

ADRA NDR

Network Detection and Response Solution

Tailored for SMBs. Upgrade your QNAP NAS into an enterprise-class NDR center in just 3 minutes!

In the AI era, are your Firewall and EDR enough?

Hidden AI Threats

Employees privately using AI Agents to access data opens a hidden backdoor in the enterprise intranet.

Traditional Blind Spots

Firewall : Turns a "blind eye" to malicious behavior hidden within HTTPS-encrypted traffic.

EDR: Fails to block viruses with unseen signatures.

The Fatal 1%

Once threats enter the intranet and begin "lateral movement" to target your NAS and servers, the damage is already irreversible.

5 Key Protection Advantages of QNAP ADRA NDR

The QNAP ADRA NDR solution fills the gray areas missed by firewalls and EDR. It helps enterprises automatically block ransomware and malicious attacks before they erupt, without the need to purchase expensive dedicated security appliances.

Proactive Trapping

Threat behaviors have nowhere to hide

Uses behavior analysis and honeypots to lure threats and filter suspicious traffic without impacting network performance.

Automatic Isolation

Precise control, zero downtime

Isolates only infected devices upon detection, keeping the rest of your network safe and operational.

AI Intelligent Analysis

Automatically generates security reports

Visualizes threat paths and auto-generates comprehensive security reports mapped to the MITRE ATT&CK framework.

Risk Navigation

Network-wide risks at a glance

Centrally monitors device risk levels, highlighting the Top 5 threat sources and weekly trends.

Operational Resilience

Rapid snapshot recovery

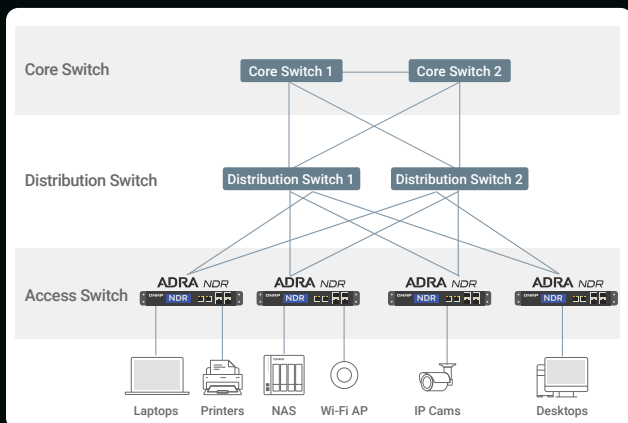

Integrates with QNAP NAS snapshots and the 3-2-1 backup strategy for rapid system recovery to a clean state after an infection.

2 Deployment Options for ADRA NDR Enterprise Intranet Security

Whether your enterprise environment already has a QNAP NAS or not, ADRA NDR offers corresponding deployment methods. From all-in-one switches to direct expansion on existing equipment, no changes to your current architecture are required.

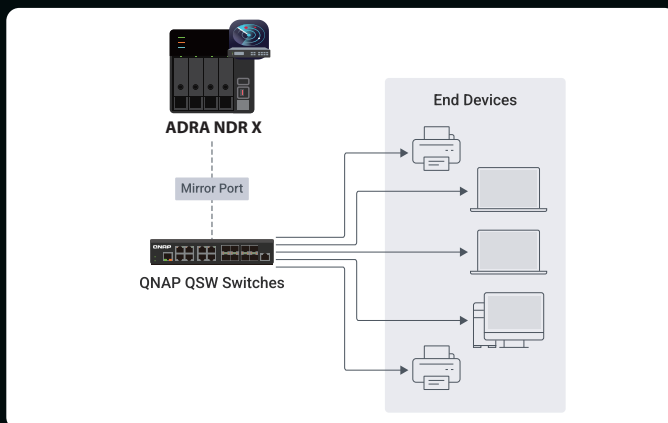

ADRA NDR | QGD Series Models

- Utilizes QGD series Smart Edge switches; the switch itself is the security appliance.
- The QGD Smart Edge switch features a built-in NDR engine, acting as a complete security device.
- Ideal for users seeking a seamless, all-in-one setup without extra configurations.

ADRA NDR X | QNAP NAS + QSW Switch

- Runs directly on your existing QNAP NAS, paired with compatible QSW switches.
- Install via the App Center to manage multiple switches without dedicated security hardware.
- The perfect budget-friendly solution for current QNAP NAS owners
