

QIoT Suite Lite

Rapidly design your own IoT stack

IoT Applications

Smart Home

Intelligent entrance controls,
Indoor temperature and
humidity adjustments

Industry

Soil liquefaction, Nutrient
detection, Science
Applications

Smart Life

Smart parking, Healthcare,
Personal Fitness

QIoT Suite provide a variety of protocols and dashboard applications that enable developers to easily utilize the sensors on development boards, and set up apps such as MQTT, Node-RED and Freeboard on a QNAP NAS. Data received from the sensors will be sent to the QNAP NAS, while users can remotely monitor their home environment with the dashboard.
