QuMagie

Manage and Protect Photos with Smart AI and Personal Cloud

QuMagie integrates AI deep learning algorithm that enables facial recognition, subject identification, and geotagging photos on your NAS. Moreover, QuMagie features a built-in timeline scroll, customizable folder covers, iOS® Live Photo display and a powerful search tool, to provide you with the ultimate photo management and image sharing solution.

If you love traveling and photography

The QuMagie AI facial recognition feature can help you to manage a large volume of photos and find specific photos via filters.

If you like to capture precious moments and share with others

The QuMagie timeline scroll can help you to compile and find specific photos quickly.
