

Short-depth Rackmount 2.5GbE NAS

# TS-873AeU Series

Optimal Virtualization Performance  
and Hybrid Cloud Applications

## Smaller footprint for bigger opportunities

The TS-873AeU Series is a short-depth rackmount NAS, enabling flexible deployment and allowing for saved space to be used for ventilation and cabling.

## Built-in 2.5GbE connectivity for high-speed file sharing

Features two 2.5GbE ports. Up to 5 Gbps transfer speeds can be achieved using port trunking.

## Extend NAS functionality with PCIe expansion

The TS-873AeU Series comes with two PCIe slots that support installing 10/25/40GbE adapters, QM2 cards, or Fibre Channel expansion cards.

## Optimize your storage efficiency with Qtier and SSD caching

Install two M.2 SSDs in the dedicated M.2 SSD slots to enable SSD caching and Qtier for optimal system performance.
