

TS-hx87XU-RP Series

Reliable ZFS-based HDD/SSD hybrid storage with server-grade performance.

Hybrid storage architecture, optimized for SSD cache acceleration

The TS-hx87XU-RP rackmount NAS series features unique 6 + x drive bay architectures*, with 6 2.5-inch SSD bays and 12/16/24 HDD bays.

High-speed PCIe Gen 4 slots for additional NAS functionality

PCIe expandability allows for installing 10/25GbE adapters, QM2 cards, or Fibre Channel cards to increase application performance.

* The TS-h987XU-RP NAS has a different drive bay architecture compared to the other three models.

High-speed 10GbE & 2.5GbE connectivity for bandwidth-demanding tasks

Dual 10GBASE-T and dual 2.5GbE high-speed connectivity enhances virtualization, intensive file access, and large backup/restoration tasks.

All-in-one, License-free business backup solution

QNAP's backup solution covers most business systems, including PC/Mac, VMs, containers, popular cloud services, SaaS, and file servers.
