

AMIZcloud Management Platform for NAS

Remotely monitor groups of NAS devices for health, performance, and security risks. Centrally manage firmware and app updates.

QNAP provides the exclusive AMIZcloud Management Platform, allowing IT administrators to efficiently manage multiple NAS and QNAP network devices anytime, anywhere.

Organization Center

Unlike the traditional way of managing devices via single administrator account

myQNAPcloud

Access your remote NAS securely or bind multiple QNAP devices into Organization Center.

AMIZcloud

Centrally monitor and manage systems and security risks of multiple QNAP devices, or remotely deploy VNF on QuCPE.
