

TR Series RAID Expansion Enclosure

Ideal storage expansion solution
for QNAP NAS and PC

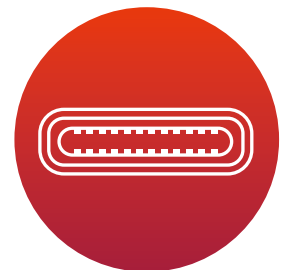

Supports various RAID levels

The TR Series features DIP switches that allow you to change between hardware-based RAID levels or software-based RAID configuration based on your requirements.

Effective storage expansion with RAID Support

The TR Series supports SATA drives and provides huge storage capacity potential. Various RAID modes are also supported to improve performance or to add protection against drive failure.

High-speed USB type-C connectivity

The TR Series connects to your NAS or PC using USB 3.0 / USB 3.1 Type-C to greatly boost data transfer performance.
