

QNAP

Cost-effective 3-bay RAID 5 NAS

TS-351

Ideal for efficient tiered storage and multimedia applications.

RAID 5 for optimized storage configuration

Build a secure RAID 5 array with three disks for optimized storage utilization and protection against one disk failing.

Snapshot support for higher NAS data protection

The TS-351 supports block-based snapshots that can assist users in recovering their data in the event of accidental deletion/modification or ransomware attack.

Enjoy an amazing multimedia experience

Connect the TS-351 to a TV/monitor/receiver via HDMI to enjoy direct multimedia playback, and enjoy streaming and real-time transcoding with H.264 hardware decoding.

Optimize your storage efficiency with Qtier and SSD caching

Built-in M.2 PCIe (Gen2 x1, 5Gb/s) NVMe SSD slots enable SSD caching and Qtier for optimal system performance.
