

TS-AI642

AI NAS with a power-efficient ARM SoC processor and NPU for AI-powered video and image recognition applications

- Specialized for AI image recognition and smart surveillance applications
- 8-core power-efficient ARM processor offers the ideal balance of performance and price
- Built-in NPU for accelerating image recognition workloads in QNAP's AI-powered apps
- Built-in dual 4K HDMI output for real-time multi-channel surveillance
- More features including 2.5GbE connectivity and a PCIe Gen3 slot for 10GbE expansion
