

Cost-effective 5GbE/2.5GbE NAS

TVS-x72N Series

Multi-Gig connectivity will be a workplace standard

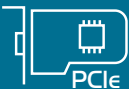

4-speed 5GBASE-T connectivity

5GBASE-T RJ45 (5G/2.5G/1G/100M) connectivity accelerates virtualization applications and file sharing across teams and devices.

Get performance benefits from SSD Caching and Qtier Technology

M.2 PCIe (Gen 3 x2, 2 GB/s) NVMe SSD support for setting up caching or storage pools, improving file access efficiency.

PCIe slots for additional NAS functionality

PCIe expandability allows a QM2 card for adding an extra M.2 SSD, or an entry-level graphics card to accelerate NAS video processing.

Powerful transcoding and 4K HDMI output

4K media playback and real-time transcoding; directly watch videos on an HDTV via HDMI 2.0 (4K @60Hz) output.
