# AI Agent- Driven Operations

Transforming AI infrastructure into data intelligence

# AI Chat Agent

Simplify complex NAS tasks via intuitive voice and text commands.

## QuONE

your all-in-one mobile gateway to QNAP NAS

QuONE is to consolidate Real-time Hardware & System Management, file management, photo browsing, backup, and AI-powered features into a single app for your QNAP NAS. Say goodbye to juggling multiple applications. With an intuitive UI and a smart Dashboard, you get an instant overview of device status, backup progress, and cherished memories at a glance. From natural language NAS control via QuAgent integration and AI-driven photo categorization, to system monitoring, QuONE is designed for every user — whether you're just getting started or a seasoned power user — giving you full control of your digital world, anytime, anywhere.

## QuAgent

the AI brain of your QNAP NAS

QuAgent will allow you to issue commands like "Find my photos from Tokyo" or "Show files added in the last five days" to get things done across multiple systems instantly. QuAgent seamlessly connects with over ten QNAP services — including Qumagie, File Station, HBS, and Control Panel or HDP — to execute tasks in real time, no menus required. With built-in permission controls, every action stays secure and fully transparent. Available on both the NAS Web UI and mobile app, QuAgent puts intelligent NAS management right at your fingertips.

# Future-Ready Edge AI Platform

Unleash AI on your terms — private, secure, and built for real business value.

## Built for Large-Scale AI Deployment

Built for enterprises running large LLMs, multiple models in parallel, AI agent orchestration, and high-concurrency AI services. QNAP Edge AI high-end systems deliver stronger acceleration expansion and an on-premises compute foundation for mission-critical AI workloads.

## Practical AI for Everyday Business

Designed for compact models, standard RAG systems, knowledge Q&A, and departmental AI workflows. QNAP Edge AI mid-range systems balance performance, deployment simplicity, and cost efficiency for practical private AI adoption.

## More Than an AI Server

QNAP Edge AI NAS combines storage, compute, and application deployment in one on-premises platform. With Container Station and integrated NAS capabilities, businesses can deploy LLMs, RAG systems, AI agents, vector databases, and AI workflows more efficiently while keeping data protected.

# AI-powered NAS search

Intelligent semantic discovery for images, videos, and voice with summaries.

- Qsirch 7.1.0 introduces full AI-powered semantic search across all file types—including documents, images, videos, and audio. Previously limited to images, semantic search now delivers accurate, context-aware results for every type of content.
- For multimedia, video and audio files now feature automatic transcription. Users can click on any part of the transcript to jump directly to the corresponding moment, greatly improving navigation and efficiency.
- AI-generated summaries now extend across all text-based formats, enabling users to grasp key insights at a glance without needing to open the files.
- Powered by support for Qwen 3.5, the system enhances both AI summarization and transcription capabilities for a smarter, more intuitive search experience.
