

7 Reasons Why You Need a NAS

Flexible and Secure Storage Space

NAS is a storage center that can flexibly scale up the storage for growing data and leveraging RAID data protection technology.

01

Photo Management Made Easy

Upload phone photos to QNAP NAS. AI organizes albums for easy browsing and searching.

03

Share, Sync, and Manage Files on the Go

QNAP NAS offers remote file sharing and synchronization through mobile apps, smart search, and centralized control of other NAS devices and cloud storage.

02

Well-rounded Data Protection

Use snapshots for data restoration and enjoy safe remote connection through myQNAPcloud Link service.

04

Integrated with Your Using Cloud

Mount public cloud storage to NAS for centralized management and backup, achieving a balance between security and convenience.

05

Building Home Security Surveillance is Also Easy

Set up a surveillance system with a QNAP NAS and QVR Elite software along with compatible cameras.

06

NAS, Also a Multifunctional Computer

- NAS becomes your personal computer
- Host a WordPress site on NAS
- Video Post-Production

07
