

# Boxafe 2.0

Back up Google™ Workspace and Microsoft 365® to the QNAP NAS, on-premise, or cloud

## Backup to NAS or cloud

Back up SaaS data to not only a local QNAP NAS, but also to On-Premise servers or a cloud-based QuTScloud

## Sub-domain backup

Back up data across all sub-domains along with the main domain through one user interface.

## Roles and permissions

Organize and simplify backup by designating backup/restore job permissions with user roles such as Backup Manager and Auditor.

## Improved backup management

Backup with customized storage paths, including local spaces or remote storage via iSCSI.

## Access logs

Keep detailed logs of activities performed using Boxafe to protect company data from being mishandled.

## Secondary backup for doubled protection

Protect your data with easy secondary backup using Hybrid Backup Sync and the relinking function to existing backup data.
