

6 port Unmanaged Switch with 10GbE and 2.5GbE connectivity

# QSW-2104 2T

Designed for small/home offices and professionals.

QSW-2104-2T

**10GbE**  
**2.5GbE**

## Flexible deployment with 10GbE and 2.5GbE connectivity

The QSW-2104-2T provides two 10GbE ports and four 2.5GbE ports for connecting a variety of devices with different bandwidth requirements.

## Improve your network infrastructure with QNAP

Build high-speed network solutions to empower IOPS-demanding applications with QNAP switches, NAS, and network adapters.

Plug & Play

## Plug & play. Auto-negotiation for optimal speed of connection.

No complex settings are required! The QSW-2104-2T supports auto-negotiation that optimises the transfer speeds and performance of each connected device.

## Automatic loop detection and blocking to ensure continuous network operation.

The QSW-2104-2T features network loop detection that automatically locks loops to ensure the network environment quickly resumes normal operations.
