

Enterprise QNAP x VCA AI Smart Surveillance Minimize TCO with a Comprehensive AI Surveillance Solution

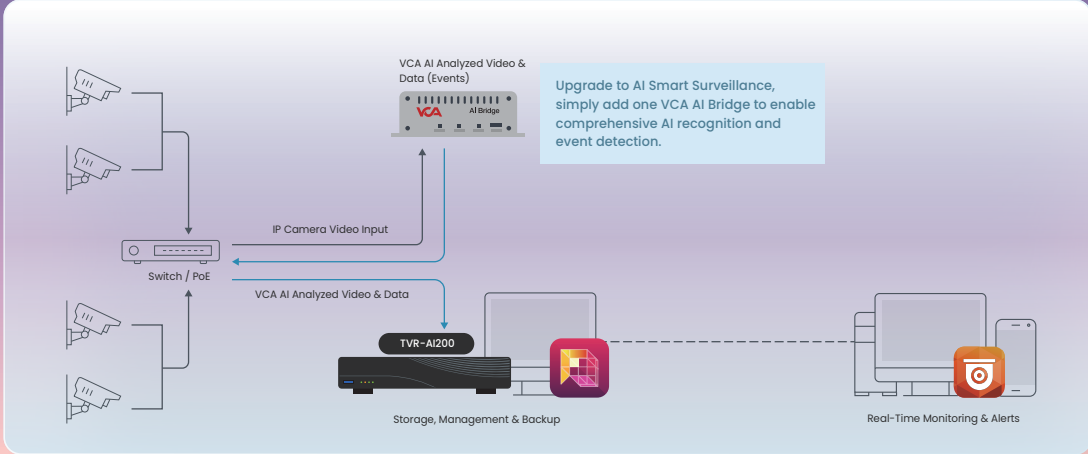

Reduce Hardware Costs

Install the VCA AI Bridge to enable AI surveillance without replacing existing IP cameras.

Retain Existing Architecture

Avoid rewiring and compatibility issues. Seamlessly integrate the bridge for quick deployment.

Enterprise On-Premises AI Knowledge Hub AI RAG Search Applications

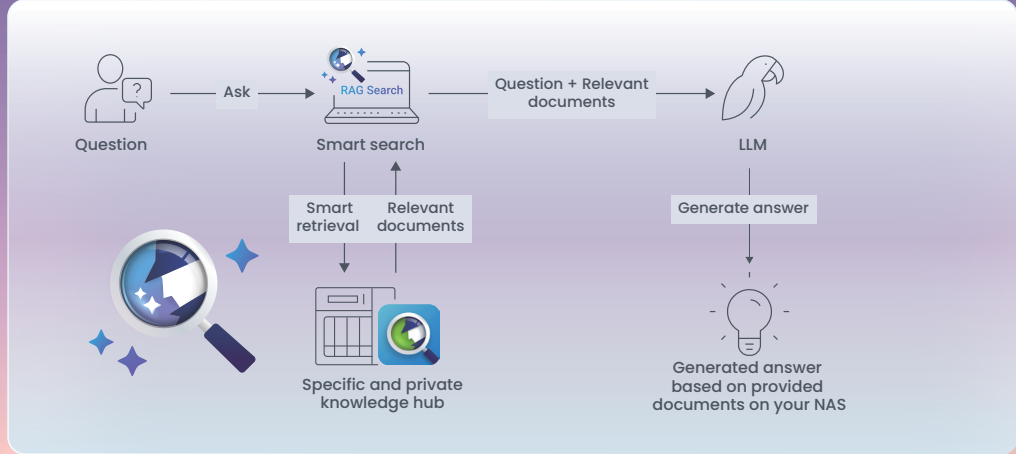

RAG Smart Search

Use natural language for organized, instant summaries.

AI OCR

Instantly extract and accurately recognize text within images.

AI Semantic Search

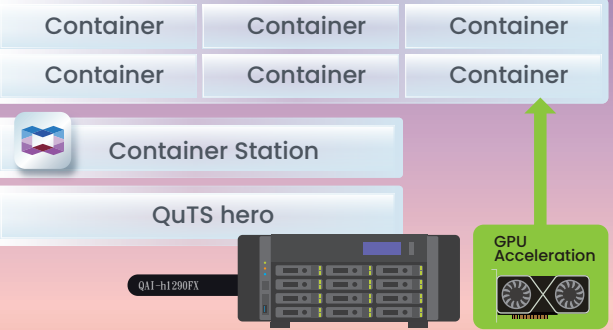

Context-aware search for fast and precise image retrieval.

Enterprise Edge AI Engine Flexible GPUs for NVIDIA® Accelerated On-Premises AI

AI Docker Applications

Scenario

Smart HR Assistant Custom Chatbot	Host HR documents on the QAI-h1290FX via a local LLM, allowing employees to quickly request forms or policies.
Creative Team AI Studio Image Generation Center	Run Stable Diffusion and ComfyUI on the QAI-h1290FX to generate promotional artwork from text prompts.
Development Team AI Co-Pilot Coding & Document Assistant	Deploy open-source LLMs (e.g., Llama) or custom-trained enterprise models securely on the QAI-h1290FX for on-premises code generation with strict access control.
Deploy n8n / OpenWebUI AI Automated Workflows	Deploy automation tools like OpenWebUI or n8n on the QAI-h1290FX to seamlessly integrate AI into your workflows.
