# TS-855X

Powered by Intel Atom® C5125 8-core 2.8GHz processor, support up to 128GB memory, hybrid storage architecture suitable for small and medium-sized enterprises backup and monitoring applications

intel  
ATOM

10  
GBASE-T

# Powered by server-grade Intel 8-core CPU strong performance and expandability

8

Core

## Intel 8-core CPU

Server-grade Intel Atom® C5125 2.8GHz 8-core processor provides powerful NAS performance

## 1 x 10GBASE-T & 2 x 2.5GbE

Integrated 10GBASE-T & dual 2.5 GbE network ports, provide smooth data transmission experience

M.2 SSD

## Dual M.2 PCIe SSD slots

Two PCIe Gen3 x4 M.2 2280 slots for optimal configuration of NVMe SSD and 3.5" SATA HDD

## 2 x PCIe Gen3 x4 slots

Provide a variety of expansions including 10G/25GbE network card, M.2, HBA and other expansion cards

128 GB

## Maximum 128 GB memory

Pre-installed 8 GB non-ECC memory with 4 x DDR4 UDIMM slots, optionally support highly reliable ECC memory modules

## Hybrid architecture

6 x 3.5"/2.5" SATA HDD + 2 x 2.5" SATA SSD provide a hybrid NAS with high cost performance ratio

# Choose between QTS and ZFS based QuTS hero

TS-855X is shipped with the QTS operating system, which has powerful data transmission performance and more efficient memory usage, and enjoys the Qtier automatic tiered storage function. You can also change to the QuTS hero operating system according to your needs

	QuTS hero	QTS
<b>Filesystem</b>	ZFS	Ext4
<b>SSD cache</b>	Read Cache	Read/Write Cache Read Cache Write Cache
<b>Inline Compression</b>	Yes (LZ4 compression, ideal for RAW files and document files)	No
<b>Inline Deduplication</b>	Yes (At least 16 GB RAM required)	No
<b>HBS with QuDedup for Remote Backup</b>	Yes	Yes
<b>Power Failure Protection (Software)</b>	ZIL Copy-on-Write	No
<b>Permission Management</b>	Rich ACL (14 types)	POSIX ACLs (3 types) + certain special permissions
<b>Capacity Expansion</b>	Upgrade RAID capacity Change higher capacity disk drives Attach expansion enclosures/JBODs	Add a disk drive to a RAID group Upgrade RAID capacity Change higher capacity disk drives Attach expansion enclosures/JBODs
<b>Data Security</b>	Better (Self-Healing & Copy-on-Write)	Standard
<b>Recommendation SSD Configuration for Video Editing Applications</b>	Use SSD Pools Note: Set the block size 128K when creating Folders/LUNs	Editing (from original/RAW files): Use SSD Pools Post production: Enable Read/Write cache Note: Set the block size to 32K or 64K when creating Volumes, and choose "All I/O" for cache mode.

# Support Intel QAT and SR-IOV to increase efficiency

## SR-IOV

### SR-IOV Network I/O Virtualization

Install a PCIe network card that supports SR-IOV technology, and directly allocate the bandwidth resources of the physical network card to the virtual machine.

## QAT

### Intel® QAT hardware acceleration

Supports the Intel® QuickAssist hardware acceleration engine (Intel® QAT), which accelerates data compression/decompression, and can greatly improve the performance of encryption and decryption transmission operations

# Live Demo

Hardware introduction and RAM expansion

**QNAP**

# QTS 5.1.0

Boosted performance,  
flexible management, and  
higher security

# SMB Multichannel for doubled speed

A SMB 3 client automatically establishes multiple connections to the SMB server for a single SMB session. The connection also provides bandwidth aggregation and network fault tolerance.

Requirement: Both NAS and Client device support SMB 3.0 protocol. NAS: QTS 5.1.0 (or later), QuTS hero h5.1.0 (or later). Clients: Windows Server 2012 (or later), macOS Big Sur 11.3.1 (or later)

## Without Multichannel

## With Multichannel

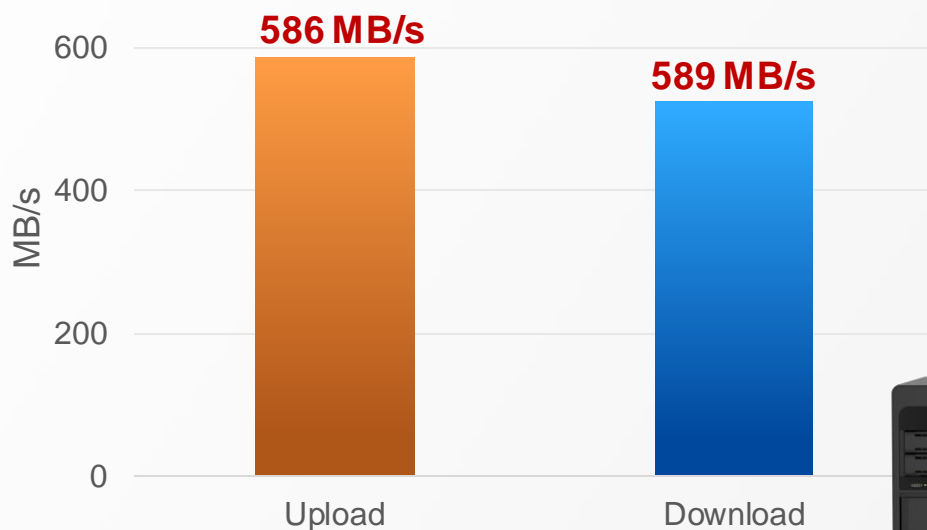

Faster!

Network fault tolerance!

# Built in 10GBASE-T and dual 2.5 GbE ports bring essential performance out of the box

## 2 x 2.5GbE Windows File Transfer

## 1 x 10GbE SMB Sequential Throughput (1MB)

Test environment:

NAS: TS-855X

OS: QTS 5.0.1

Volume type: RAID 5; 8 x Samsung 860 EVO 1TB

Client PC: Windows Server 2016, Intel i7-6700 3.4GHz, 64GB RAM,

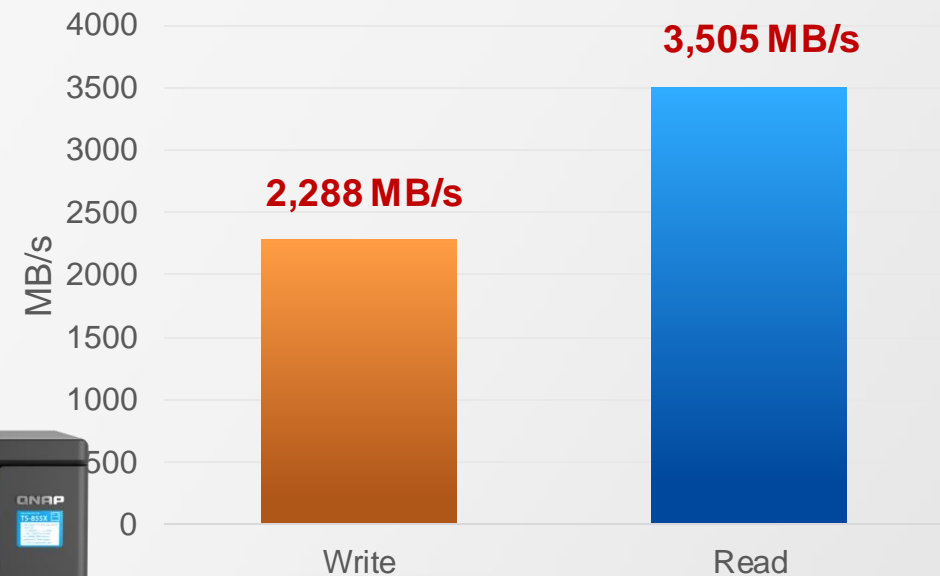

IOmeter: RAM\*4, 30-sec ramp up time, 3-min seq. run time, 1 worker, 32-outstanding

# Dual PCIe Gen3 slots for 25GbE network expansion

## 1 x 25GbE SMB Sequential Throughput (1MB)

## 2x 25GbE SMB Sequential Throughput (1MB)

QXG-25G2SF-CX6  
2 x 25GbE SFP28 NIC

# Qsync 5.0 – Cross-device file sync for individuals and teams

Qsync enables efficient file synchronization between a QNAP NAS and linked devices such as computers, laptops, and mobile devices. With Qsync, you can easily access data across all your devices and share it among your team members.

If you own many devices, any file changed on one device will be automatically synchronized with the others.

For team works, any file changed will be automatically distributed to your teams' devices, accelerating and streamlining your workflows.

# DA Drive Analyzer disk failure prediction

Each NAS can perform one disk prediction for free, and you can also pay to subscribe to enhance protection for all disks.

The screenshot shows the DA Drive Analyzer interface. On the left is a navigation menu with 'Overview' selected. The main area displays an 'Overview' section with a summary of drive enclosures and drives, and a status bar showing 5 Faulty, 4 Critical, 9 Warning, and 1 Normal drives. Below this is a table of drive status and a license information section.

**Overview**

DA Drive Analyzer  
Drive enclosures: 2, Drives: 21 (HDD: 19; SSD: 0; NVMe drives: 2)

Email alert: [Activated](#)

**5** Faulty  
Defective drive detected.  
Replace the drive.

**4** Critical  
90% risk of failure  
Replace the drive as soon as possible.

**9** Warning  
70% risk of failure  
Start planning for a drive replacement.

**1** Normal  
Drive(s) are functioning normally.

**0** Data Analysis in Progress  
There are no new drives in the cloud AI data analysis stage.

**Important: Review Drive Status**  
Drives: 18 (Faulty: 5, Critical: 4, Warning: 9)

Drive (Drive Enclosure)	Severity Level	Drive Manufacturer	Drive Capacity
Disk 1 (NAS Host)	Warning	ST320LM001	298.09 GB
Disk 2 (NAS Host)	Warning	WDC	298.09 GB
Disk 4 (NAS Host)	Faulty	ST320LM001	298.09 GB
Disk 7 (NAS Host)	Warning	TOSHIBA	298.09 GB
Disk 8 (NAS Host)	Critical	WDC	298.09 GB
Disk 9 (NAS Host)	Faulty	TOSHIBA	298.09 GB

**License**

License plan: BETA  
Valid until: 2022-02-18

## Disk health analysis and failure prediction

DA Drive Analyzer integrated ULINK AI predict technology can warn you before disk failure, help you protect valuable data

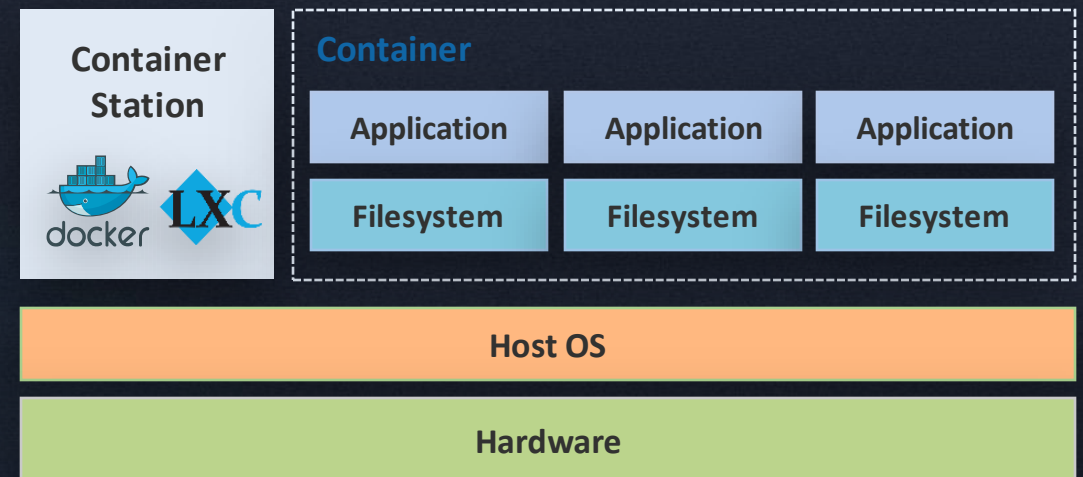

# All-in-one solution for hosting virtual machines and containerized apps

Virtualization Station allows you to create virtual machines (VM) on Turbo NAS, supporting Windows® · Linux® operating systems.

Experience LXD and Docker® lightweight virtualization technologies, download apps from the Docker Hub Registry®, import/export containers, and create abundant microservices.

# Data security

## QuFirewall

You can allow/deny IP addresses and regions to prevent unauthorized access and brute force attacks for safeguarding data and service security.

## Malware Remover

Protect your NAS data against malware attacks

The screenshot shows the QuFirewall application window. On the left, there is a sidebar with a 'Firewall' toggle switch set to 'ON' and a notification that 'QuFirewall has denied access to 1 events in the last 24 hours.' Below this are menu items for 'Firewall Profiles', 'Event Counts', 'Capture Events', and 'Notification Settings'. The main area displays 'Firewall Profiles : 3' with an 'Add Profile' button. A table lists the profiles:

Profile Name	Rules	Action
> <input checked="" type="checkbox"/> Basic protection Enabled	6	✎ ⋮
> <input type="checkbox"/> Include subnets only	4	✎ ⋮
> <input type="checkbox"/> Restricted security	40	✎ ⋮

The screenshot shows the Malware Remover application window. On the left, there is a sidebar with menu items for 'Scan', 'Settings', and 'Event Logs'. The main area features a large blue circular button with a stethoscope icon labeled 'Start Scan'. Below this, there are two columns of scan information:

Scheduled Scan Daily, 03:00	Last Scan 20 second(s) ago.
Instant scan after malware definition updates Enabled	Last Scan Status Scan Complete

# Snapshots Help You Fight with Ransomware Threats

TS-855X supports Snapshot, like taking a photo - within seconds the complete status of your NAS system and data is recorded.

QTS supports up to 1,024 snapshots, QuTS hero supports up to 65,536 snapshots

Mitigate the growing threat of ransomware

## Step 1

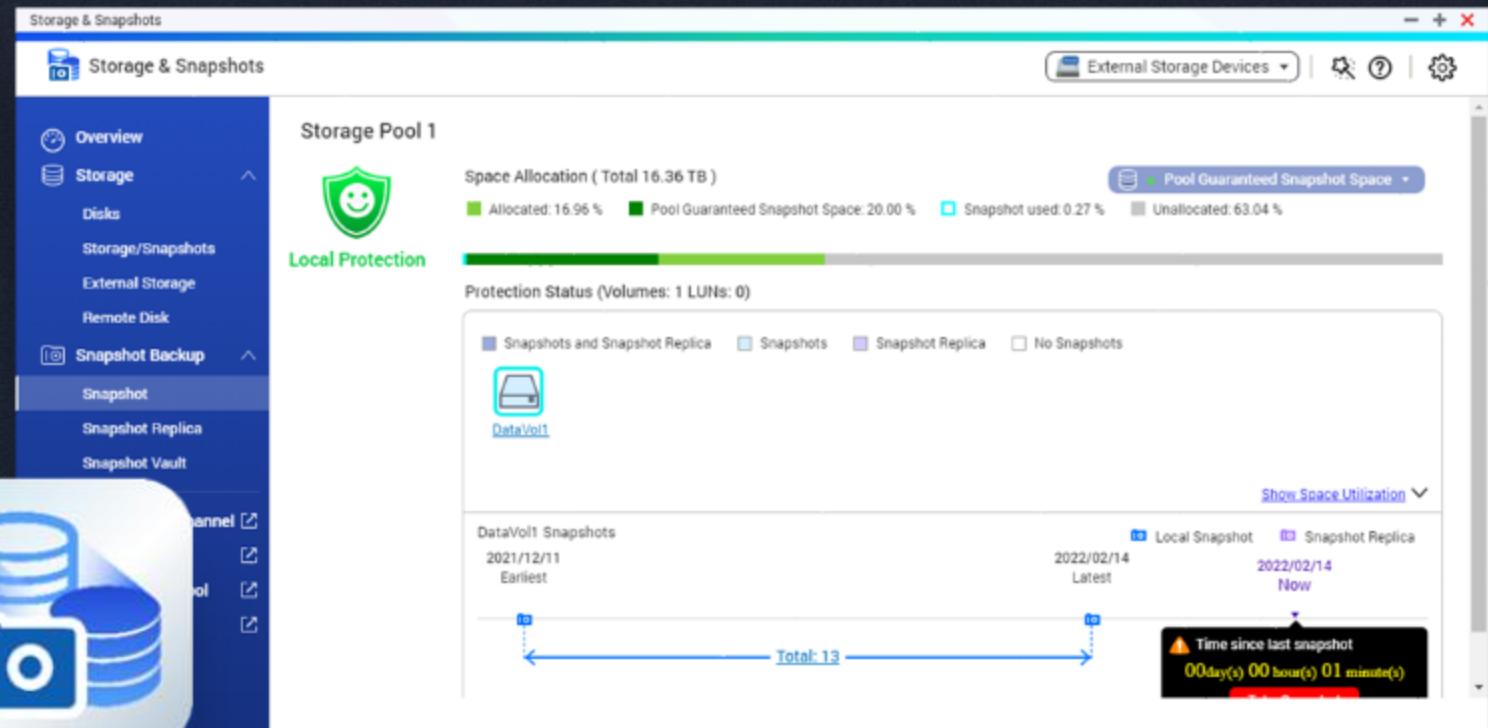

Regularly update, and use Malware Remover

## Step 2

Routinely back up to your NAS, and create multi-version snapshots

## Step 3

Back up snapshots to another QNAP NAS

# Your NAS is also a surveillance server

## QVR Pro

- 6,000+ Compatible cameras
- 8 embedded monitoring channels
- Expand to 36 channels by purchasing QVR Pro licenses
- View USB camera images through QUSBCam2

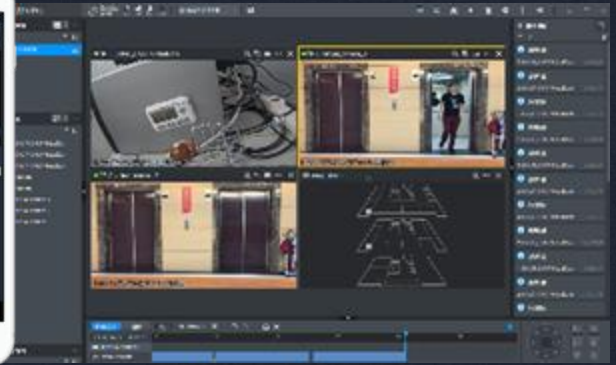

## QVR Elite

The flexible subscription QVR Elite can be expanded to a maximum of 54 channels by purchasing licenses

## QVR Pro Client

- iOS & Android mobile devices
- Support cross-platform : Windows, Mac, Ubuntu
- Use HDMI output and USB keyboard and mouse to control the NAS through installing Graphic card
