

The QNAP logo is located in the top left corner of the image. It consists of the letters 'QNAP' in a bold, white, sans-serif font. The background of the entire image is a detailed, high-angle view of a server's internal components, including a motherboard, cooling fans, and various expansion cards. Two blue NVMe SSDs are prominently featured, one labeled '01' and another labeled '02'. The server chassis is open, revealing the internal layout. The lighting is dramatic, with blue and white highlights against a dark background.

TDS-h2489FU

24-bay U.2 NVMe PCIe Gen 4 all-flash ZFS storage
supports dual Intel 3rd Gen Xeon Scalable Processors
and 25GbE connectivity

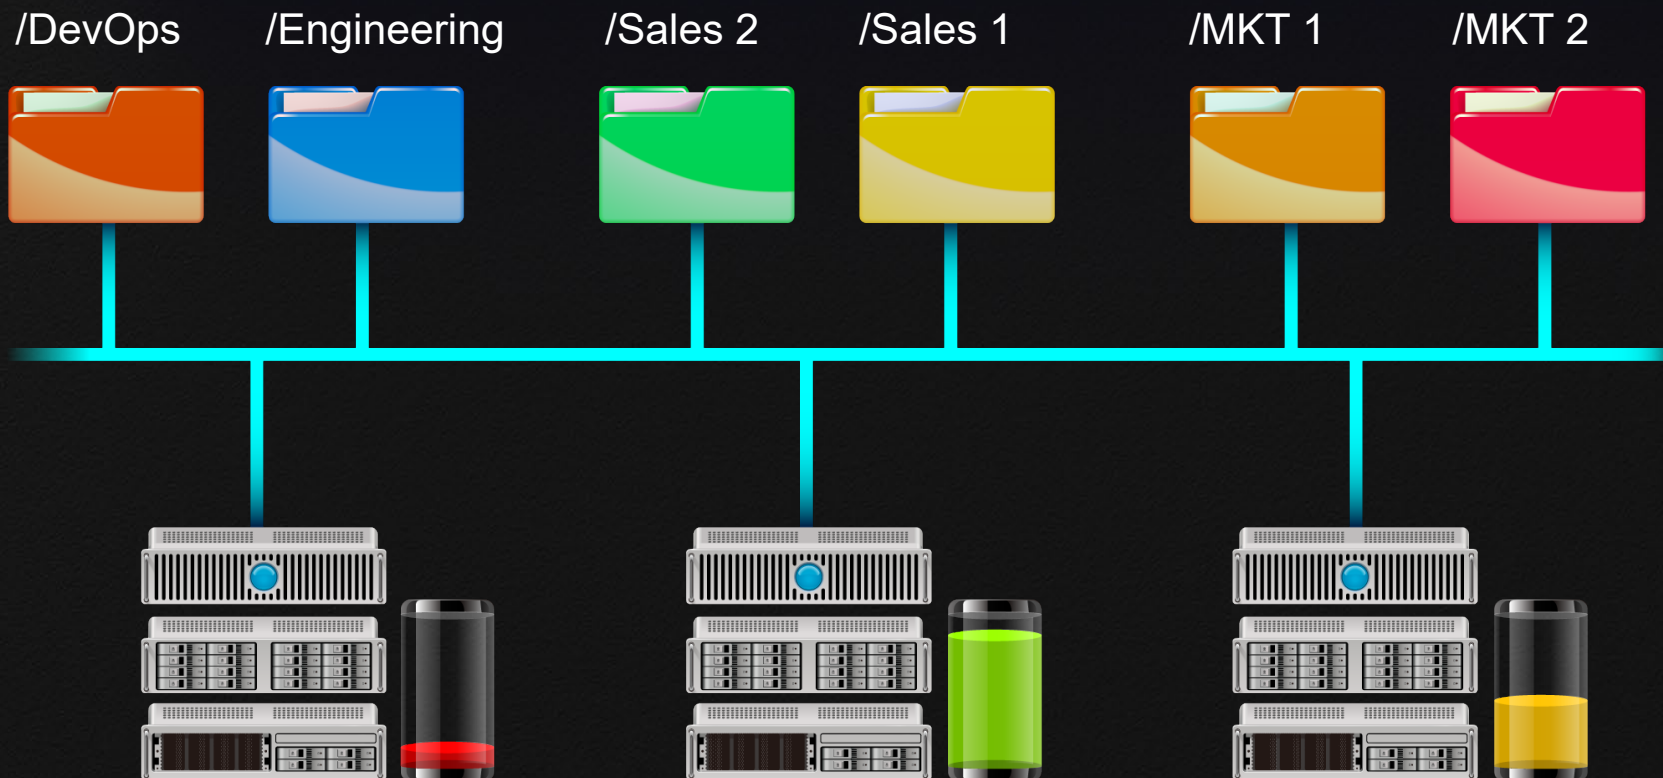

The Intel Xeon Silver logo is located in the bottom left corner. It features the word 'intel' in a small font above the word 'XEON' in a larger, bold font, with 'SILVER' in a smaller font below it. The logo is set against a dark blue square background.

25GbE

QuTS hero

Data growth leads to disruptive expansion in enterprise.

Where did that file go?

Uneven loading & capacity consumption

- Manually split shares between filers
- Copy files to new servers
- Redirect apps & users to new locations

How to tackle throughput- and IOPS-demanding applications with ease?

Virtualization

Eliminates storage bottlenecks for unstructured data and I/O intensive workloads; ideal for server virtualization and virtual desktop infrastructure (VDI).

Data Centers

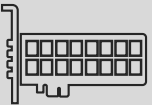

Delivers ultra-low latency and high IOPS performance, providing response times within microseconds for data centers that host significant business-critical systems and data.

Media & Entertainment

Satisfies smooth 4K/8K media streaming and post-production, empowering multimedia workflows with faster data transfer, access, and backup for boosted efficiency.

Must use SSD to get the highest performance. How to choose SSDs?

	Formfactor	Interface	Major dimension
	2.5 inch (hot swappable)	SATA	• Height 7~9.5 mm
		SAS	• Height 15 mm
		NVMe (U.2/U.3)	• Height 7 mm • Height 15 mm
	M.2	SATA	• 2230 (22 x 30 mm) • 2280 (22 x 80 mm) • 22110 (22 x 110 mm)
		NVMe	
	PCIe card (AIC)	NVMe	• Full height / half height • Full length / half length

Each SSD model has different sequential / random read/write performance, TBW, and DWPD life expectancy. Choose wisely depends on your applications.

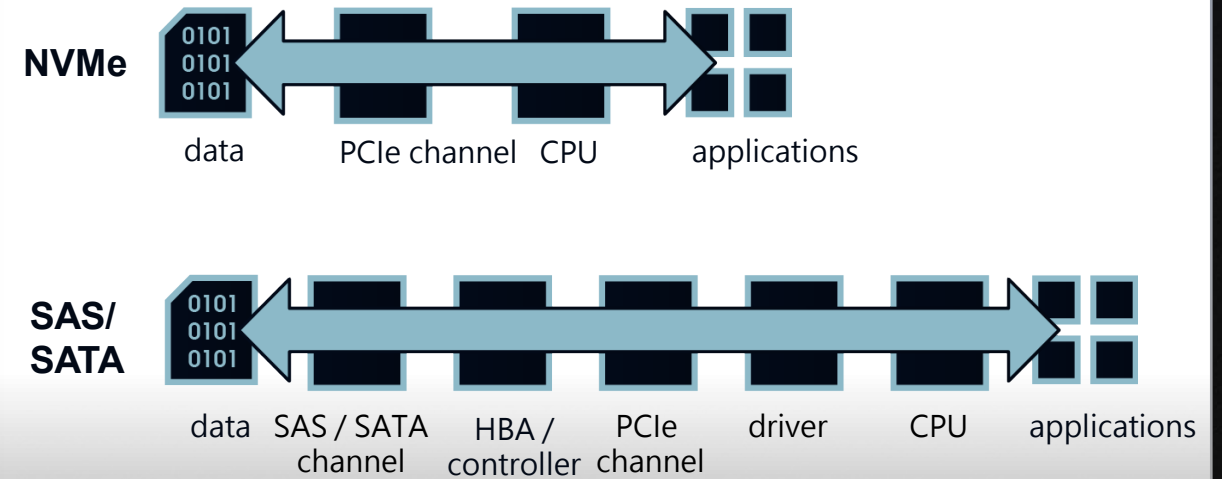

Why the future mainstream SSD market will be PCIe NVMe SSD and not be SAS or SATA SSD?

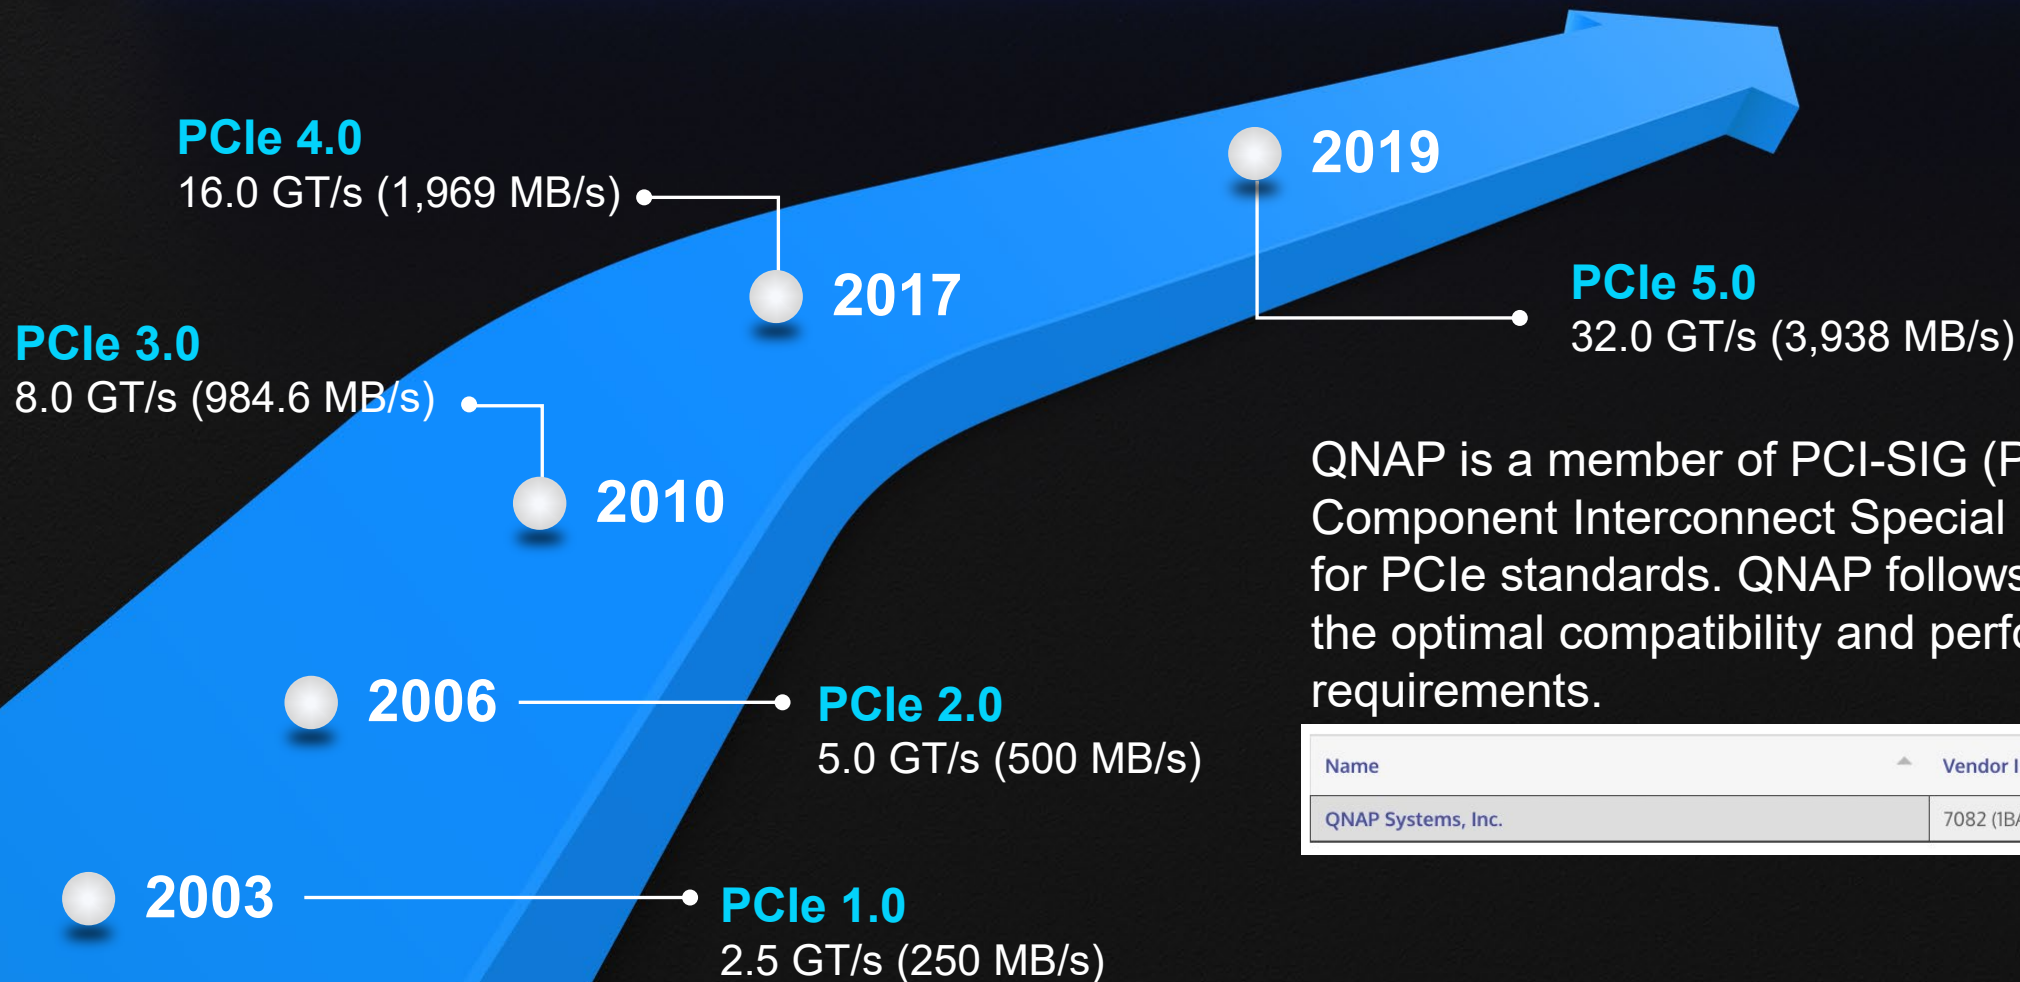

Maximum bandwidth 64 Gb/s (8GB/s)

Low latency, Super short data path

800+ members in PCI-SIG community for PCIe standards since 1992 establishment

QNAP is a member of PCI-SIG (Peripheral Component Interconnect Special Interest Group) for PCIe standards. QNAP follows the specs for the optimal compatibility and performance requirements.

Name	Vendor ID
QNAP Systems, Inc.	7082 (IBAA Hex)

How to find the best data carrier of big data analysis / edge computing / AI inference?

200TB is not enough

Only PB-level shared folder is enough to store the huge data matrix

Connect multiple JBOD to reach petabytes of storage capacity

The all-flash U.2 NVMe NAS with dual Intel Xeon processors, 25GbE, and optional 100GbE

TDS-h2489FU 32 & 16 cores dual CPU 25GbE NAS

- 24 x 2.5" U.2 NVMe PCIe Gen4 SSD bays
+ 2 x M.2 2280 PCIe / SATA SSD combo slots
- Dual Xeon processors up to 32 and 16 cores:
2 x Intel Xeon Scalable Silver 4314 16-core / 4309Y 8-core
- 32 DDR4 RDIMM memory slots, up to 1TB total
- 2 x 25GbE and 2 x 2.5GbE, with an additional PCIe Gen4 slot for 100GbE NIC, Fibre Channel, or SAS HBA

Microsoft
Hyper-v

CITRIX
XenServer

- ZFS file system for data security
- 65,536 snapshots for data protection
- Data reduction technology
 - ✓ Increase storage efficiency and maximize ROI
 - ✓ De-duplication, inline compression, data compaction
- Unified Storage: iSCSI/ FC/ NFS/ CIFS/ FTP / S3
- Container Station and Virtualization Station for virtualized applications

Dual server-grade 3rd gen Intel Xeon Silver scalable processors for the best efficiency

- 2 x Intel® Xeon® Silver 4314
16 cores 32 threads, up to 3.4 GHz
- 2 x Intel® Xeon® Silver 4309Y
8 cores 16 threads, up to 3.6 GHz

What if U.2 NVMe SSDs are not available in your country or if the cost is over your IT budget?

24 x U.2 NVMe SSD in the All flash NAS TDS-h2489FU

Not available for sale or long lead time?

Too expensive and over your IT budget?

Economically use M.2 NVMe SSDs with QNAP QDA-UMP4 U.2 to M.2 SSD adapter

Order P/N: QDA-UMP4

U.2 NVMe to M.2 NVMe PCIe adapter, supporting PCIe 4.0/3.0

- Use readily available and more affordable M.2 NVMe PCIe Gen4/Gen3 SSDs
- Excellent heat-conductive metal design with thermal pads so that M.2 SSDs do not overheat. Keep the optimal performance and prolong the life.

68 x 21 mm (on the top side of M.2 SSD)

68 x 15 mm (on the bottom side of SSD. Use 2 for single sided SSDs)

TDS-h2489FU rear view

Powerful all-flash NVMe NAS specs to meet your business digital transformation requirements

- 1 24 x U.2 NVMe SSD bays (bay 17~24 also supports SATA 6Gb/s)
- 2 2 x Intel® Xeon® Silver 4300 processors, up to 32 cores
- 3 8 channel 32 x DDR4 RDIMM slots, up to 1TB
- 4 2 x 1200W redundant PSU
- 5 4 x 2.5GbE RJ45 ports
- 6 4 x USB-A 3.2 Gen 1 ports
- 7 2 x M.2 2280 PCIe Gen3 (x4 + x2) / SATA 6Gbps ports
- 8 2 x 25GbE SFP28 ports (2-port 25GbE NIC)
- 9 2 x PCIe Gen 4 slots (pre-installed 25GbE NIC)
- 10 System fan module

32 DDR4 ECC RDIMM RAM slots, 8-channel high-speed memory, up to 1TB RAM total

ECC

Error correction & Optimal stability

TDS-h2489FU supports ECC Registered memory for automatic error detection and correction.

NAS tested with **1TB RAM!**

Easy maintenance design for quick M.2 2280 PCIe NVMe / SATA SSD or RAM upgrade

1. Loosen the screws

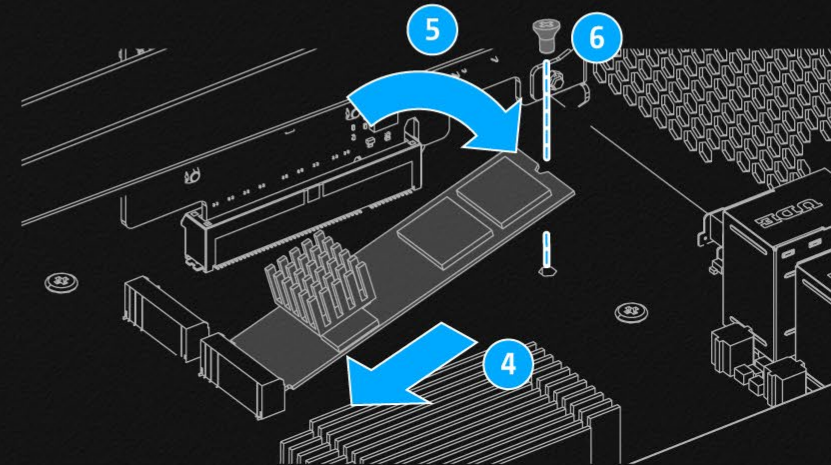

2. Pull out the system module

3. Optional M.2 SSD heatsink for purchase (8 pcs P/N: HS-M2SSD-01)

4~6. Install the SSD & fasten the screws

QNAP All Flash NAS

Fast and furious with expandability

TDS-h2489FU with powerful data reduction to extend SSD endurance

Only available when during inline data process before writing

ZFS file system with inline deduplications and compression feature

It's the best choice to pair with the all-flash and SSD storage because it reduces the data size and pattern that need to be written to the SSD directly.

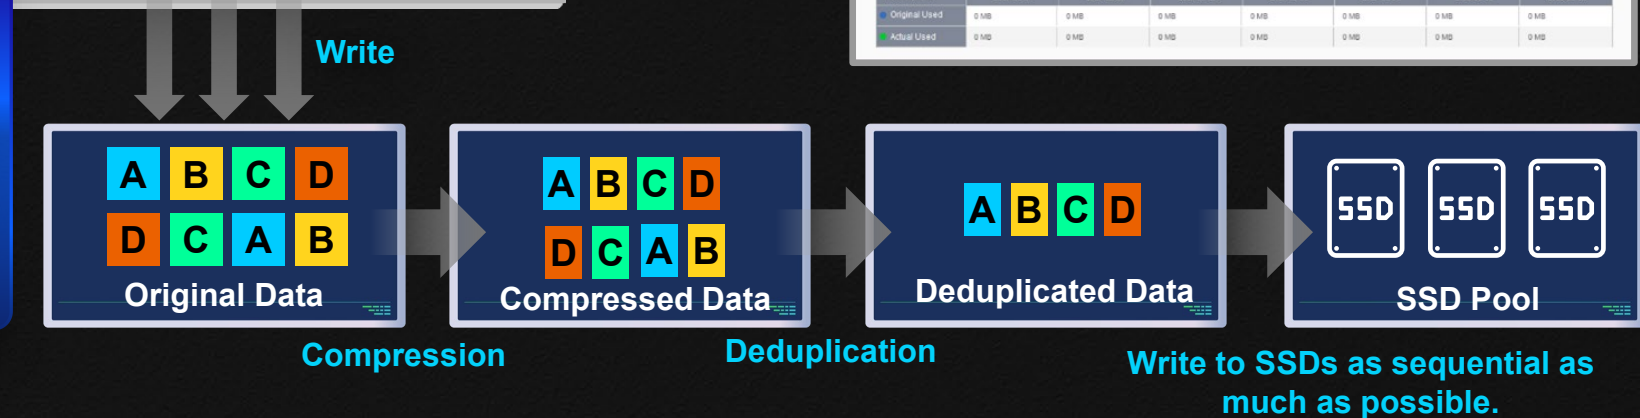

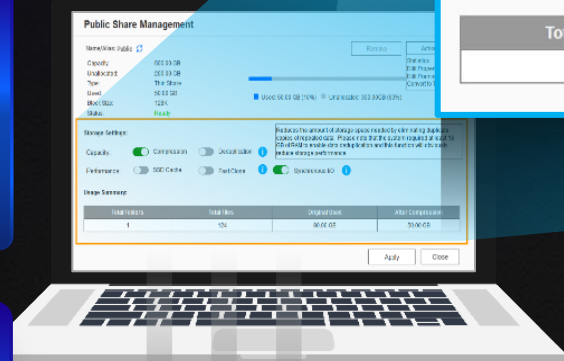

Storage Settings:

Capacity: Compression Deduplication i
Performance: SSD Cache Fast Clone i Synchronous I/O i

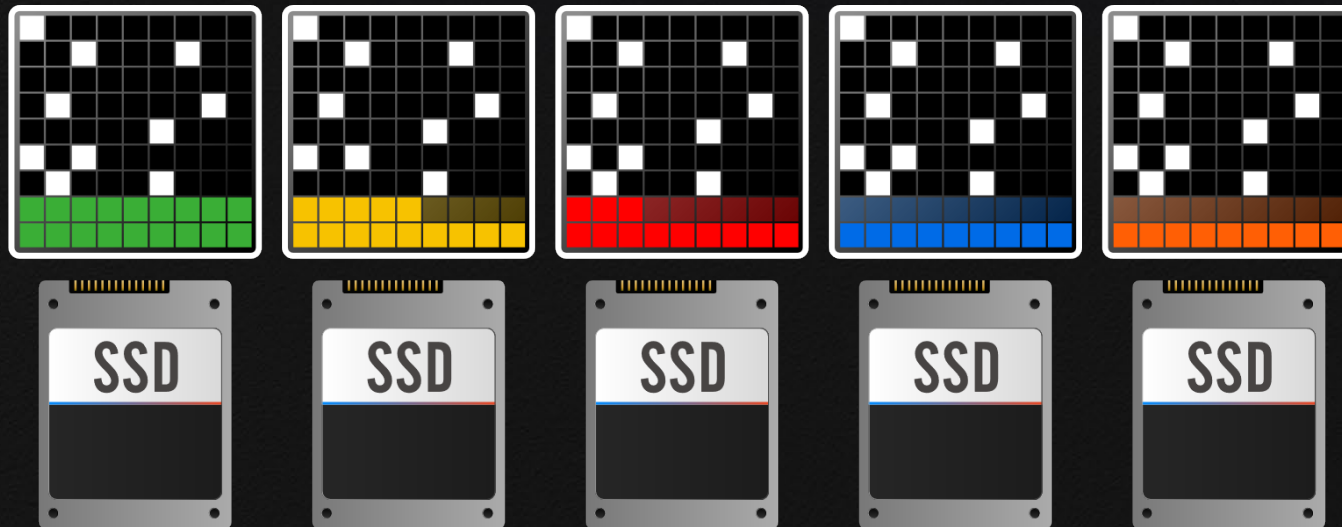

Reduces the amount of storage space needed by eliminating duplicate copies of repeated data. Please note that the system required at least 16 GB of RAM to enable data deduplication and this function will obviously reduce storage performance.

Usage Summary:

Total Folders	Total Files	Original Used	After Compression
1	124	80.00 GB	50.00 GB

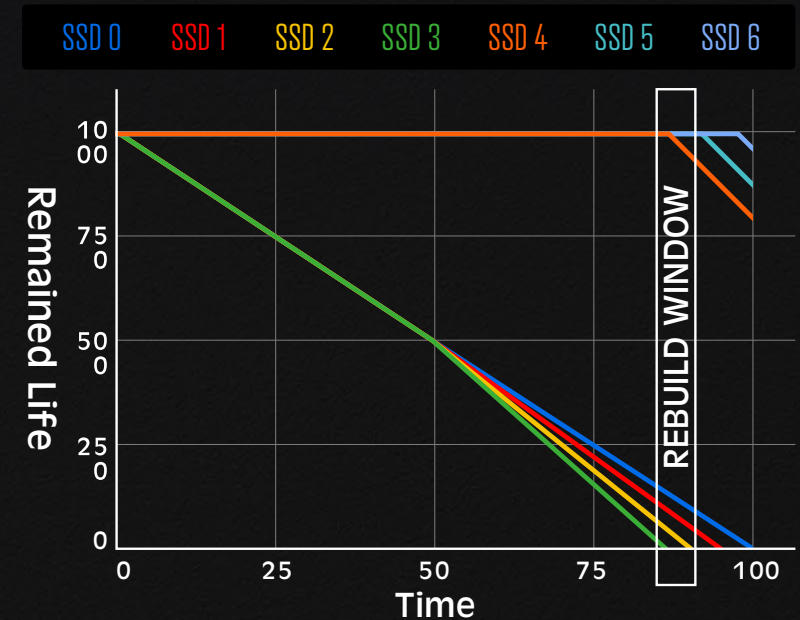

Patented QSAL technology: preventing multiple SSD malfunctioning at the same time

For SSD RAID 5 / 6 / 50 / 60 / TP(Triple Parity).

Note: QSAL can be activated at any time and is compatible with SSD Parity RAID that has not been configured before. It is recommended to enable QSAL before the SSD lifespan reaches 50% to prevent the risk of damage to the SSD RAID due to insufficient rebuild time.

Support 25GbE/10GbE/1GbE transceivers for various network environments

- Built-in 2 x 25GbE ports for SFP28 transceivers
- Backward compatible with 10GbE and 1GbE networks with compatible SFP+/SFP transceivers
- Auto-negotiation for auto speed detection

Reach PB storage capacity with QNAP SAS 12Gb/s 12-bay & 16-bay JBOD units

NAS supports up to **16** QNAP SAS JBOD enclosures

- 12-bay TL-R1220Sep-RP or 16-bay TL-R1620Sep-RP
- Each NAS with **hundreds of HDDs** · **1~3PB** raw HDD capacity
- SAS JBOD can expand NAS existing storage pools

SAS HBA (optional purchase)

	QXP-820S-B3408	QXP-1620S-B3616W
SAS IC	Broadcom SAS3408	Broadcom SAS3616W
PCIe bus	PCIe3 x8	PCIe3 x16
IOPS	1.2X	1.8X
Bandwidth	6,850 MBs	13,700 MBs
Ports	External 8 ports	External 16 ports
Connectors	2 x SFF8644	4 x SFF8644

*The above data is for reference only based on IC vendor's data sheets.
Actual performance could be different due to host, expansion unit or drives.

QNAP NAS x Seagate JBOD partnership for massive storage capacity in agile business transformation

QNAP TDS-h2489FU
NAS

Seagate JBOD

Huge Capacity

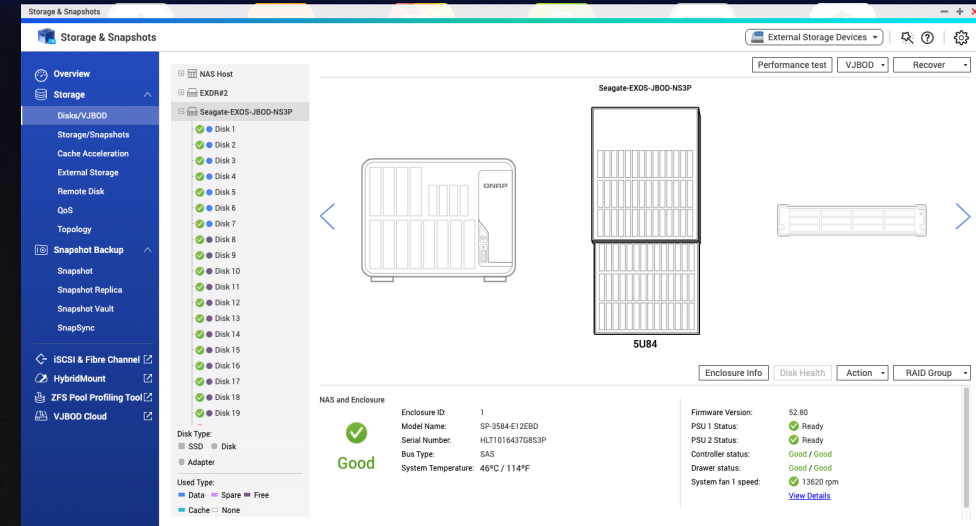

Tackle the massive storage requirements of 4K/8K multimedia, big data storage, critical backups, and more.

High Density

Seagate Exos E 5U84, the 5U rackmount enclosure, can house 84 drives for storing up to 1.1 PB.

Management

QNAP **Storage & Snapshots** Manager simplifies NAS and JBOD management, effectively minimizing IT operational workloads.

- QNAP NAS supports **Seagate Exos E SAS JBOD units** and **100+ drives** to provide **petabytes (PBs)** of raw capacity.

Note:

1. Optional purchase of SAS HBA is required for the NAS.
2. Seagate's JBODs can only be used as an individual storage pool or volume. Its storage pool/volume cannot be combined into the connected NAS. NAS applications cannot be installed on Seagate's JBODs.

SEAGATE

Scale up NAS capacity with optimized cost by using Seagate Exos E JBOD enclosures

Exos E 2U12

- Max 216 TB
- 12 x 18 TB 3.5" SAS HDD

Exos E 4U106

- Max 1.9 PB
- 106 x 18 TB 3.5" SAS HDD

Exos E 2U24

- Max 57.6 TB
- 24 x 2.4 TB 2.5" SAS SSD

Exos E 5U84

- Max 1.5 PB
- 84 x 18 TB 3.5" SAS HDD

Note:

New JBOD models and the maximum connected numbers will be tested and added throughout 2022 H1. Refer to the latest compatibility table before purchase.

<https://www.qnap.com/en/compatibility-expansion?model=tds-h2489fu>

LIVE DEMO

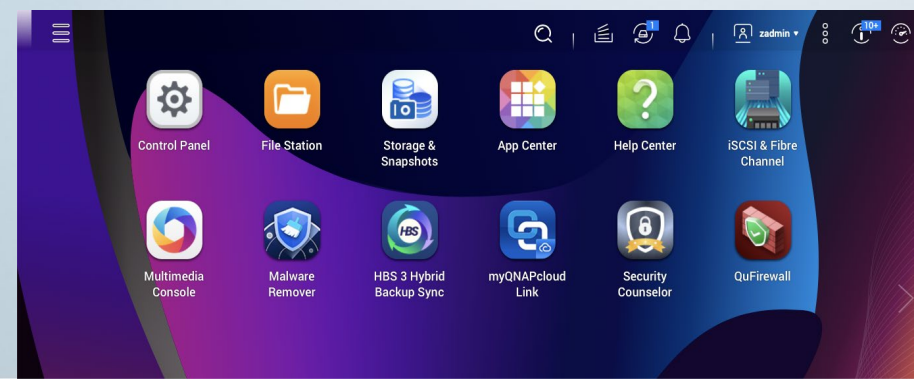

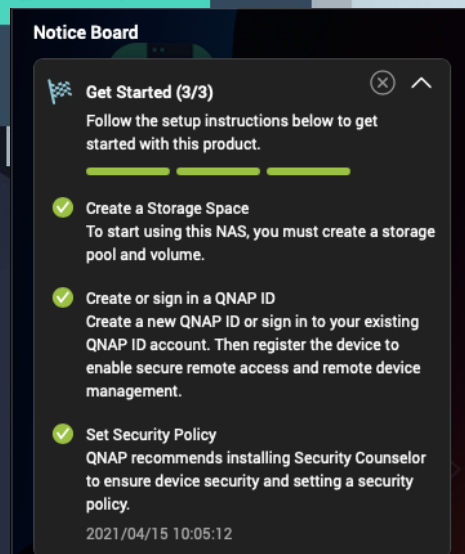

Kernel 5.10 LTS

ZFS-based QuTS hero ensures performance, security, and data integrity

Fast, smooth, and easy-to-use!

Whether clicking buttons, switching between apps, expanding/collapsing windows – every action is much smoother. The search bar in the main menu also assists in quickly finding desired apps.

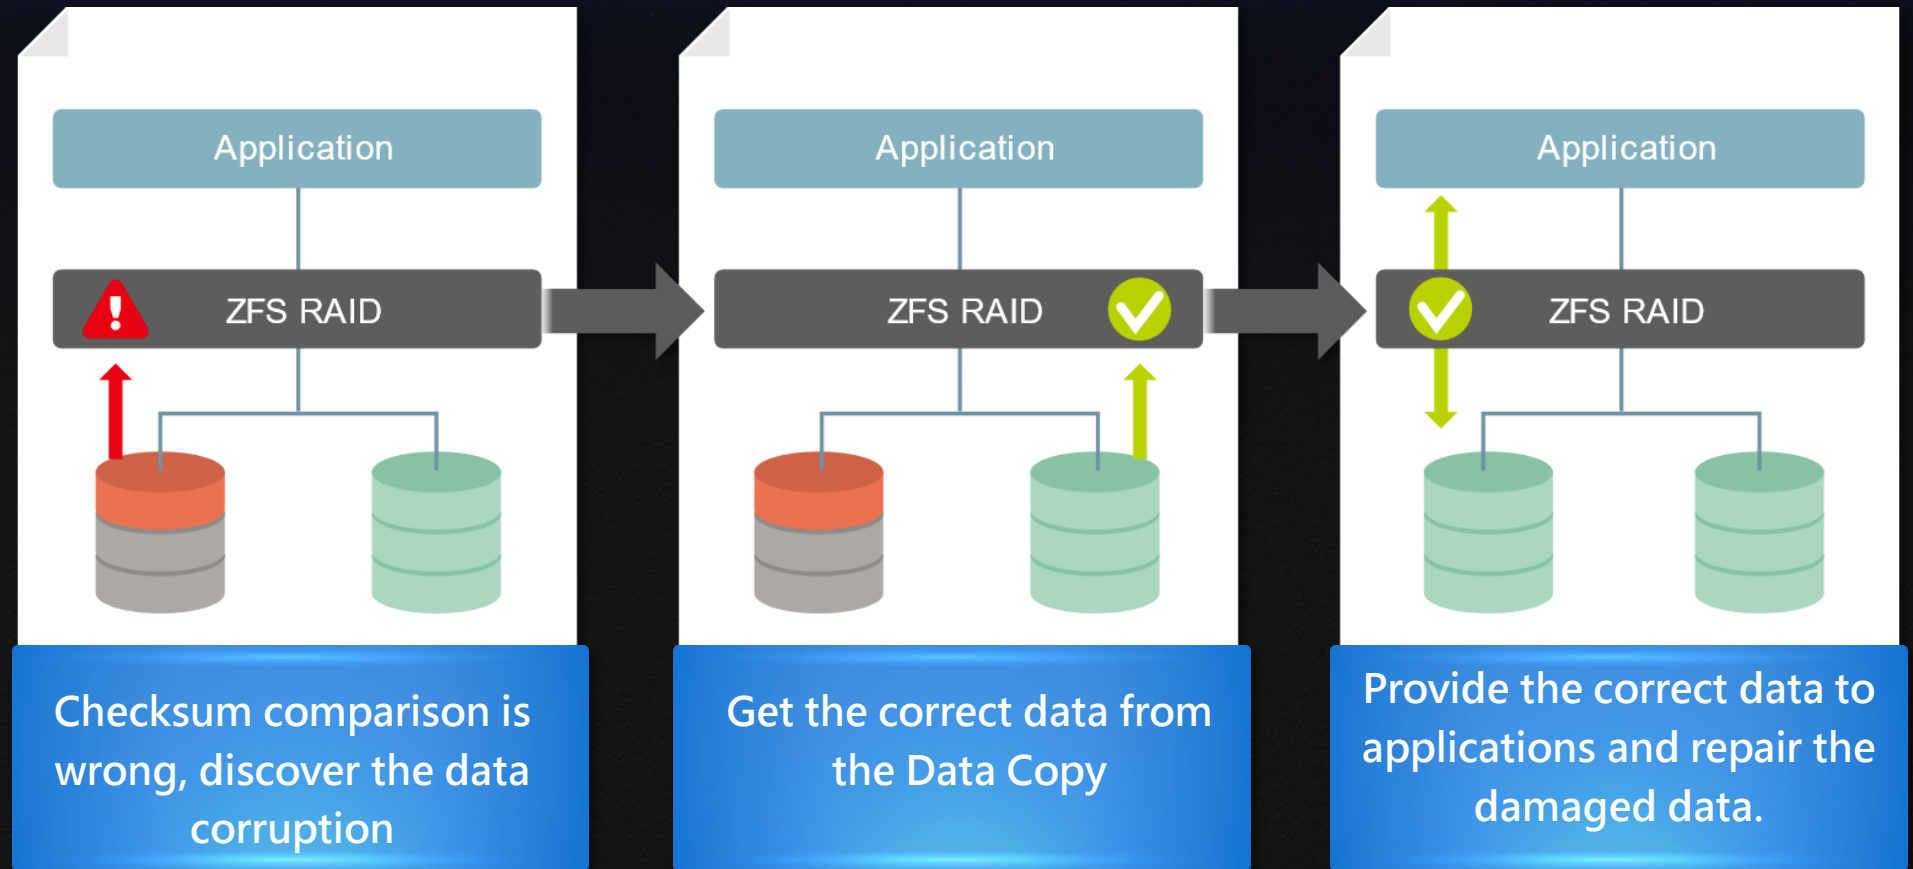

Big Data Storage

Security and performance are priority

- Supports TLS 1.3 to improve security and performance.
- You can also use SSH keys for authentication to secure access to your NAS, preventing password breaches or similar potential attacks.
- The new kernel improves PCIe performance, which enhances NVMe SSD performance and utilization.

Silent data corruption & self-healing with QuTS hero NAS O.S.

Avoid silent data corruption that occurred on the running system.

Dedicated ZIL - SLOG

Read cache is not needed in AFA because it can slow down the pool performance. However, the ZIL for data protection is still need. Therefore, the smaller capacity and high endurance Intel Optane SSDs are the perfect candidate.

License-free backup solutions to provide the most complete data backup protection

RPO : daily / scheduled

HBS 3 (Hybrid Backup Sync 3):

File level, multi-version management: RTRR, Rsync, FTP, WebDAV, and CIFS/SMB protocols.

RPO : hourly / daily / yearly

Snapshot & Replica:

File level, multi-version management.
Lightweight snapshot w/o performance impact.

RPO : real-time

SnapSync:

Block level, Mirror the data copy and always kept up to date.

Easy to use HBS 3.0 app fulfilling backup 3-2-1 practice with deduplication

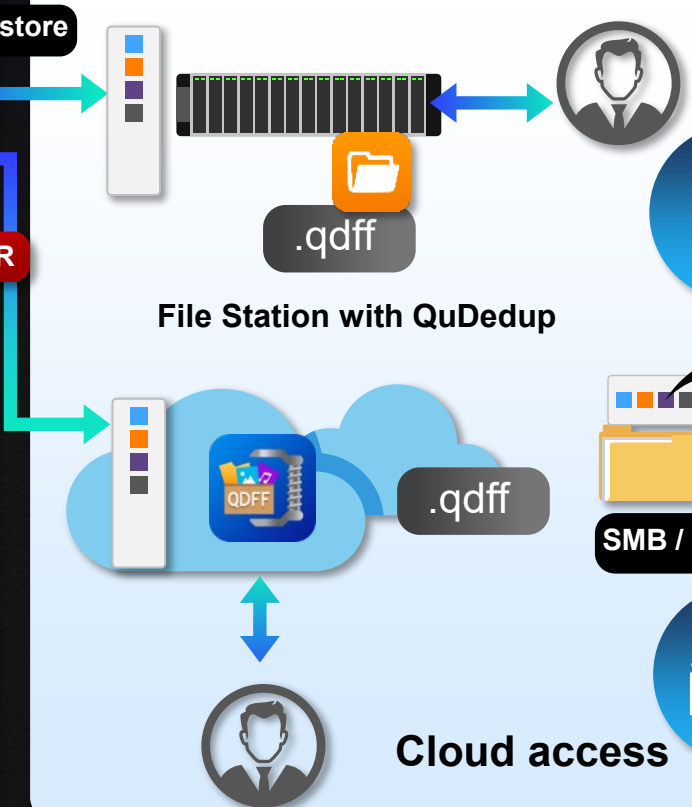

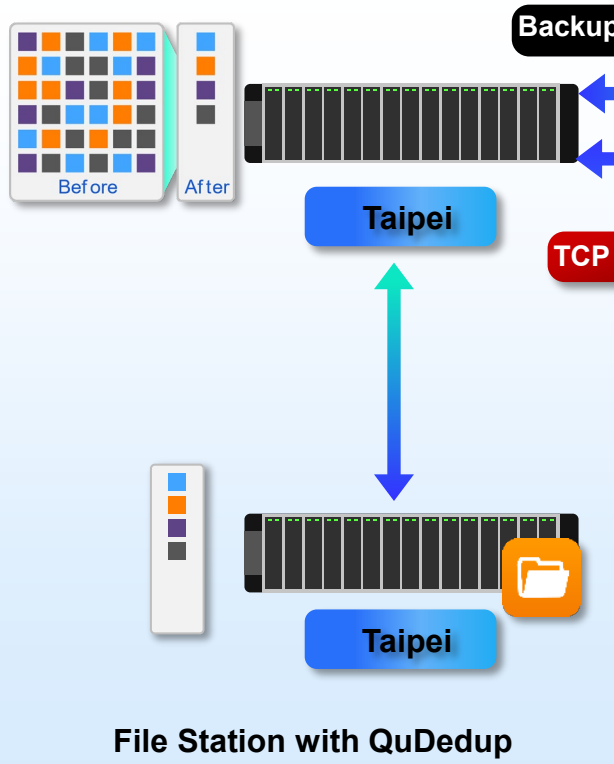

HBS 3 (Hybrid Backup Sync 3)

Local NAS access
(via HBS 3)

Remote NAS access
(via File Station)

Portable use
(QuDedup Extract Tool)

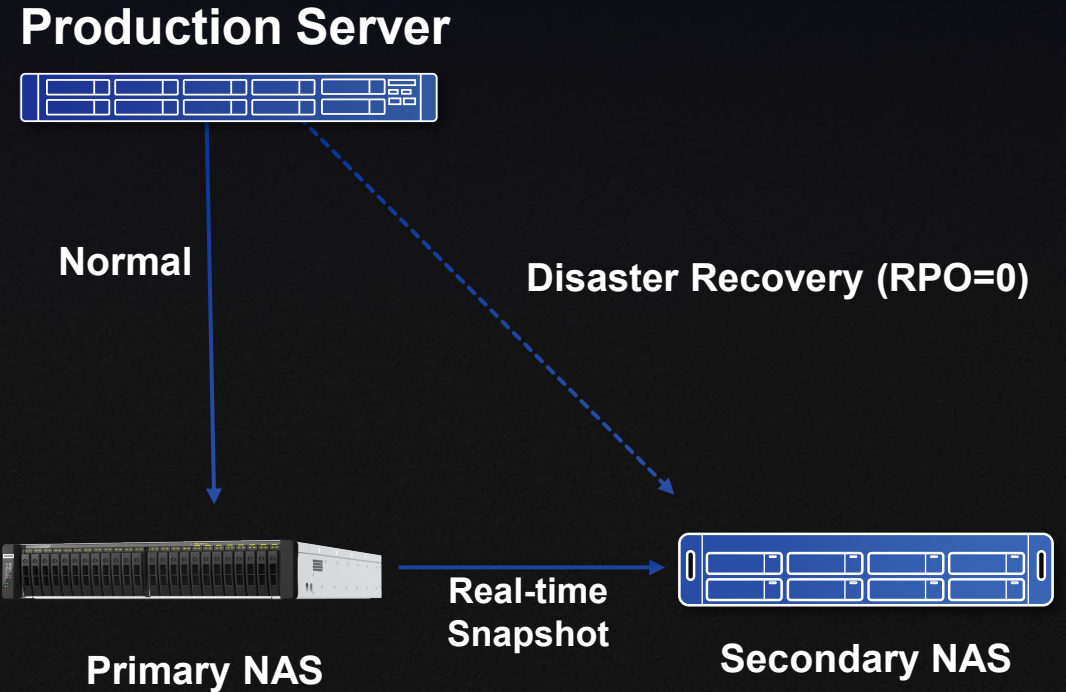

Real-time SnapSync ensures minimal RPO with real-time disaster recovery

Schedule SnapSync: 5min~60min

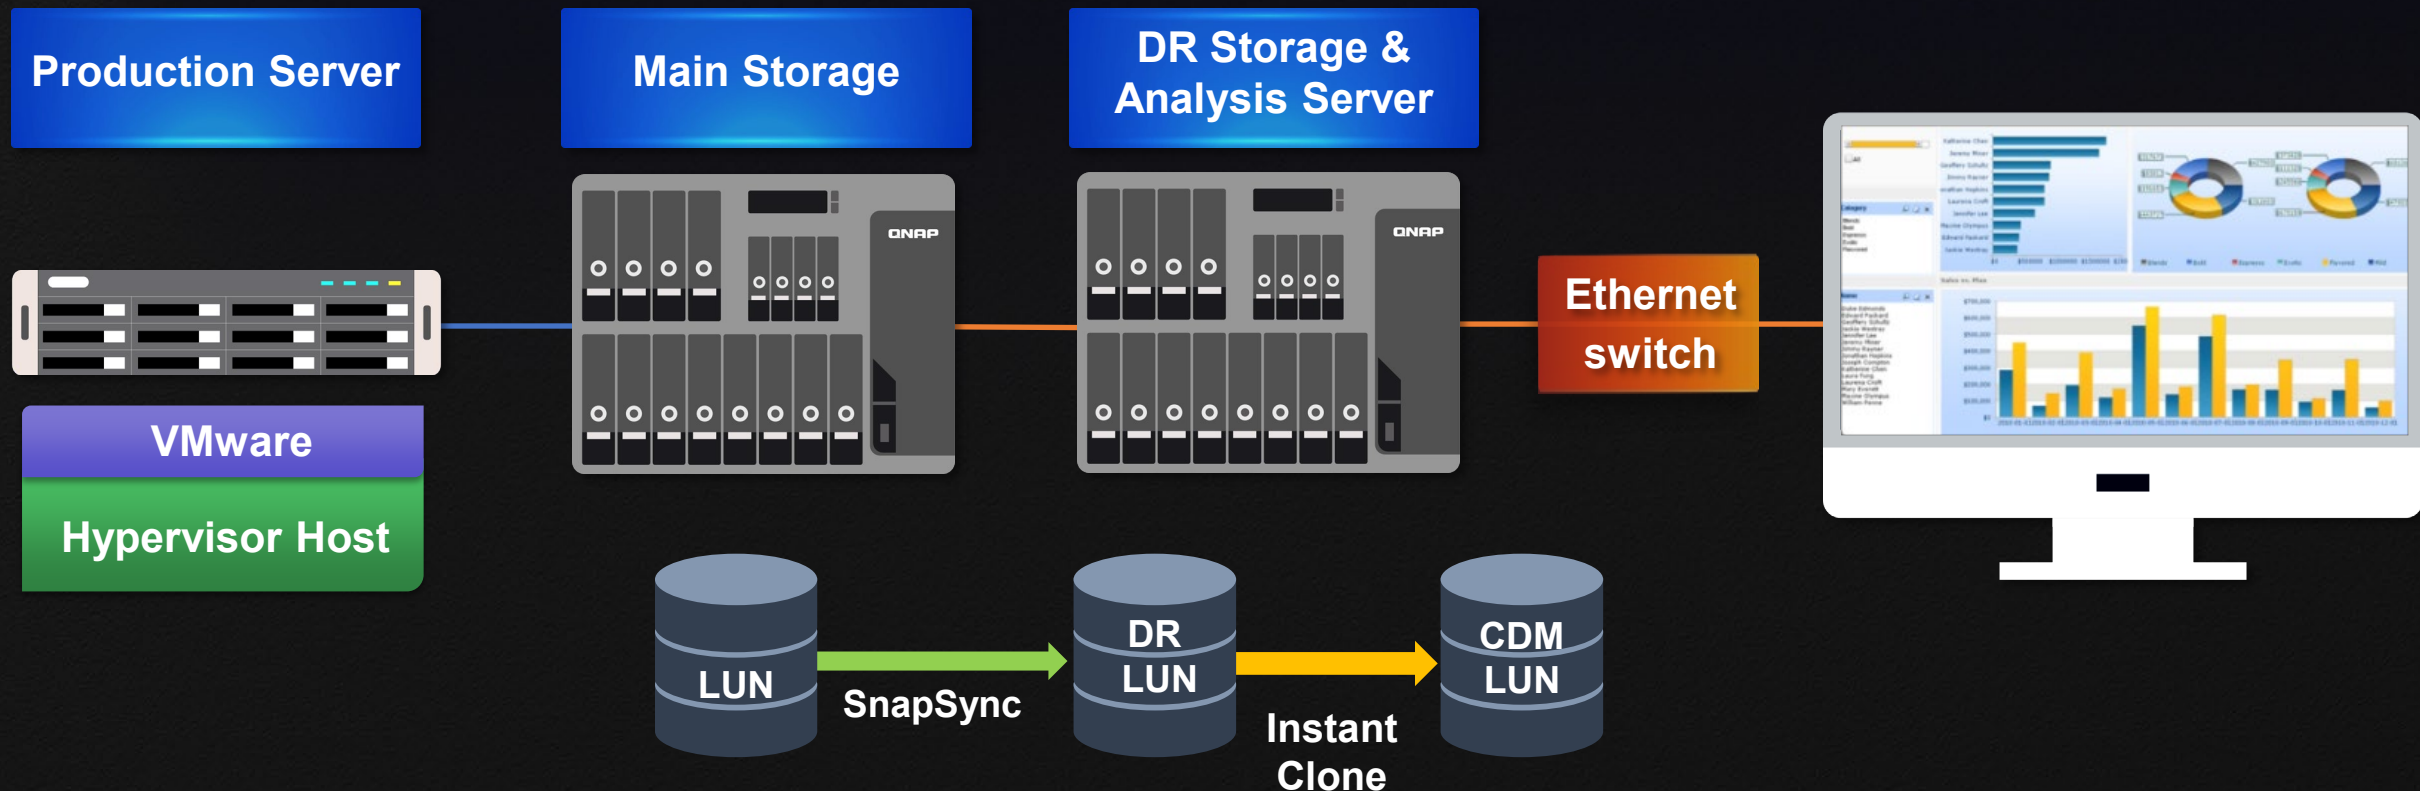

Realtime SnapSync: RPO=0

Direct connected via 25GbE
(Round Trip Latency < 5ms)

SnapSync + Instant Clone

Economical & efficient CDM (Copy Data Management) solution

QNAP QuFTP: set up a secure FTP server for file sharing and exchange

QuFTP Service consolidates all FTP related activities into a single App. With its user-friendly interface and detailed permissions settings, QuFTP Service leverages FTP's efficiency with high security and easy management.

- Folder-level permissions
- QoS (Quality of Service) settings
- Instant event notifications
- Access time restrictions
- Limit access to only the FTP root folder
- Watermark for images & videos
- Detailed logs
- Remotely connect to other NAS

QVPN Service with WireGuard: easier VPN tunnels for remote workers

- WireGuard is an open-source VPN protocol that uses User Datagram Protocol (UDP) for network communication. The protocol uses several cryptography tools to implement secure VPN tunneling.
- The built-in WireGuard® provides faster and stable VPN connections. With a user-friendly interface, non-IT professional remote workers can easily set up VPN tunnels to access office-based QNAP devices with simplified connection methods.

All-in-one solution for hosting virtual machines and containers

Virtualization Station

Virtualization Station allows you to create virtual machines (VM) on Turbo NAS, supporting Windows · Linux® · UNIX® · Android · QuTScloud operating systems.

Container Station

Experience LXD and Docker® lightweight virtualization technologies, download apps from the Docker Hub Registry®, import/export containers, and create abundant microservices.

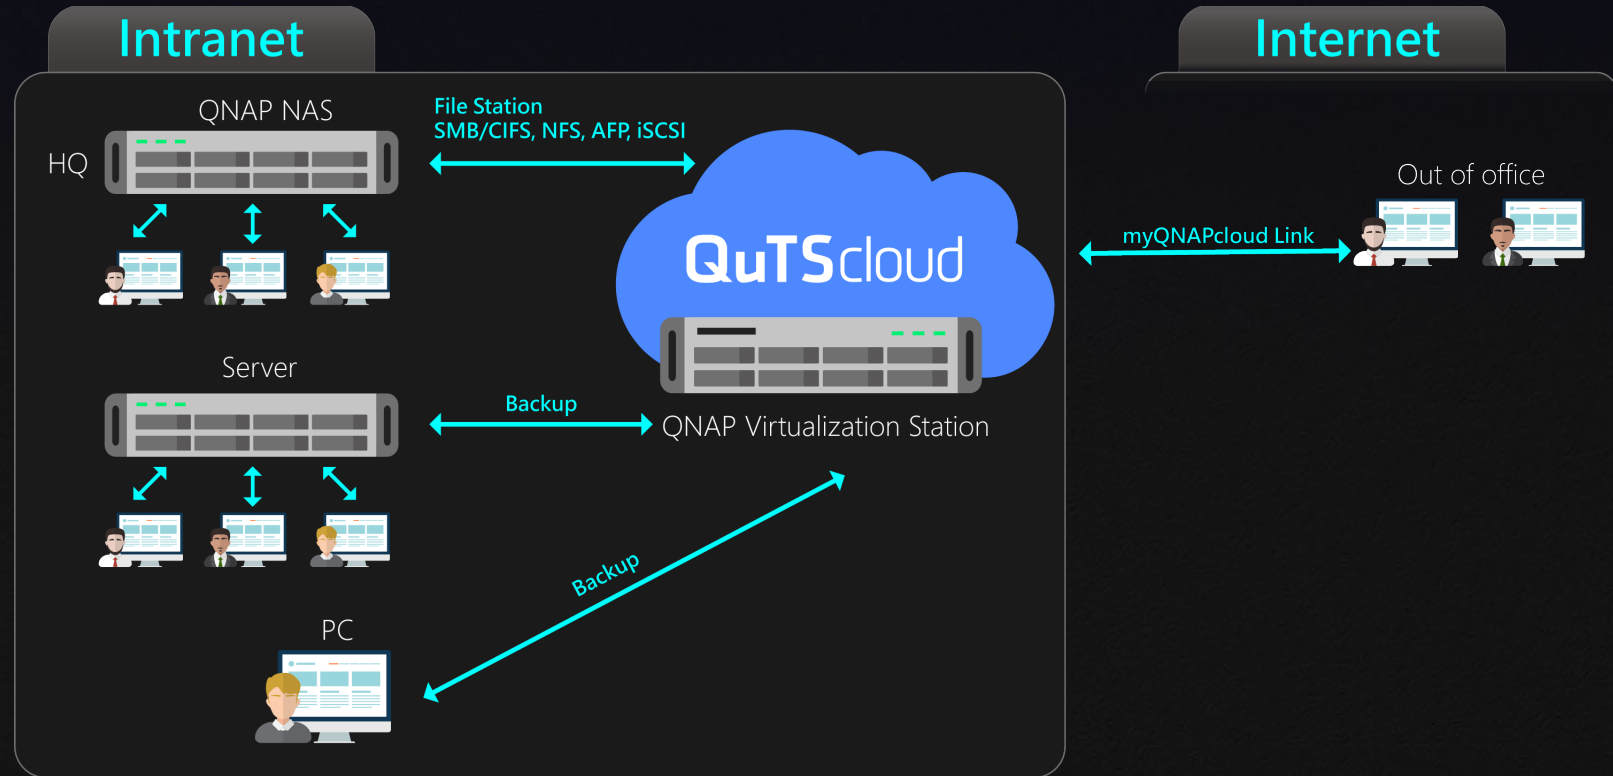

A virtual NAS solution suited for Enterprises and Workgroups

QuTScLOUD is a virtual appliance based on QNAP's QTS Operating system, can be quickly launched on QNAP Virtualization Station.

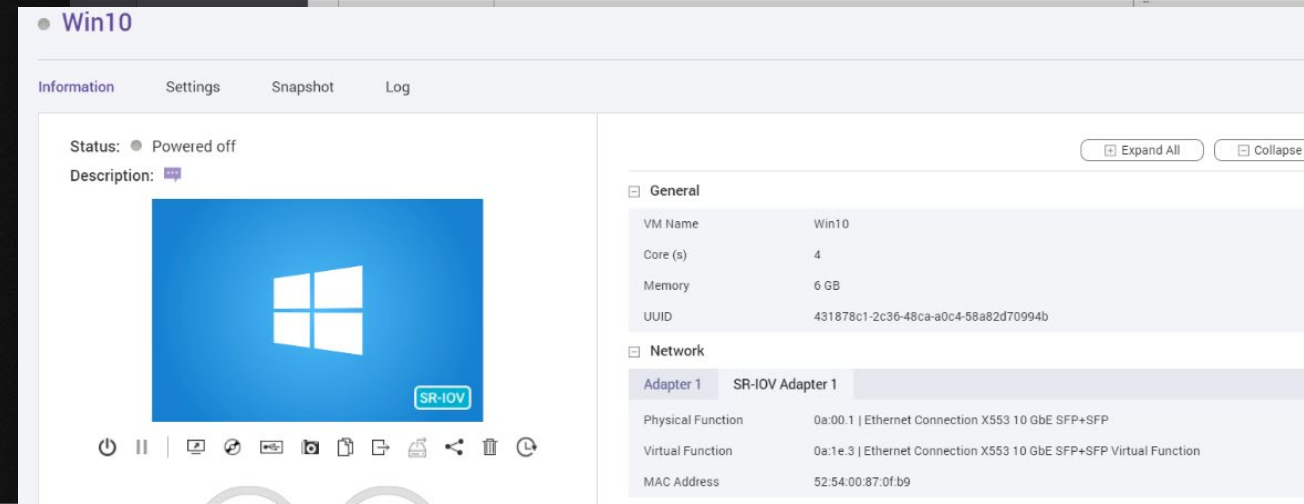

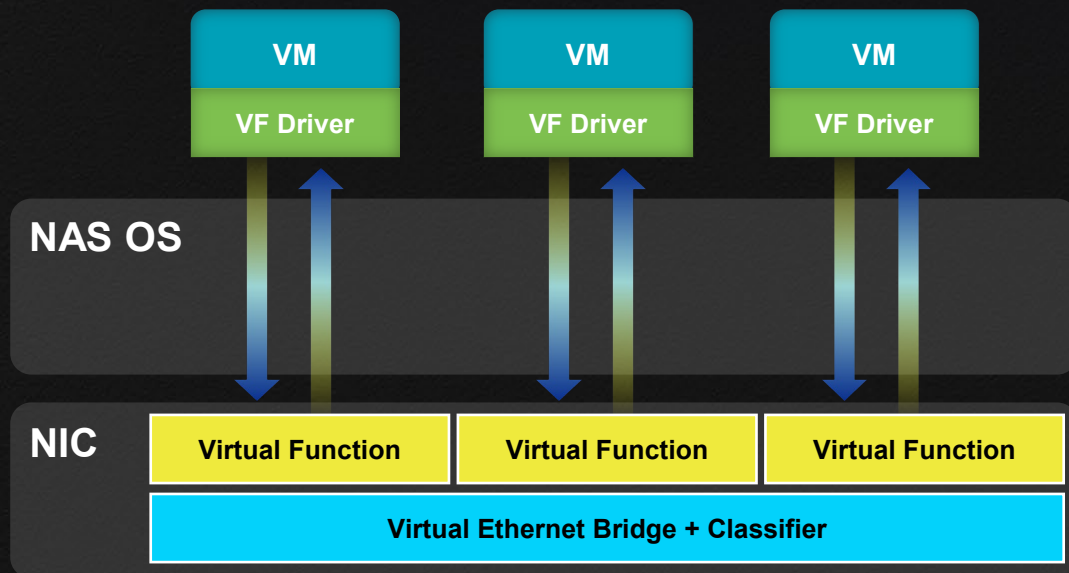

Organizations can increase their budget flexibility by using existing virtual environments, saving hardware space and additional maintenance efforts, and by leveraging the application advantages of the app-ware QuTScLOUD operating system.

SR-IOV improves the network performance of virtual machines by 20% with HW acceleration

SR-IOV (Single-Root Input/Output Virtualization) let the services on your virtual machine enjoy the physical network speed.

- If you need real-time service needs, such as ticket booking service, cash flow service, audio-visual service, you can directly enjoy the speed of the hardware network card, reducing network delay.
- Reduce the usage of the host's CPU.
- Increase network efficiency by at least 20%

Build a comprehensive surveillance system with a QNAP NAS, QVR Elite, and IP cameras

QNAP QVR Elite is a subscription-based smart surveillance solution, allowing you to easily build a surveillance system with lower TCO (subscriptions starting from only US \$1.99 per month) and higher scalability. It also integrates multiple QNAP AI-based video analytics solutions to build smart facial recognition for retail and door access systems with QNAP NAS.

Real-time Monitoring

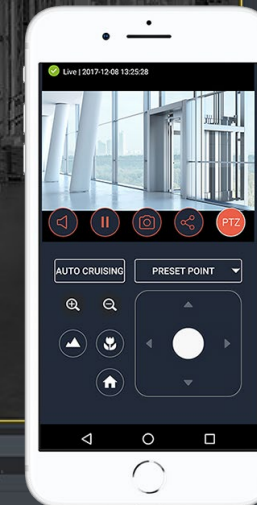

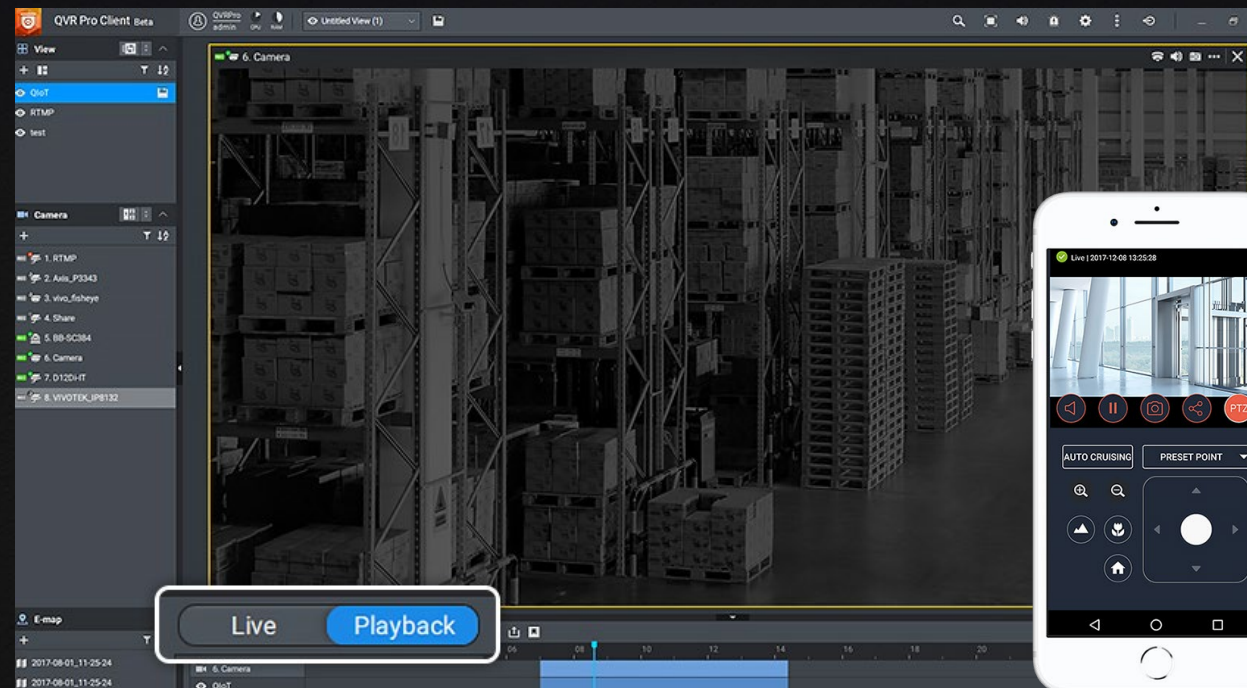

Expandable Capacity

Value-added AI Applications

- Windows / macOS/ iOS / Android QVR Pro client

Support Coral Edge M.2 PCIe and USB TPU for AI enhanced image recognition

- Official certification by Google to support Coral M.2 & USB TPU devices
- Up to 4 TPU devices per NAS
