

QSW-M3224-24T

24-Port 10GbE L3 Lite Managed Switch

Featuring MC-LAG redundancy and AV-over-IP applications

24-port 10GbE for connecting more high-speed network devices

QSW-M3224-24T features 24-port 10G/Multi-Gigabit Ethernet and offers 480Gbps of switching capacity for connecting 10GbE NAS, servers and computers.

L3 Lite management achieves secure and high-speed network infrastructure

Provides IP settings (IPv4, IPv6, DNS), static routing, DHCP server, SNTP and advanced VLAN settings to deploy and manage high-performance and secure enterprise network infrastructure.

MC-LAG network redundancy for High Availability

Business continuity can be ensured with both server-level and network-level High Availability. Implement QSW-M3224-24T switches with MC-LAG network redundancy to guarantee uninterrupted network switching.

VLANs IP routing and advanced VLANs

Stable IP routing and inter-segment communication are crucial for larger networks with more switches and end devices. The QSW-M3224-24T uses advanced VLAN technology for efficient traffic control and secure segmentation.
