

Budget-friendly RAID 5 NAS

TS-332X

Supports RAID 5 for balanced performance and data redundancy

RAID 5 for optimized storage configuration

RAID 5 support provides the TS-332X with a storage configuration that increases storage performance, optimizes storage utilization, and protects against one disk failing.

Enjoy optimized SSD performance with extra over-provisioning

The TS-332X supports software-defined SSD RAID extra over-provisioning, helping you to obtain enterprise-grade SSD performance and endurance from consumer-grade SSDs.

Optimize your storage efficiency with Qtier and SSD caching

There are three slots for installing M.2 SSDs (sold separately) to enable SSD caching and Qtier for optimal system performance.

Built-in 10GbE connectivity for high-speed file sharing

With a built in 10GbE SFP+ port, the TS-332X natively supports connecting to 10GbE high-speed networks and accelerating massive file sharing and bandwidth-intensive applications.
