

# QNAP

TS-233

Save you money and time.  
The best entry-level NAS storage.

TS-433

Build a personal private cloud & home multimedia center with a built-in NPU

TS-464

Bye-bye Gigabit NAS,  
hello 2.5GbE NAS.

## 7 Reasons Why You Need a NAS

### 1 Flexible and Secure Storage Space

NAS is a storage center that can flexibly scale up the storage for growing data and leveraging RAID data protection technology.

### 2 Share, Sync, and Manage Files on the Go

QNAP NAS offers remote file sharing and synchronization through mobile apps, smart search, and centralized control of other NAS devices and cloud storage.

### 3 Photo Management Made Easy

Upload phone photos to QNAP NAS. AI organizes albums for easy browsing and searching.

### 4 Well-rounded Data Protection

Use snapshots for data restoration and enjoy safe remote connection through myQNAPcloud Link service.

### 5 Integrated with Your Using Cloud

Mount public cloud storage to NAS for centralized management and backup, achieving a balance between security and convenience.

### 6 Building Home Security Surveillance is Also Easy

Set up a surveillance system with a QNAP NAS and QVR Elite software along with compatible cameras.

### 7 NAS, Also a Multifunctional Computer

- ✓ NAS becomes your personal computer
- ✓ Host a WordPress site on NAS
- ✓ Video Post-Production
