

Active-Active HA

Dual-active controller NAS

High availability storage
with optimized performance and capacity

Dual-Controller Architecture for Continuous Operations

Both controllers run simultaneously, balancing workloads and ensuring instant failover to maintain near-zero RPO and uninterrupted business operations.

Redundant SAS Paths with Multi-Protocol Flexibility

Dual-path SAS ensures seamless connectivity and high availability, while supporting SMB, NFS, and iSCSI for diverse deployment needs.

QES + ZFS for Enterprise-Class Data Integrity

Powered by QES and ZFS, with built-in self-healing, in-line compression, deduplication, and robust snapshot capabilities

Recommended Model

ES2486dc

24-bay SAS 12Gb/s all-flash NAS

ES1686dc R2

16-bay NAS, supporting SAS 12Gb/s HDDs/SSDs
