

Budget-friendly RAID 5 NAS

QNAP TS-328

Entry-level storage solution with high data protection

REALTEK

Build a secure
RAID 5 with
just **three disks**

Build a RAID 5 array on the TS-328 to store data with increased disk performance and protection against one disk failing.

Supports block-based snapshots that can assist users in recovering their data in the event of accidental deletion / modification or ransomware attack.

Supports H.264/H.265 hardware decoding and transcoding, providing a smoother video viewing experience.

Hot-swapping design allows you to remove hard drives without powering off the NAS to ensure continuous operations.
