

QuTS hero

Unlock Superior NAS Performance & Security

Boost BCP and protect against ransomware with HA support and Immutable Snapshots for a secure, reliable NAS.

Unrivaed Performance

- Boost data processing speed with multi-core processors
- SSD-optimized models for superior performance and responsiveness

Uncompromising Reliability

- ZFS (CoW method) minimizes the risk of data loss
- Automatic detection, repair, and restoration for seamless data integrity

Maximized ROI

- Real-time de-duplication maximizes storage efficiency
- SSD optimization ensures long-lasting durability and cost-effective operations

QuTS hero NAS

Your Ultimate ZFS Storage Solution

Exclusive RAID-Z Disk Management by ZFS

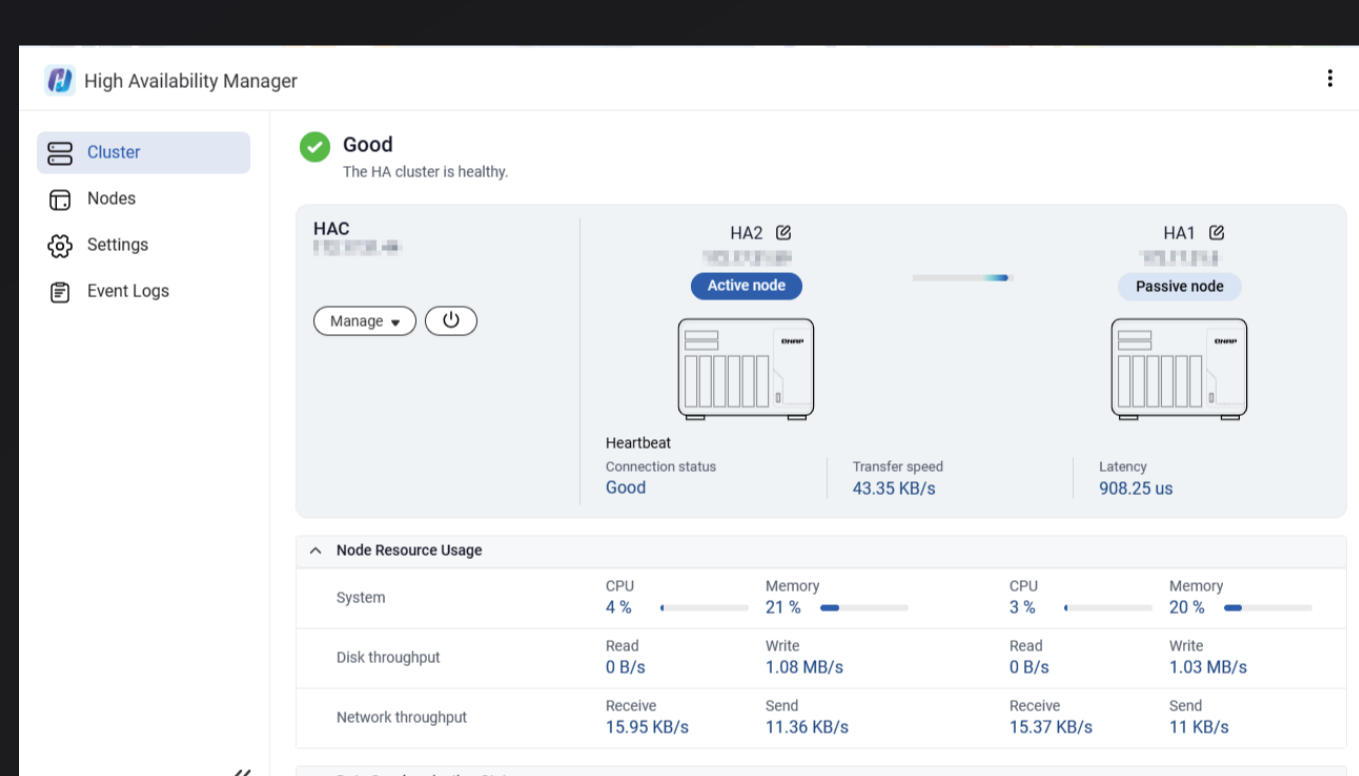

Automated Data Check System for Peace of Mind

WORM (Write Once, Read Many) for Data Protection

Active Damage Prevention

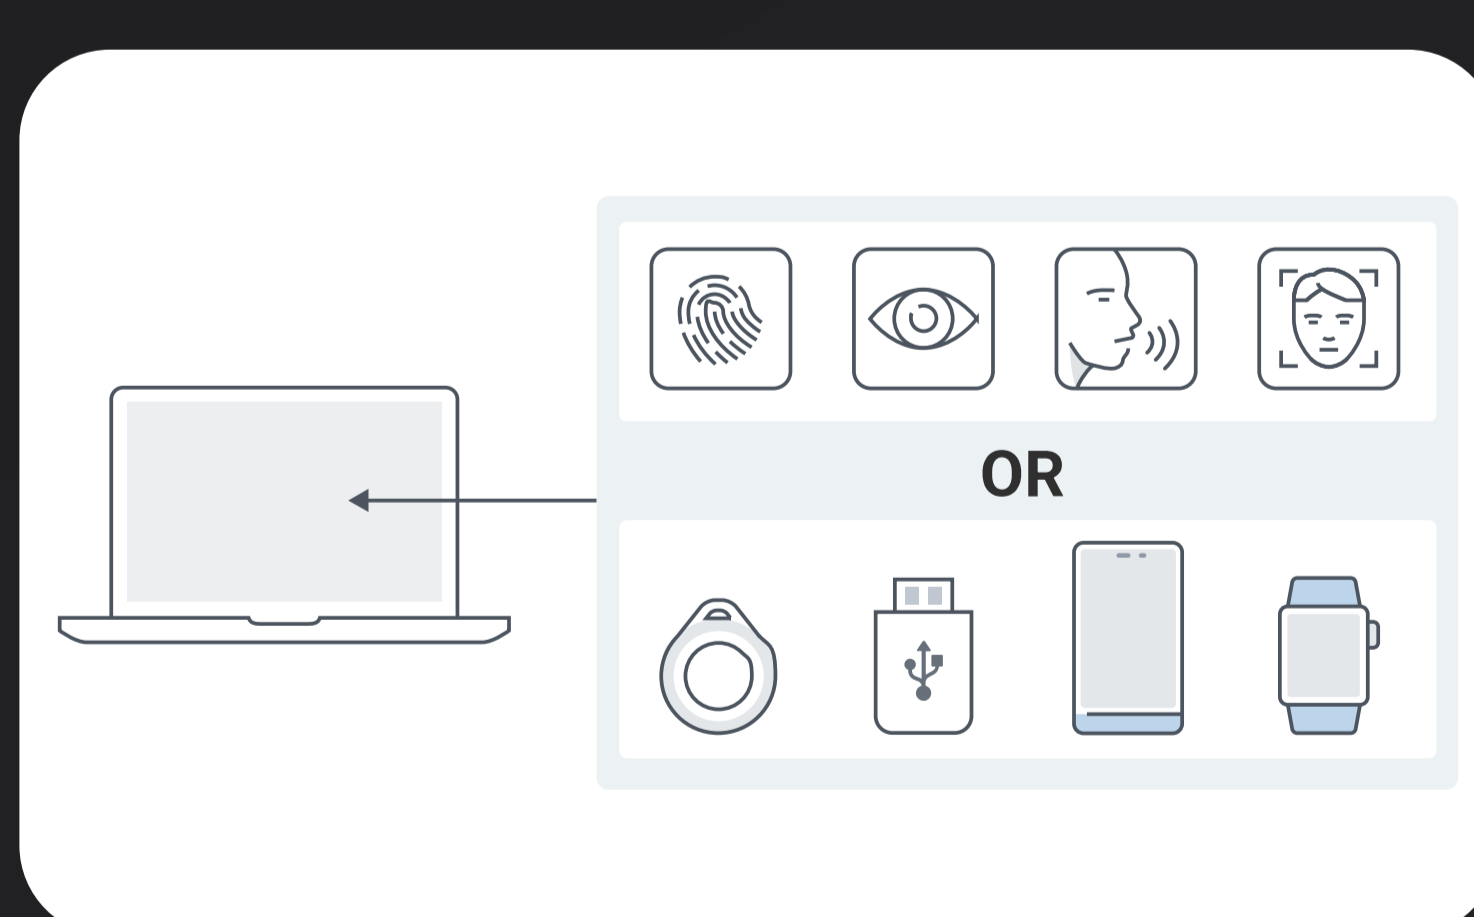

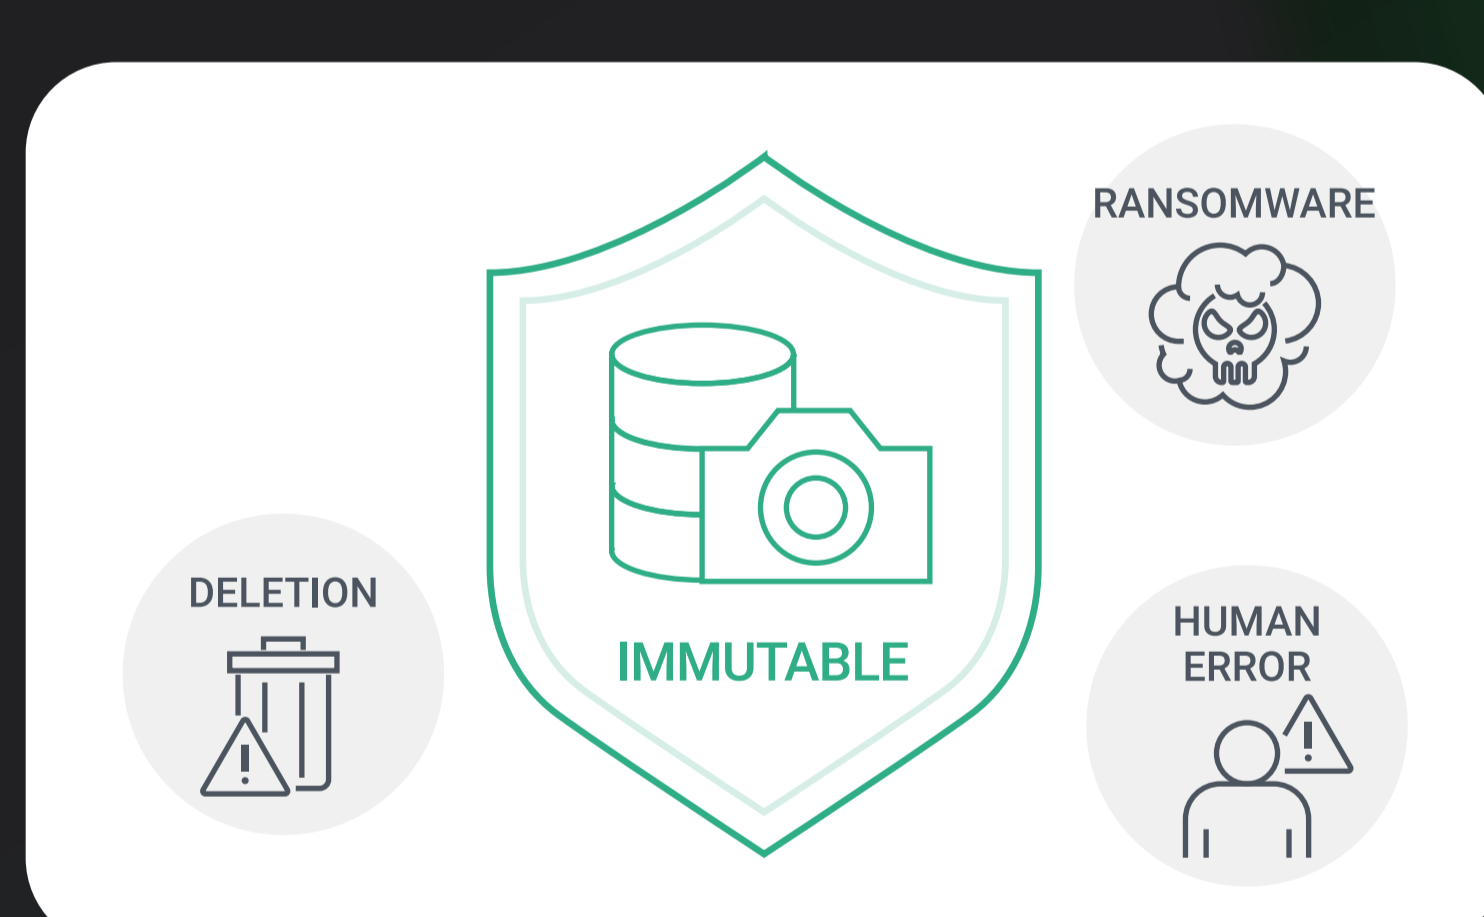

Active-Passive HA for 100% Uptime

High availability with a two-node configuration to prevent any business interruptions during faults or disasters.

Immutable Snapshots for Ransomware Protection

Define schedules to lock data and prevent deletion, ensuring your information is always protected.

Next-Level Security with FIDO2 Authentication

Password-free security with FIDO2 for complete system compliance, blocking unauthorized access.

Smart Tiered Storage

Automatic SSD/HDD allocation to optimize performance and storage efficiency, keeping your NAS running at its best.
