

High Availability Solutions

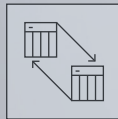

Maximize service uptime with automatic failover

Active-Active HA

Dual-active controller NAS

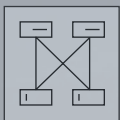

High availability storage with optimized performance and capacity

Active-Passive HA

Dual-NAS HA architecture

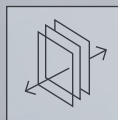

Ensuring uninterrupted critical business operations

Network HA

Enhance switch

level availability for always-on connectivity

Scale-out Storage

MEGA Scale-out NAS

Delivers scalable, resilient storage with data safety and seamless expansion

- Lower TCO: No need for costly proprietary hardware; QNAP HA is budget-friendly.
- Flexible Deployment: Supports dual NAS or dual-controller setups to match your infrastructure.
- Automatic Failover: Instant failover minimizes service interruptions.
- End-to-End Availability: High availability from NAS to network switch, for true 24/7 uptime.
