

# QNAP's Advanced Solutions for Back up and ADRA NDR

## AMIZcloud

QNAP Cloud Management Platform  
for Multiple NAS & Devices

QNAP's AMIZ Cloud Management Platform enables IT administrators to Centrally monitor and manage multiple QNAP devices, or remotely deploy VNF on QuCPE.

## Hyper Data Protector

License-free VMware® & Hyper-V,  
PC & server backup

Hyper Data Protector features incremental backup, global deduplication, backup scheduling, and recovery compression to save on backup time, storage, and recovery time greatly. With no licenses or extra costs, Hyper Data Protector is ideal for creating a cost-effective and reliable recovery plan.

## myQNAPcloud Storage

QNAP-hosted cloud storage

Back up NAS data to myQNAPcloud Storage, the perfect partner for QNAP's multi cloud solutions, including Hybrid Backup Sync, Hybrid Backup Center, and QuTScoud.

## QuWAN SD-WAN solution

QuWAN SD-WAN solution

Offering Auto Mesh VPN, IPsec encryption, and cloud management via QVPN Service for multi-site networks. It supports various QNAP products and platforms like VMware ESXi, helping SMBs build reliable networks affordably, and promoting digital transformation, multi-site expansion, and remote work.

# QNAP Smart Video Surveillance

## Build AI Video Surveillance System with QVR Surveillance Solution

### Secure surveillance system

Build a comprehensive surveillance system with QNAP NAS.

**QVR Pro**

For long-term enterprise surveillance environments, QNAP offers the QVR Pro surveillance system with a royalty-free license. Such advanced features as complete support for surveillance backup (QVR Guard) and offline use can meet the demand for high stability and security in medium-to-large surveillance use cases.

**QVR Elite**

For users needing a fundamental surveillance solution, they can opt to subscribe to QVR Elite. This solution requires a QNAP NAS with 1 GB memory and has a monthly subscription. The license can be transferred to another NAS at any time, which makes it a flexible and affordable surveillance option.

- Flexible recording space management.
- No vendor lock-in for cameras.
- Send and receive real-time notifications.
- Precise permission controls.

- Detailed operation logs.
- Metadata and unified API support.
- Failover design.
- Central management.

**QVR Pro Client**

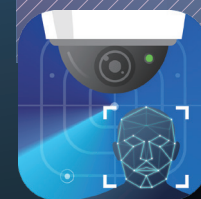

The QVR Pro Client client software can be installed on Windows® and Mac® devices or in QNAP NAS, supporting QVR Pro, QVR Elite and QVP series surveillance appliances. You can browse multiple channels at once, enjoying efficient and easy management of surveillance recordings.

- User-friendly surveillance dashboard
- Detect incidents and alarm notifications

- Accelerate searching for incidents with AI
- Supports facial recognition and search

### AI-powered image recognition

Integrate intelligent video analysis into your surveillance system with QNAP's AI-powered technology.

**QVR Face**

With QVR Facesmart facial recognition, recordings can be dynamically analyzed and streamed to achieve real-time and automatic facial recognition and analysis. Faces can be detected even if obscured (for example, when wearing a mask).

**QVR DoorAccess**

QVR DoorAccess is an intelligent door system that can be integrated into an existing door access system from AXIS and HUNDURE. Schedule when and what group of people can access it.

**QVR Human**

QVR Human can count the number of people passing through the detection line or detect the people density in specific regions to send notifications or establish the analysis report of people flows in real-time.

**QVR Smart Search**

QVR Smart Search helps you efficiently search through hundreds of hours of video recordings from hundreds of cameras to find specific events. AI smart search can perform the analysis in the background without impacting the recording performance. It takes only one and a half minutes to analyze one-hour videos.
