Choose QNAP to Build Your IT/OT Cybersecurity Defense Line

The only brand offering an integrated security solution spanning storage, networking, cybersecurity, and the cloud.

Based on the globally recognized NIST CSF, QNAP seamlessly combines NAS, networking, and security applications to build your IT/OT defense line. We empower enterprises to implement a practical, sustainable cybersecurity blueprint driven by three core principles: Visibility, Protection, and Rapid Recovery.

Identify

Centralize asset and network management via QuWAN Orchestrator & Organization Center for complete operational visibility.

Protect

Build a multi-layered defense utilizing WORM, Firewalls, MFA, Air-gap backups, VLAN/ACL, and NDR.

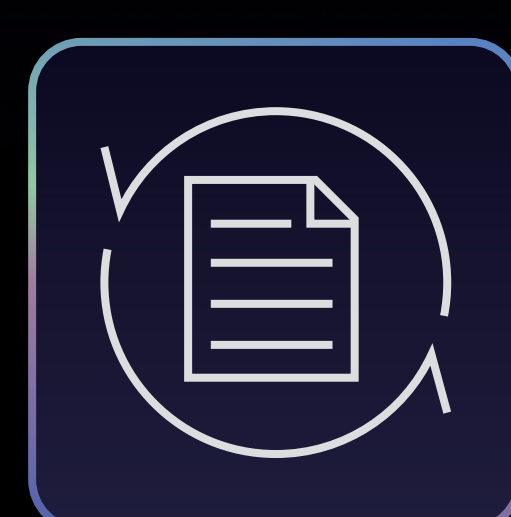

Detect

Comprehensive, blind-spot-free detection: AMIZcloud for device health, ADRA NDR for internal threats, and QHora IPS for boundary protection.

Respond

Swiftly contain threats with instant alerts and automated connection blocking via Notification Center, AMIZcloud, and QuWAN SD-WAN.

Recover

Guarantee rapid disaster recovery and data integrity with HA architecture, Interleaved MC-LAG, multi-node WAN failover, NAS snapshots, and robust backup solutions.
