

# SaaS Backup with Boxafe

Are You Backing up Your Microsoft 365 & Google Workspace Accounts?

When mapping out your storage infrastructure, are you considering the gravity of your SaaS data holding countless emails and work products? Whether an employee leaves, and you want to retain their Google Workspace or Microsoft 365 data, or someone deletes an email that turned out to be more important than they thought, having a Google / Microsoft SaaS backup solution should be a key component of your overall backup strategy.

## Incremental backups

Only backs up changed data, saving time and storage space

## Automated scheduling

Set schedules to automatically perform backups

## Advanced search

Search various file metadata like file name, owner, date, and more

## Granular restore

Restore specific files rather than the entire backup
