

# TS-233

NAS of AI Smart home storage series

- Great-value performance, TS-233 uses an ARM 64bit quad-core 2.0GHz CPU. 2GB RAM, GbE, and SATA port to run various home and business NAS applications.
- NPU AI Acceleration, A built-in NPU (Neural network Processing Unit) processor boosts performance for high-speed face recognition.
- Minimalist design, The compact and slim TS-233 prioritizes a clean and essential design that perfectly blends into your home or office.
- Snapshots, Protect your files and data from accidental deletion and malware attacks with snapshots that fully record the system status and data.
