

# High Availability Solutions

Maximize service uptime with automatic failover

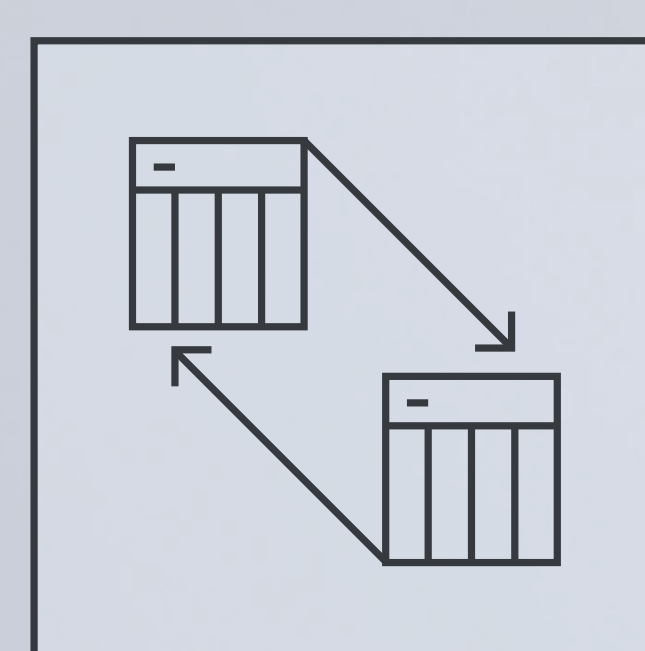

QNAP High Availability Solution offers cost-effective, flexible, and continuous availability for modern IT environments without relying on expensive proprietary hardware. Choose flexible dual-NAS or dual-controller setups, and rely on instant failover to keep services running. From NAS to switch, QNAP delivers true end-to-end high availability.

## Active-Active HA

### Dual-active controller NAS

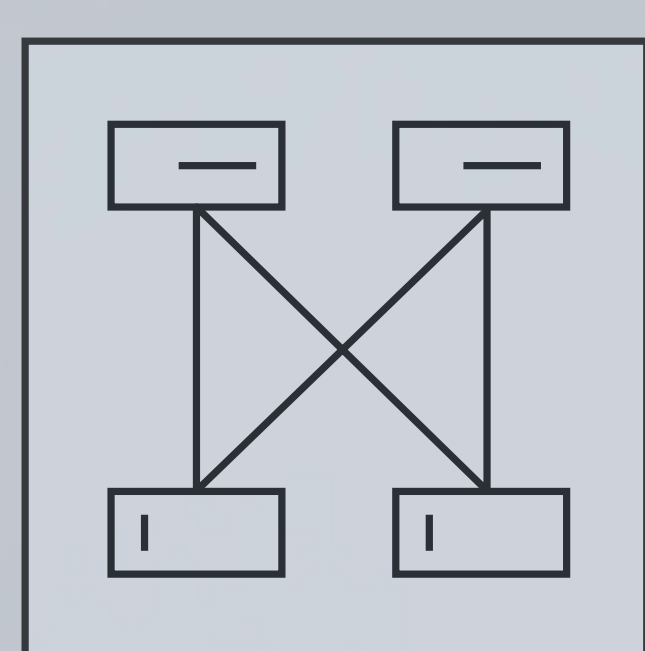

High availability storage with optimized performance and capacity

## Active-Passive HA

### Dual-NAS HA architecture

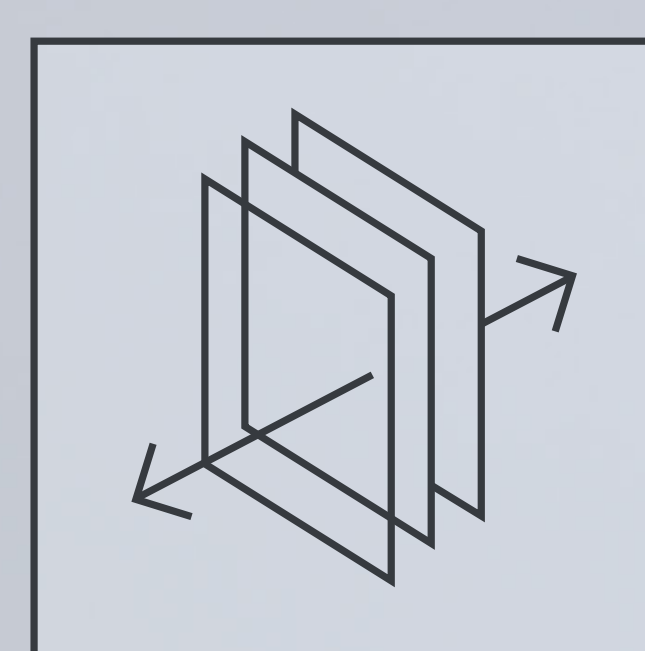

Ensuring uninterrupted critical business operations

## Network HA

### Enhance switch

level availability for always-on connectivity

## Scale-out Storage

### MEGA Scale-out NAS

Delivers scalable, resilient storage with data safety and seamless expansion
