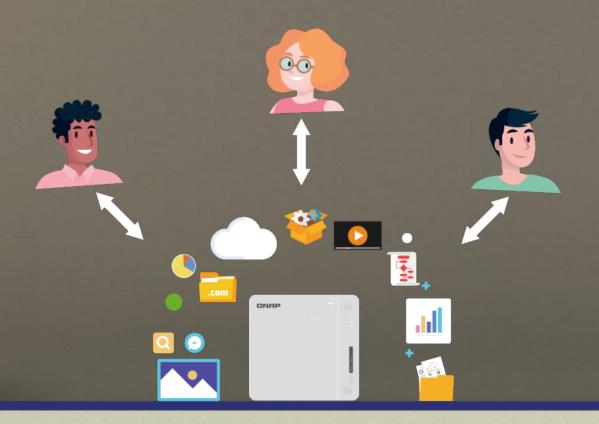

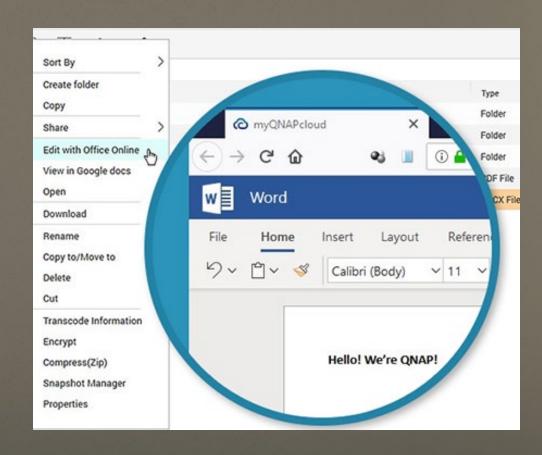

Manage your files with the Qfile mobile app

File Station – Easy to share

Easily share QNAP NAS files with friends, family and colleagues. You can create a sharing link and send it to others via social networking sites or email. You can also add an expiration date or set a password to the link to make the file more secure. All created sharing links can also be managed in File Station, which is very convenient.

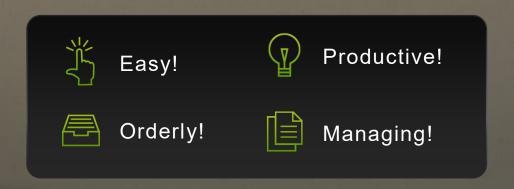

Microsoft Office on the web simplifies document editing

Handy tool to sorting and search files

Automatic batch classification and archiving of photos and files stored in the NAS. The fully automatic process allows you to no longer have to manually drag and drop files, saving time and convenience!

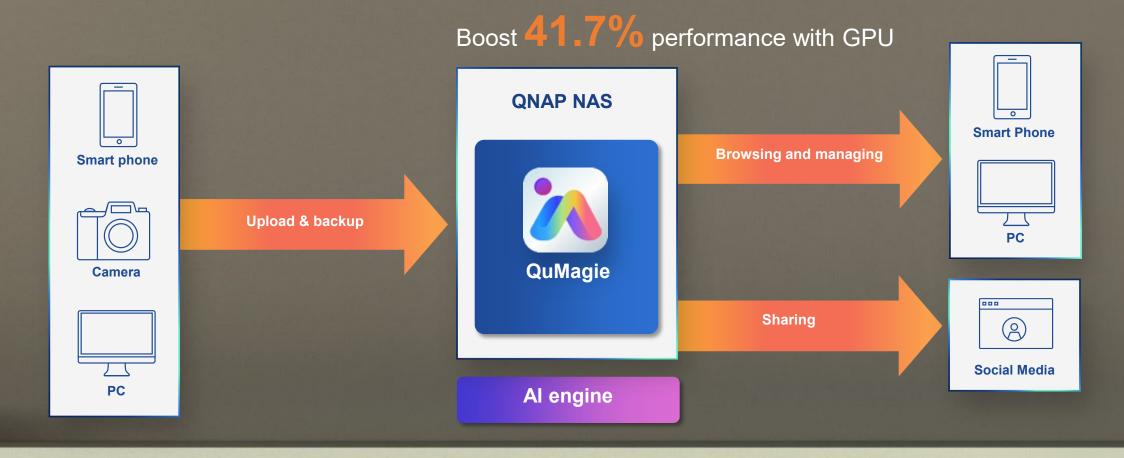

Just like a Google search! The powerful and powerful full-text search engine allows you to quickly find the files you need based on search criteria such as file creation/modification dates, keywords, and main colors in images.

Five kinds of advanced photo search: search by people, search by text in pictures, search by objects, search by color, search by map

QuMagie - Al Smart Album Backup a Management

QNAP has created AI photo and video management tools for NAS. It is equipped with a new AI engine to provide smarter backup photo, video management and sharing tools.

High-performance multimedia audio and video playback and streaming platform

QuMagie Al smart album

Plex Server streaming and transcoding

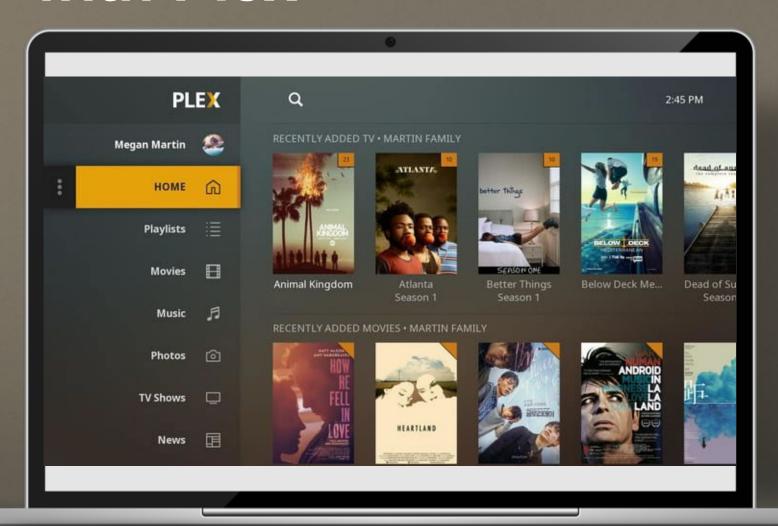

CAYIN MediaSign Player HEVC (H.265) real-time transcoding

Use Cinema28 to stream multimedia to AV playback devices in conference rooms

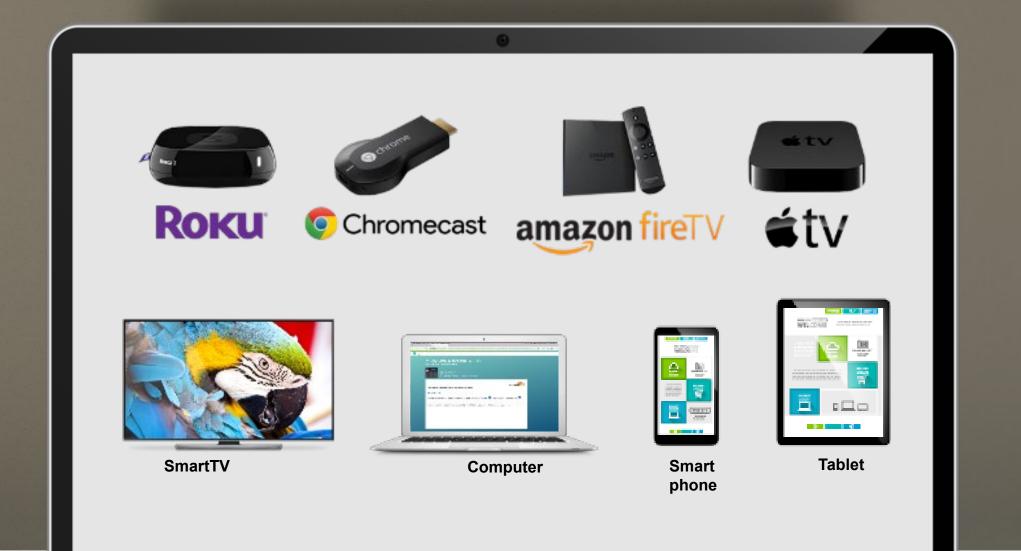

Build your personal multimedia library with Plex

With Plex Server, you can easily turn your NAS into a multimedia center in your home. You can stream Plex directly on your TV, tablet or mobile phone and play multimedia files stored in the NAS.

Supports connecting and streaming to various TV boxes or mobile devices

Connect to TV, screen

Lots of probability through the HDMI output

Play a list of your favorite songs and set other buttons to play the previous or next track

Watch the default Surveillance Station camera channels, start monitoring in seconds, and be safe

One-click restart or shutdown of the NAS, fast and convenient

Turn your NAS to Ubuntu PC with Linux Station

- 1. Connect the NAS to the monitor via HDMI
- 2. Then connect the mouse and keyboard to the NAS, and the NAS becomes an Ubuntu PC!

Back up your various data across platforms and devices

The importance of backup + how to prevent extortion

Is your digital data safe? How to keep data safe

Common Threats

While no one wants to lose their phone or crash their computer, life is full of surprises. If you regularly back up data to the NAS, the NAS can safely and centrally store your important data, and protect the data from accidents such as damage, disaster, hardware failure, and human negligence, and you will no longer have to worry about losing files.

Cyber security

There are complex security vulnerabilities hidden in digital devices and various types of information, coupled with the endless emergence of computer viruses and malware, information security threats are even more unavoidable.

Hardware failure

Computers, mobile phones, tablets, especially digital products such as hard drives, can fail due to factors such as overuse or aging, and people are caught off guard.

Human error

Human errors such as accidental deletion of files/programs, misplacement of files, management errors, or unreadable file format errors occur almost every day.

Natural disaster

Natural disasters (such as fires, earthquakes, floods, wind disasters, etc.) always come suddenly, and the probability that data may be lost or damaged during disasters cannot be ignored.

Backup 3-2-1, keep your data safe!

According to the "Data Backup Options" published by the United States Computer Emergency Readiness Team (US-CERT), from home users to professional organizations, any computer user should back up important data to avoid data Accidental loss or damage. However, just storing a backup file may not be enough! To increase the chances of recovering lost or corrupted data, it is recommended that you follow the 3-2-1 backup principle.

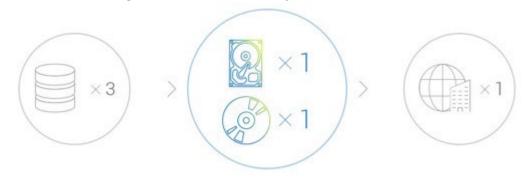

Important data should be backed up at least 3 copies: 1 main file and 2 backup files.

One of the backups is to be stored offsite (outside the home or business).

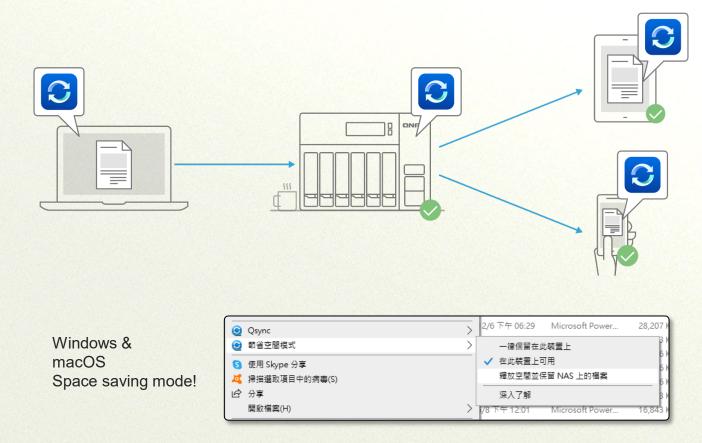

Archives are stored on **2 different backup** media to protect against various types of hazards.

Qsync 5.0 cross-device file synchronization tool for personal and team collaboration

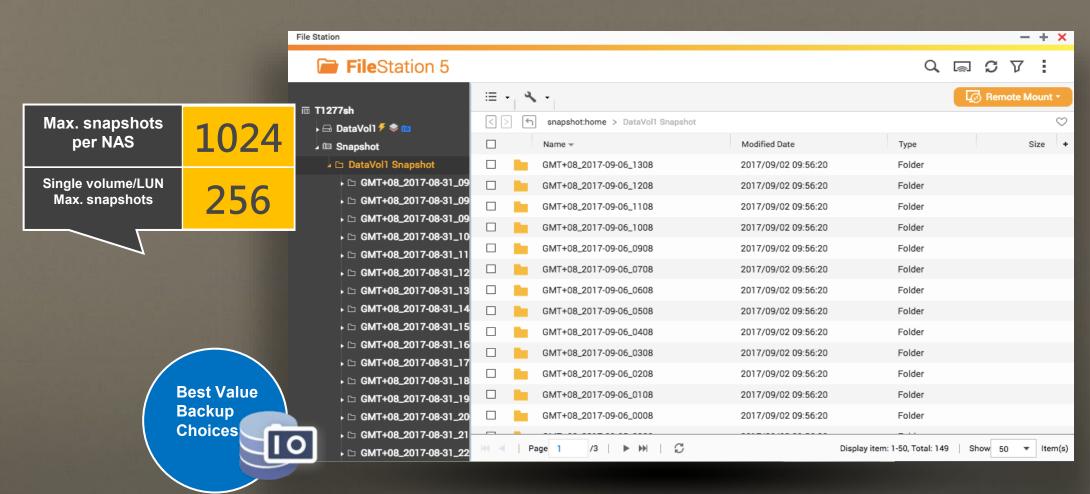

When team members collaborate and communicate, files can be automatically pushed to the binding devices of all members, making the workflow faster and collaboration smoother.

When there are different devices such as laptops and mobile phones, as long as the files are modified on a single device, the modified files will be automatically synchronized to other devices.

Most affordable enterprise-grade protection with up to 1024 snapshots

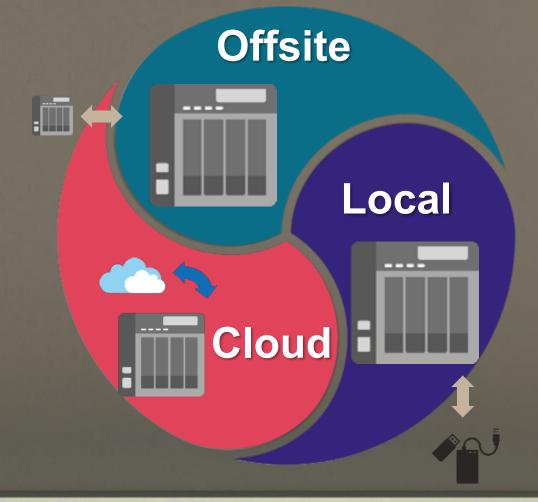

HBS3 offsite backup - multiple protection backup data

Hybrid Backup and Sync Center

Keep your NAS safe with these tools

Malware Remover

Checks for weaknesses and offers recommendations to secure your data against multiple attack vectors. It also integrates anti-virus and anti-malware software to ensure complete protection of your QNAP NAS.

Learn more: Security Counselor

Security Counselor

Regularly scan your NAS using the latest malware definitions. When under attack, infected files will be immediately removed to ensure NAS data security.

QuFirewall

Supports IPv6 and GeoIP, allowing you to configure your firewall to allow/deny specific packets and IP addresses from certain countries for safeguarding data and service security.

QNA-UC5G1T

Upgrade to 5GbE instantly

Is 2.5GbE network enough? Quickly upgrade to 5GbE NBASE-T via USB, compatible with Cat.5e/6a network connection cables, quickly increase the transmission speed by 2 times

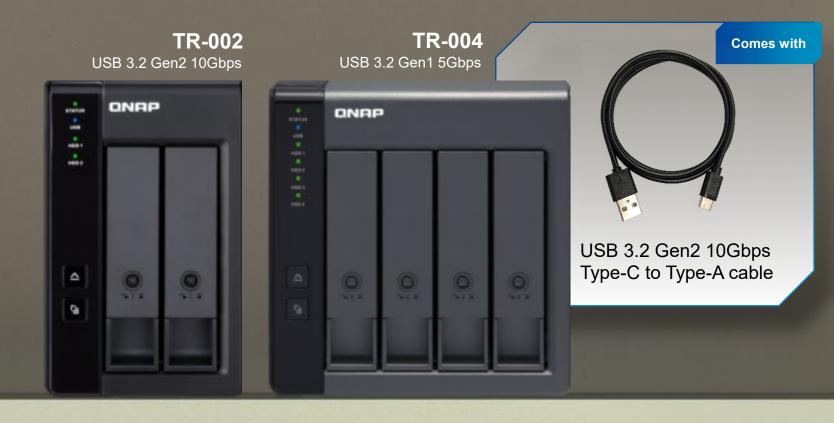

*A USB-A to USB-C cable is included in the package

Storage: TR-002 / TR-004 USB RAID enclosure

Provides economical hardware RAID storage expansion requirements

- NAS can access TR USB RAID storage expansion unit via USB port
- Built-in USB Type-C provides plug and play function, supports USB Type-A & Type-C host
- NAS supports up to 2 TR-002/TR-004 units

Storage: TL-D800C USB JBOD enclosure

Provides economical USB 3.2 Gen2 10Gbps storage expansion requirements

- NAS can access TL USB JBOD storage expansion unit via USB port
- USB Type-C provides up to USB 3.2 Gen2 10Gb/s performance
