

Server-grade Enterprise NAS

TS-x83XU Series

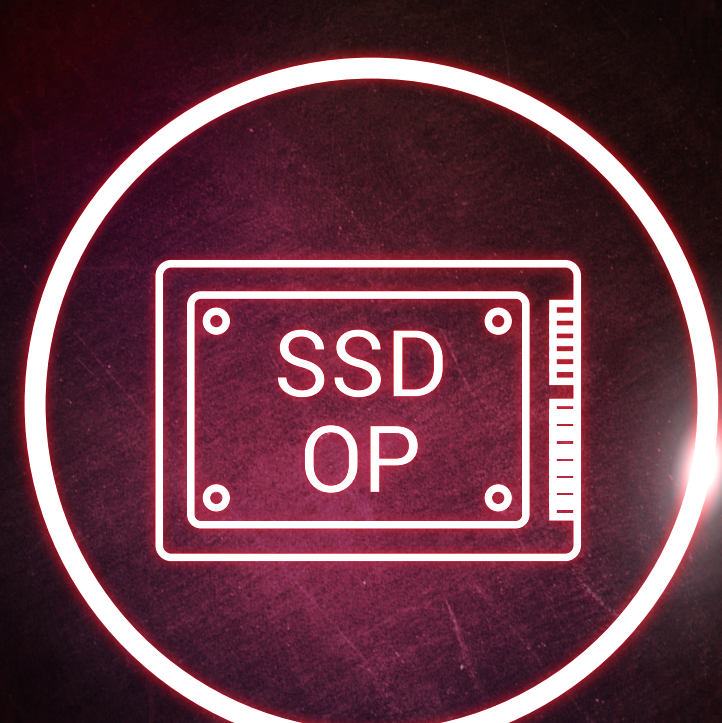

Designed for High Performance
and Reliability

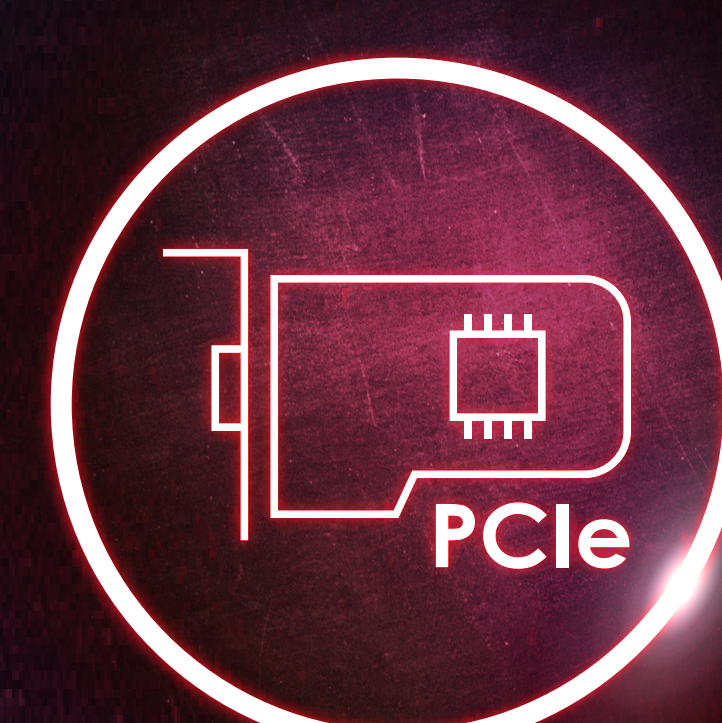

DDR4 ECC memory detects and then corrects single-bit memory errors, demonstrating high reliability for crucial applications.

Two 10GbE SFP+ SmartNIC ports with iSER support accelerate large file sharing, intensive data transfer, and VMware virtualization applications.

Software-defined SSD extra over-provisioning mitigates write amplification and optimizes SSD random write speeds for IOPS-demanding applications.

PCIe expandability allows for graphics cards or 40GbE/ 25GbE/ 10GbE adapters to increase application performance.
