Enterprise-grade SAS 12Gb/s storage expansion supporting multipath routing and daisy chaining

The QNAP logo is displayed in white on a dark background. To its right are three horizontal teal bars. The background features a black and white checkerboard pattern on the left, a large orange semi-circle, and a purple geometric shape on the right.

**QNAP**

- Featuring Broadcom® SAS DataBolt™ bandwidth optimization technology, the TL SAS JBOD consolidates 6Gb/s infrastructure into 12Gb/s.
- The TL SAS JBOD supports multipath routing to achieve smooth data transmission and continuous operations.
- Up to 16 expansion enclosures can be daisy-chained to support up to 4.6PB raw capacity on a QTS/QuTS hero NAS / Windows servers.
- The TL SAS JBOD supports SAS zoning technology, allowing one JBOD to serve as storage expansion for up to four Windows servers.
- Centrally manage the storage space and settings of the TL SAS JBOD with the Storage & Snapshot Manager app on the host NAS.
